

Nutrition Research Reviews

Nutrition Research Reviews

Volume 25, 2012 ISSN: 0954-4224

Aims and Scope

Nutrition Research Reviews publishes comprehensive and challenging review articles on selected key topics in nutritional science. Authors are encouraged to take a critical approach in appraising the literature while also aiming to advance new concepts and hypotheses. The journal publishes both solicited and unsolicited articles.

Nutrition Research Reviews is published twice a year by Cambridge University Press on behalf of The Nutrition Society.

The contents page of this journal is available on the Internet before publication at <http://www.cambridge.org/nrr>

Editorial Board

Editor-in-Chief

Dr Kate M Younger, *Dublin Institute of Technology, Ireland*

Address for correspondence

Dr Kate M Younger, *Editor-in-Chief, Nutrition Research Reviews, School of Biological Sciences, Dublin Institute of Technology, Kevin Street, Dublin 8, Republic of Ireland*
Tel: +353 1 4024662 Fax: +353 1 4024995 Email: katherine.younger@dit.ie

US Editor

Professor C M Weaver, *Purdue University, USA*

Editors

Dr N Binns, *NMB Consulting Limited, Ireland*

Dr D Dardevet, *INRA, France*

Dr R M Elliot, *Institute of Food Research, UK*

Dr M Pufulete, *Kings College London, UK*

Editorial Advisors

Dr M Ashwell, *Baldock, UK*

Dr D A Bender, *University College London, UK*

Dr J L Black, *Warrimo, Australia*

Professor J Cade, *University of Leeds, UK*

Dr C Edwards, *Glasgow University, UK*

Dr S French, *Sheffield University, UK*

Professor L Hambraeus, *University of Uppsala, Sweden*

Professor H J Powers, *University of Sheffield, UK*

Dr P Rogers, *University of Bristol, UK*

Dr B Sivakumar, *National Institute of Nutrition, India*

Professor N W Solomons, *CESSIAM, Guatemala*

Professor J B Ubbink, *University of Pretoria, South Africa*

Professor M Versteegen, *Wageningen University, Netherlands*

Editorial staff

C Goodstein (*Publications Manager*), C Jackson (*Deputy Publications Manager*),

H Money, J Norton & L Weeks (*Publications Officers*) C T Hughes (*Sub-editor*)

The Nutrition Society has as its objective the advancement of the scientific study of nutrition and its applications to the maintenance of human and animal health.

Application of membership is invited from anyone whose work has contributed to the scientific knowledge of nutrition, whether such work has been in the laboratory, the field or the clinic, and whether experimental, clinical, agricultural or statistical in nature. There is also a student membership scheme with reduced subscriptions.

Particulars of The Nutrition Society and application forms for membership are available from The Nutrition Society,

10 Cambridge Court, 210 Shepherds Bush Road, London W6 7NJ, UK.

Contents of Volume 25

(All rights reserved)

Selle PH, Cowieson AJ, Cowieson NP & Ravindran V Protein–phytate interactions in pig and poultry nutrition: a reappraisal	1
Aleman M The problem of nitrogen disposal in the obese	18
Fromentin G, Darcel N, Chaumontet C, Marsset-Baglieri A, Nadkarni N & Tomé D Peripheral and central mechanisms involved in the control of food intake by dietary amino acids and proteins	29
Olausson H, Goldberg GR, Ann Laskey M, Schoenmakers I, Jarjou LMA & Prentice A Calcium economy in human pregnancy and lactation	40
Teegarden D, Romieu I & Lelièvre SA Redefining the impact of nutrition on breast cancer incidence: is epigenetics involved?	68
Kuipers RS, Joordens JCA & Muskiet FAJ A multidisciplinary reconstruction of Palaeolithic nutrition that holds promise for the prevention and treatment of diseases of civilisation	96
Song Q & Sergeev IN Calcium and vitamin D in obesity	130
Lamont LS A critical review of recommendations to increase dietary protein requirements in the habitually active	142
Thomas EL, Frost G, Taylor-Robinson SD & Bell JD Excess body fat in obese and normal-weight subjects	150
Turner PC, Flannery B, Isitt C, Ali M & Pestka J The role of biomarkers in evaluating human health concerns from fungal contaminants in food	162
Ellsworth-Bowers ER & Corwin EJ Nutrition and the psychoneuroimmunology of postpartum depression	180
Livingstone KM, Lovegrove JA & Givens DI The impact of substituting SFA in dairy products with MUFA or PUFA on CVD risk: evidence from human intervention studies	193
Allès B, Samieri C, Féart C, Jutand M-A, Laurin D & Barberger-Gateau P Dietary patterns: a novel approach to examine the link between nutrition and cognitive function in older individuals	207
Lancha A, Frühbeck G & Gómez-Ambrosi J Peripheral signalling involved in energy homeostasis control	223
Harland JI Food combinations for cholesterol lowering	249
Loonam CR & Mullen A Nutrition and the HIV-associated lipodystrophy syndrome	267
Lacroix S, Rosiers CD, Tardif J-C & Nigam A The role of oxidative stress in postprandial endothelial dysfunction	288

