

Fundamentals of Philosophy

ERROL E. HARRIS

Valuable as both a foundation and a conspectus, this book acquaints the reader with works of some of the most important philosophers and outlines major problems and discussions which have formed the basis of philosophy. 65s

Non-Linguistic Philosophy

A. C. EWING

Challenges the positivist school of philosophy: attacking their views and arguments and trying to create a philosophy which goes beyond the limits set by them.

Muirhead Library of Philosophy

Belief

H. H. PRICE

Based on the Gifford Lectures delivered at the University of Aberdeen in 1959-60, this volume includes a discussion of the relation between belief and knowledge and of the various sorts of evidence we have for our beliefs, including the evidence of testimony; it considers the traditional 'occurrence analysis', the modern 'dispositional analysis', moral and religious beliefs and concludes with a discussion of the Theistic religious outlook.

VOX POPULI

By George Boas

Tracing the meaning of the proverb "*Vox Populi, vox Dei*," through history, the author finds that the People are not an easily identifiable group. In seven essays he attempts to determine who the People were and how writers and thinkers have regarded them.

COVENANT: THE HISTORY OF A BIBLICAL IDEA

By Delbert R. Hillers

This book makes available and comprehensive to the layman the insights and interpretations that have lately clarified much of the history and meaning of the idea of covenant. Through analysis of the style, content and language of biblical and extra-biblical documents, the author renders an unusually complex idea understandable.

THE LEGACY OF LOGICAL POSITIVISM

Studies in the Philosophy of Science

Edited by Peter Achinstein and Stephen F. Barker

The impact of logical positivism has been felt in various fields, but above all in the philosophy of science, a discipline which the logical positivists made particularly their own. This book examines the movement and its influence on modern views of the nature of Science.

PHENOMENOLOGY OF MORAL EXPERIENCE

By Maurice Mandelbaum

The author attempts to show the necessity for grounding any ethical theory upon the phenomenological analysis of moral experience. In six essays he probes the nature of that experience and of the moral controversies to which it gives rise.

GIAMBATTISTA VICO: AN INTERNATIONAL SYMPOSIUM

Edited by Giorgio Tagliacozzo

"Vico" writes Sir Herbert Read in this volume, "is probably the most unacknowledged source of ideas in the history of philosophy". Yet, few thinkers have exerted so pervasive an influence on Western ideas. This volume of original essays marks the tercentenary of the birth of Giambattista Vico and documents his influence on modern thought.

The Logic of Leviathan

The Moral and Political Theory of Thomas Hobbes

DAVID P. GAUTHIER

This book presents a reading of Hobbes's moral and political theories which is faithful to the text and of great current philosophical interest. The author shows how Hobbes's psychology subverts his conceptual foundations for secular and rational morality and for a political community, and suggests the relevance of a study of Hobbes to such general problems as the relation of morality and prudence. 38s net

Essays in Greek Philosophy

RICHARD ROBINSON

These papers, originally published in journals between 1936 and 1956, are now reprinted as a book, substantially in their original form, except for the last—on Aristotle's doctrine of incontinence which is translated from the French. Five of the essays are about Plato, and one is on analysis in Greek geometry. 30s net

The Landscape of the Mind

Pastoralism and Platonic Theory in Tasso's AMINTA and Shakespeare's Early Comedies

RICHARD CODY

What should we think of the shepherd's life, asks Thoreau, 'if his flocks always wandered to higher pastures than his thoughts'? This essay considers how one should think of the shepherd's life in certain Renaissance plays and poems as philosophic, and why. 40s net

Coleridge and the Pantheist Tradition

THOMAS MCFARLAND

Coleridge sought throughout his career to separate his own views from pantheism, but was strongly attracted to it nonetheless. This book assesses his intellectual position in terms of this dilemma, which is reflected in all his work. 70s net

Languages of Art

An Approach to a Theory of Symbols

NELSON GOODMAN

This book is about symbol systems: the way in which reality is represented in the arts. The major types of symbols and symbol systems are examined and compared, from those of natural language to those of pictorial representation and of musical notation. Problems in the theory of knowledge are encountered, and questions of pattern recognition, concept formation, perception, and induction are discussed. 42s net

