**Cover:** Japanese crane *Grus  
japonensis* (Orion Press/Tsutomu  
Tsutsui/Bruce Coleman Ltd). Classified  
as vulnerable in the International  
Council for Bird Preservation's *Bird  
Red Data Book*, this species occurs in  
two small disjunct populations. One  
population breeds in south-eastern  
Siberia and Manchuria and winters in  
Korea, the other is sedentary in Japan,  
where it is threatened by destruction of  
its marshland habitat.

Colour cover donated by  
Edward Wright Ltd.

Colour separation donated by  
Masterlith Ltd of Mitcham in  
Surrey.

## Subscriptions

The journal is published quarterly (January, April,  
July, October) and the subscription price for 1985 for  
non-members is £22 (UK), £26.50 (overseas), and  
\$45 (USA and Canada) post free.

The journal is published for the Fauna & Flora  
Preservation Society by Blackwell Scientific  
Publications Ltd. All matters relating to  
subscriptions, back numbers and offprints should  
be sent to Blackwell Scientific Publications Ltd,  
PO Box 88, Oxford, England.

## Advertising

Enquiries should be sent to the Advertisement  
Manager, Blackwell Scientific Publications Ltd,  
Osney Mead, Oxford OX2 0EL, England (telephone  
0865 240201).

## DOES THIS ANIMAL EXIST?

### Join the search for unexpected new animals

An animal resembling a sauropod dinosaur has been regularly seen by natives in the swamps of the Congo. It's been observed by biologists from Brazzaville. But it's yet to be positively recorded and confirmed.

This is just one of numerous sightings each year of animals previously thought extinct or not yet recognised or accepted by contemporary zoology. Other examples are the giant octopus, the yeti and the Tasmanian thylacine. The International Society of Cryptozoology was formed to investigate scientifically sightings and reports of these "unexpected" animals, and to encourage discussion and debate. Its Board is composed of leading scientists from universities in countries all round the world. Now you can keep yourself informed and help play a part in verifying reports of unexpected or hitherto unknown animals by joining the ISC. Membership brings quarterly newsletters and an annual learned scientific journal (over 150 pages) giving you up-to-the-minute facts and reports on sightings and expeditions.

To join simply complete the coupon below and return it with a cheque for £21 for your annual membership.

# SAFARI CONSULTANTS

## Specialists in Old-Style African Safaris

We arrange private and small group  
(special departure) old-style safaris.

Our special departures include:

### **BOTSWANA**

A 21 day old-style safari to the Okavango Delta hosted by Izak Barnard, the famous safari guide and expert on the Kalahari Bushmen. The departure is in April 1985 and participation is limited to ten guests only.  
*Price: £2784 inclusive.*

### **KENYA**

Join Sir Christopher Lever, noted author and naturalist, on a 15 day Canvas Ritz safari hosted by Alex and Sally Braguine and conducted in the grand style and spirit of a bygone era. The departure is at the end of July 1985 and participation is limited to eleven guests only.  
*Price: £2320 inclusive.*

Exciting safaris on horseback, with camels, by canoe and on foot through game country — all these can be tailored to suit your individual requirements.

Our wildlife destinations include Botswana, Ethiopia, Kenya, Malawi, South Africa, Tanzania, Zambia and Zimbabwe.

### **SAFARI CONSULTANTS LTD.**

83 Gloucester Place, London W1H 3PG. Tel : 01-486 4774

## Large Mammal Darting

undertaken internationally  
also other wildlife management  
services and consultancy

27 years professional experience

*write to:*

Dr John Henshaw,  
Wildlife Resources Limited,  
Throwcombe Park, Stoodleigh,

## **Special Publications of the British Ecological Society**

### **No. 3 Ecological Aspects of Radionuclide Release**

Edited by P. J. Coughtrey. 1983. 294 pages, 108 illustrations. Paper, £29.80

This publication contains papers presented at a meeting of the Industrial Ecology Group of the British Ecological Society held in April 1982. The subject of the meeting was those aspects of radionuclide release to the environment which impinge on, interact with, or are related to ecological systems. The volume reflects the radical changes in emphasis currently taking place in environmental studies of radionuclides, and will interest a wide audience.

### **No. 2 Tropical Rain Forest: Ecology and Management**

Edited by S. L. Sutton, T. C. Whitmore and A. C. Chadwick. 1983. 512 pages, 90 illustrations. £28.50

With increasing concern in the world about the destruction of tropical rain forests, this volume will appeal to all those interested in discovering the current state of tropical forest science. It contains papers presented by the Tropical Group of the British Ecological Society at Leeds University in 1982, where the ecological subjects discussed were among those presently attracting the attention of tropical rain forest biologists.

### **No. 1 The Plant Community as a Working Mechanism**

Edited by E. I. Newman. 1982. 128 pages, 40 illustrations. Paper, £4.50

'The theme of the volume is the understanding of the relationship of individual species to each other and the environment, and the ways in which plant community dynamics and structure are controlled... A useful addition to the ecological literature.' *Biologist*

**Blackwell Scientific Publications Ltd.,  
Osney Mead, Oxford OX2 0EL, UK**

Badgers are blamed for spreading tuberculosis to cattle (*Ernest Neal, Wildlife Link*).

In the 'problem' areas of south-west England less than 0.1 per cent of cattle are infected with tuberculosis, and few of these become infectious (*Craig Johnson, Wildlife Link*).

Badger in a cage-trap (*Adrian Langdon*).