Index of Subjects

Adipocytes

Calcium and vitamin D in obesity
25, 130, 2012, doi:10.1017/S0954422412000029

Adipokines

Peripheral signalling involved in energy homeostasis control
25, 223, 2012, doi:10.1017/S0954422412000145

Adiposity

Excess body fat in obese and normal-weight subjects
25, 150, 2012, doi:10.1017/S0954422412000054

Aflatoxin

The role of biomarkers in evaluating human health concerns from fungal contaminants in food
25, 162, 2012, doi:10.1017/S095442241200008X

Aged

Dietary patterns: a novel approach to examine the link between nutrition and cognitive function in older individuals
25, 207, 2012, doi:10.1017/S0954422412000133

Alzheimer's disease

Dietary patterns: a novel approach to examine the link between nutrition and cognitive function in older individuals
25, 207, 2012, doi:10.1017/S0954422412000133

Amino acids

The problem of nitrogen disposal in the obese
25, 18, 2012, doi:10.1017/S0954422411000163

Amino acids

Peripheral and central mechanisms involved in the control of food intake by dietary amino acids and proteins
25, 29, 2012, doi:10.1017/S0954422411000175

Ammonia

The problem of nitrogen disposal in the obese
25, 18, 2012, doi:10.1017/S0954422411000163

Apoptosis

Calcium and vitamin D in obesity
25, 130, 2012, doi:10.1017/S0954422412000029

β -Glucans

Food combinations for cholesterol lowering
25, 249, 2012, doi:10.1017/S0954422412000170

Body fat distribution

Excess body fat in obese and normal-weight subjects
25, 150, 2012, doi:10.1017/S0954422412000054

Breast cancer

Redefining the impact of nutrition on breast cancer incidence: is epigenetics involved?
25, 68, 2012, doi:10.1017/S0954422411000199

CVD

The impact of substituting SFA in dairy products with MUFA or PUFA on CVD risk: evidence from human intervention studies
25, 193, 2012, doi:10.1017/S095442241200011X

Calcium

Calcium and vitamin D in obesity
25, 130, 2012, doi:10.1017/S0954422412000029

Calcium

Calcium economy in human pregnancy and lactation
25, 40, 2012, doi:10.1017/S0954422411000187

Cancer

The role of biomarkers in evaluating human health concerns from fungal contaminants in food
25, 162, 2012, doi:10.1017/S095442241200008X

Central nervous system

Peripheral and central mechanisms involved in the control of food intake by dietary amino acids and proteins
25, 29, 2012, doi:10.1017/S0954422411000175

Children

The role of biomarkers in evaluating human health concerns from fungal contaminants in food
25, 162, 2012, doi:10.1017/S095442241200008X

Cholesterol lowering

Food combinations for cholesterol lowering
25, 249, 2012, doi:10.1017/S0954422412000170

Cognition

Dietary patterns: a novel approach to examine the link between nutrition and cognitive function in older individuals
25, 207, 2012, doi:10.1017/S0954422412000133

Cytokines

Peripheral signalling involved in energy homeostasis control
25, 223, 2012, doi:10.1017/S0954422412000145

Dairy products

The impact of substituting SFA in dairy products with MUFA or PUFA on CVD risk: evidence from human intervention studies
25, 193, 2012, doi:10.1017/S095442241200011X

Deoxynivalenol

The role of biomarkers in evaluating human health concerns from fungal contaminants in food
25, 162, 2012, doi:10.1017/S095442241200008X

Diet

Dietary patterns: a novel approach to examine the link between nutrition and cognitive function in older individuals
25, 207, 2012, doi:10.1017/S0954422412000133

Diet

Redefining the impact of nutrition on breast cancer incidence: is epigenetics involved?
25, 68, 2012, doi:10.1017/S0954422411000199

Dietary protein needs of athletes

A critical review of recommendations to increase dietary protein requirements in the habitually active
25, 142, 2012, doi:10.1017/S0954422412000030

Dietary recommendations

A multidisciplinary reconstruction of Palaeolithic nutrition that holds promise for the prevention and treatment of diseases of civilisation
25, 96, 2012, doi:10.1017/S0954422412000017