The Bhagavad Gītā

Translated, with a Commentary based on the Original Sources by

R. C. ZAEHNER

Of the Hindu sacred books the Bhagavad Gītā is the most widely read and probably the most important for the understanding of religious mysticism. This edition tries to explain its thought from the Gītā itself and closely allied texts—the later verse Upanishads and the doctrinal portions of the Mahābhārata. 88s net

Selected Letters of Friedrich Nietzsche

Edited and Translated by Christopher Middleton

Traditionally cast in the popular mind as the ultimate anti-Semitic German nationalist, Nietzsche has been misrepresented, misinterpreted and misused for decades. Christopher Middleton has assembled a selection of letters which, as a whole, gives a sympathetic portrayal of a much maligned personality. The letters, says Mr. Middleton, "are like aerial photography of a subterranean labyrinth". This selection reveals a ground-plan of that labyrinth.

The Basic Writings of Josiah Royce

in two volumes

Edited and with an Introduction by John J. McDermott

This two-volume edition of selections from the complete range of Royce's work has a threefold purpose. First, it illustrates the scope and quality of his thought. Second, it is a detailed presentation of the viable relationship Royce forged between the local experience of community and the demands of a philosophical and scientific vision of the entire human situation. Finally, it demonstrates the relevance of Royce's judgement in cultural, moral and religious matters.

Plato's Analytic Method

Kenneth M. Sayre

Applying the analytical methods of modern logic to problems of interpretation in Plato, Kenneth Sayre traces the development of Plato's analytic method from the crude form expressed in the *Phaedo* to the considerably more sophisticated and powerful techniques practiced in the later methodological dialogues. His study offers some highly original insights that are sure to stimulate new thinking among Plato scholars, classicists and analytical philosophers in general.

Induction and Intuition in Scientific Thought

P. B. Medawar

'Why are most scientists completely indifferent to—even contemptuous of—scientific methodology? . . . I thought it important to explain what is wrong with the traditional methodology of 'inductive' reasoning . . . and to show that the alternative scheme of reasoning associated with the names of Whewell and Pierce and Popper can give the scientist a certain limited but useful insight into the way he thinks.' *Preface.*

'Sir Peter is highly persuasive and his philosophy clearly gives more scope to imaginative thinking.' *The Sunday Times.*

THE TREATISE OF SENG-CHAO

A Translation with Introduction, Notes and Appendices by

WALTER LIEBENTHAL

This work is the main scripture of the first period of Chinese Buddhism (A.D. 300-700) before Dhyana-Buddhism absorbed all other interests. The author believes that the two periods are connected and that in Dhyana-Buddhism the earlier thinking emerged, cleansed from the traces of its Indian origin. Seng-chao interpreted Mahayana, Hui-neng and Shen-hui rethought it. Second edition 88s net Hong Kong University Press

St. Augustine's Early Theory of Man, A.D. 386-391

ROBERT J. O'CONNELL

During the period between his conversion and his ordination to the priesthood, Augustine developed a theory of man and a perception of Christianity that influenced all his early works. In Plotinus' *Enneads* he discovered the most comprehensive framework for his concept of man as a 'fallen soul'. Father O'Connell approaches Augustine through Plotinus in order to demonstrate that the Plotinian frame furnishes the matrix for the elements of Christianity which Augustine was trying to understand. 95s net Harvard University Press

St. Augustine's Confessions: The Odyssey of Soul

ROBERT J. O'CONNELL

The author examines the *Confessions* in the light of the theory established in *St. Augustine's Theory of Man*. 63s net Harvard University Press

The Christian Knowledge of God

H. P. OWEN

The aim of this book is to discuss as rigorously as possible the Christian claim to know God as a transcendent and personal reality. The underlying thesis is that although God's existence cannot be logically demonstrated it can be known by spiritual intuition, and Mr Owen seeks to show that this intuition and the various forms of spiritual experience it generates are entirely reasonable.
