Fantastic New Title from Cambridge!

NIST Handbook of Mathematical Functions

EDITED BY

FRANK W. J. OLVER, DANIEL W. LOZIER, RONALD F. BOISVERT,
CHARLES W. CLARK

\$99.00: Hb: 978-0-521-19225-5
\$50.00: Pb: 978-0-521-14063-8;
966 pp.

This handbook results from a 10-year project conducted by the National Institute of Standards and Technology with an international group of expert authors and validators. Printed in full color, it is destined to replace its predecessor, the classic but long-outdated *Handbook of Mathematical Functions*, edited by Abramowitz and Stegun. Included with every copy is a CD with a searchable PDF of each chapter.

Prices subject to change.

Editor

Jon Agar, University College London, UK

Book Reviews Editor

Gregory Raddick, University of Leeds, UK

This leading international journal publishes scholarly papers and review articles on the history of science, interpreted widely to include medicine, technology and social studies of science. *BJHS* papers make lively contributions to scholarship and the journal has been an essential library resource for more than forty years. There are four issues a year, comprising an annual volume of over 600 pages.

Arabic Sciences and Philosophy (ASP) is an international journal devoted to the Arabic sciences, mathematics and philosophy in the world of Islam between the eighth and eighteenth centuries, in a cross-cultural context. In 2009, the journal extended its scope to include important papers on scientific modernization from the nineteenth century in the Islamic world. Together with original studies on the history of all these fields, ASP also offers work on the inter-relations between Arabic and Greek, Indian, Chinese, Latin, Byzantine, Syriac and Hebrew sciences and philosophy. Casting new light on the growth of these disciplines, as well as on the social and ideological context in which this growth took place, ASP is essential reading for those interested in these areas.

Editor

Norman Hughes, The Royal Institute of Navigation, UK

The Journal of Navigation contains original papers on the science of navigation by man and animals over land, on sea, in air and in space, including a selection of papers presented at meetings of the Institute and other organisations associated with navigation. Papers cover every aspect of navigation, from the highly technical to the descriptive and historical. Subjects include electronics, astronomy, mathematics, cartography, command and control, psychology and zoology, operational research, risk analysis, theoretical physics, operation in hostile environments, instrumentation, ergonomics, financial planning and law.

Editors

Julian Hoppit, University College London, UK

Clare Jackson, University of Cambridge, UK

Editor (Reviews)

William O'Reilly, University of Cambridge, UK

The Historical Journal publishes papers on all aspects of British, European, and world history since the fifteenth century. The best contemporary scholarship is represented. Contributions come from the UK, continental Europe, North America, and elsewhere. The journal provides a forum for younger scholars making a distinguished debut as well as publishing the work of leading historians.

INSTRUCTIONS FOR AUTHORS

Science in Context is an international journal edited at the Cohn Institute for the History and Philosophy of Science and Ideas, Tel Aviv University. It is devoted to the study of the sciences from points of view of comparative epistemology and historical sociology of scientific knowledge. The journal is committed to an interdisciplinary approach to the study of science and its cultural development; it does not segregate considerations drawn from history, philosophy, and sociology. Controversies within scientific knowledge and debates about methodology are presented in their contexts. The journal encourages analyses whose approach is drawn from cognate disciplines such as social anthropology, art history, hermeneutics, and social sciences.

Manuscripts should be submitted, by mail or email, to the editorial office with a cover sheet including your name, fax, telephone number, and email address. The editors require a separate text of 150 words that presents the argument of your paper. Hardcopies should be anonymous and sent in triplicate accompanied by a disk preferably in Rich Text Format (RTF), or a major wordprocessing program such as MS Word. Our mailing address is: Science in Context, The Cohn Institute for the History and Philosophy of Science and Ideas, Tel Aviv University, Ramat Aviv, Tel Aviv 69978, Israel. Submissions by email should be sent to: <sic@post.tau.ac.il>. Submission of a paper is taken to imply that it has not been previously published and that it is not being considered for publication elsewhere. Upon acceptance of the paper, the author will be asked to transfer copyright to Cambridge University Press. There are no page charges.

The journal follows the author-date reference system that is generally used in the social and natural sciences. 'Documentation Two' in *Chicago Manual of Style* and a back issue of the journal should be used as guides when preparing the manuscript.

1. REFERENCE LIST: Full bibliographical information is listed alphabetically at the end of the paper. This list should include all the sources that are cited in parentheses in the text.

a. BOOKS: Author's last name, author's full first name; year, including original date in square brackets when a reprint is being cited; title; editor or translator if applicable; city; publisher. E.g. Bourbaki, Nicolas. [1960] 1994. *Elements of the History of Mathematics*. Translated by John Meldrum. Berlin: Springer.

b. ARTICLES IN BOOKS: Author's last name, author's full first name; year; title of article; title of book; editor or translator if applicable; page numbers; city and publisher. E.g. Corry, Leo. 1996. "David Hilbert and Physics." In *The Symbolic Universe: Geometry and Physics, 1890-1930*, edited by Jeremy Gray, 120-135. Oxford: Oxford University Press.

c. ARTICLES IN PERIODICALS: Author's last name, author's full first name; year; title of article; periodical; volume; page numbers. E.g. Foucault, Michel. 1978. "Politics and the Study of Discourse." *Ideology and Consciousness* 3:7-26.

d. WEBSITES: title; name of editor (if given); version; date of last update; sponsoring institution or organization; date of access; URL. E.g. *American Museum Congo Expedition 1909-1915*. Ver. 2.0. January 2003. American Museum of Natural History. 20 July 2003 <<http://diglib1.amnh.org>>.

2. CITATIONS IN TEXT: The AUTHOR and DATE (and PAGES if relevant) are set off in parentheses in the text and will refer readers to the complete information that is given in the Reference List. E.g. (Corry 1996, 120).

3. FOOTNOTES or ENDNOTES are used only to present important and relevant points that would otherwise interrupt the flow or structure of the paper. These notes are numbered consecutively and listed as endnotes, even though they will appear as footnotes in the journal.

Unusual alphabets, special characters, mathematical and chemical formulas, and all diacritical markings should be marked clearly. A small number of figures may be used to illustrate an article. Line drawings should be directly reproducible; glossy prints should be furnished for all halftone illustrations. If supplying illustrations as electronic files TIFF is the required format with a minimum resolution of 300 dpi for halftones and 1200 dpi for line drawings.

Printed in the United Kingdom at the University Press, Cambridge

SCIENCE IN CONTEXT