1,25-Dihydroxyvitamin D₃

Calcium and vitamin D in obesity
25, 130, 2012, doi:10.1017/S0954422412000029

Disease prevention

A multidisciplinary reconstruction of Palaeolithic nutrition that holds promise for the prevention and treatment of diseases of civilisation
25, 96, 2012, doi:10.1017/S0954422412000017

Disease treatment

A multidisciplinary reconstruction of Palaeolithic nutrition that holds promise for the prevention and treatment of diseases of civilisation
25, 96, 2012, doi:10.1017/S0954422412000017

Dual-energy X-ray absorptiometry

Calcium economy in human pregnancy and lactation
25, 40, 2012, doi:10.1017/S0954422411000187

Endothelial function

The role of oxidative stress in postprandial endothelial dysfunction
25, 288, 2012, doi:10.1017/S0954422412000182

Endurance athletes

A critical review of recommendations to increase dietary protein requirements in the habitually active
25, 142, 2012, doi:10.1017/S0954422412000030

Energy homeostasis control

Peripheral signalling involved in energy homeostasis control
25, 223, 2012, doi:10.1017/S0954422412000145

Epigenetics

Redefining the impact of nutrition on breast cancer incidence: is epigenetics involved?
25, 68, 2012, doi:10.1017/S0954422411000199

Evolutionary medicine

A multidisciplinary reconstruction of Palaeolithic nutrition that holds promise for the prevention and treatment of diseases of civilisation
25, 96, 2012, doi:10.1017/S0954422412000017

Food component selection

Food combinations for cholesterol lowering
25, 249, 2012, doi:10.1017/S0954422412000170

Fumonisin

The role of biomarkers in evaluating human health concerns from fungal contaminants in food
25, 162, 2012, doi:10.1017/S095442241200008X

Growth

The role of biomarkers in evaluating human health concerns from fungal contaminants in food
25, 162, 2012, doi:10.1017/S095442241200008X

Gut-brain axis

Peripheral and central mechanisms involved in the control of food intake by dietary amino acids and proteins
25, 29, 2012, doi:10.1017/S0954422411000175

HIV-associated lipodystrophy syndrome

Nutrition and the HIV-associated lipodystrophy syndrome
25, 267, 2012, doi:10.1017/S0954422411000138

Healthy ageing

A multidisciplinary reconstruction of Palaeolithic nutrition that holds promise for the prevention and treatment of diseases of civilisation
25, 96, 2012, doi:10.1017/S0954422412000017

Highly active antiretroviral therapy

Nutrition and the HIV-associated lipodystrophy syndrome
25, 267, 2012, doi:10.1017/S0954422411000138

Hormones

Peripheral signalling involved in energy homeostasis control
25, 223, 2012, doi:10.1017/S0954422412000145

Hypertriglycerolaemia

The role of oxidative stress in postprandial endothelial dysfunction
25, 288, 2012, doi:10.1017/S0954422412000182

Immune system

Nutrition and the psychoneuroimmunology of postpartum depression
25, 180, 2012, doi:10.1017/S0954422412000091

Inflammation

Nutrition and the psychoneuroimmunology of postpartum depression
25, 180, 2012, doi:10.1017/S0954422412000091

Intracellular Ca²⁺

Calcium and vitamin D in obesity
25, 130, 2012, doi:10.1017/S0954422412000029

Lactation

Calcium economy in human pregnancy and lactation
25, 40, 2012, doi:10.1017/S0954422411000187

Mammary gland

Redefining the impact of nutrition on breast cancer incidence: is epigenetics involved?
25, 68, 2012, doi:10.1017/S0954422411000199

Mediterranean diet

Nutrition and the HIV-associated lipodystrophy syndrome
25, 267, 2012, doi:10.1017/S0954422411000138

Metabolic phenotypes

Excess body fat in obese and normal-weight subjects
25, 150, 2012, doi:10.1017/S0954422412000054

Metabolic syndrome

The problem of nitrogen disposal in the obese
25, 18, 2012, doi:10.1017/S0954422411000163

Metabolism

Calcium economy in human pregnancy and lactation
25, 40, 2012, doi:10.1017/S0954422411000187

Micronutrients

Nutrition and the psychoneuroimmunology of postpartum depression
25, 180, 2012, doi:10.1017/S0954422412000091

Milk

The impact of substituting SFA in dairy products with MUFA or PUFA on CVD risk: evidence from human intervention studies
25, 193, 2012, doi:10.1017/S095442241200011X

Mycotoxin

The role of biomarkers in evaluating human health concerns from fungal contaminants in food
25, 162, 2012, doi:10.1017/S095442241200008X

n-3 PUFA

Nutrition and the HIV-associated lipodystrophy syndrome
25, 267, 2012, doi:10.1017/S0954422411000138

Nitrogen balance

A critical review of recommendations to increase dietary protein requirements in the habitually active
25, 142, 2012, doi:10.1017/S0954422412000030

Nitrogen excretion

The problem of nitrogen disposal in the obese
25, 18, 2012, doi:10.1017/S0954422411000163

Nutrition therapy

Nutrition and the HIV-associated lipodystrophy syndrome
25, 267, 2012, doi:10.1017/S0954422411000138

Nutrition

Dietary patterns: a novel approach to examine the link between nutrition and cognitive function in older individuals
25, 207, 2012, doi:10.1017/S0954422412000133

Nutrition

Redefining the impact of nutrition on breast cancer incidence: is epigenetics involved?
25, 68, 2012, doi:10.1017/S0954422411000199

Obesity

Calcium and vitamin D in obesity
25, 130, 2012, doi:10.1017/S0954422412000029

Obesity

Excess body fat in obese and normal-weight subjects
25, 150, 2012, doi:10.1017/S0954422412000054

Obesity

The problem of nitrogen disposal in the obese
25, 18, 2012, doi:10.1017/S0954422411000163

Obesity

Peripheral signalling involved in energy homeostasis control
25, 223, 2012, doi:10.1017/S0954422412000145

Oxidative stress

The role of oxidative stress in postprandial endothelial dysfunction
25, 288, 2012, doi:10.1017/S0954422412000182

Palaeolithic nutrition

A multidisciplinary reconstruction of Palaeolithic nutrition that holds promise for the prevention and treatment of diseases of civilisation
25, 96, 2012, doi:10.1017/S0954422412000017

Peripheral signalling

Peripheral signalling involved in energy homeostasis control
25, 223, 2012, doi:10.1017/S0954422412000145

Phytase

Protein–phytate interactions in pig and poultry nutrition: a reappraisal
25, 1, 2012, doi:10.1017/S0954422411000151

Phytate

Protein–phytate interactions in pig and poultry nutrition: a reappraisal
25, 1, 2012, doi:10.1017/S0954422411000151

Pigs

Protein–phytate interactions in pig and poultry nutrition: a reappraisal
25, 1, 2012, doi:10.1017/S0954422411000151

Postpartum depression

Nutrition and the psychoneuroimmunology of postpartum depression
25, 180, 2012, doi:10.1017/S0954422412000091

Postprandial hyperglycaemia

The role of oxidative stress in postprandial endothelial dysfunction
25, 288, 2012, doi:10.1017/S0954422412000182

Poultry

Protein–phytate interactions in pig and poultry nutrition: a reappraisal
 25, 1, 2012, doi:10.1017/S0954422411000151

Pregnancy

Calcium economy in human pregnancy and lactation
 25, 40, 2012, doi:10.1017/S0954422411000187

Protein recommended daily allowance for athletes

A critical review of recommendations to increase dietary protein requirements in the habitually active
 25, 142, 2012, doi:10.1017/S0954422412000030

Protein

Protein–phytate interactions in pig and poultry nutrition: a reappraisal
 25, 1, 2012, doi:10.1017/S0954422411000151

Proteins

Peripheral and central mechanisms involved in the control of food intake by dietary amino acids and proteins
 25, 29, 2012, doi:10.1017/S0954422411000175

SFA

The impact of substituting SFA in dairy products with MUFA or PUFA on CVD risk: evidence from human intervention studies
 25, 193, 2012, doi:10.1017/S095442241200011X

Satiety

Peripheral and central mechanisms involved in the control of food intake by dietary amino acids and proteins
 25, 29, 2012, doi:10.1017/S0954422411000175

Soya protein

Food combinations for cholesterol lowering
 25, 249, 2012, doi:10.1017/S0954422412000170

Stable isotope tracer infusion

A critical review of recommendations to increase dietary protein requirements in the habitually active
 25, 142, 2012, doi:10.1017/S0954422412000030

Stanols

Food combinations for cholesterol lowering

P.C. Calder, University of Southampton, UK

British Journal of Nutrition is a leading international peer-reviewed journal covering research on human and clinical nutrition, animal nutrition and basic science as applied to nutrition. The journal recognises the multidisciplinary nature of nutritional science and includes material from all of the specialities involved in nutrition research, including molecular and cell biology and the emerging area of nutritional genomics.

**CAMBRIDGE
UNIVERSITY PRESS**

Nutrition Research Reviews publishes comprehensive and challenging review articles on selected key topics in nutritional science. Authors are encouraged to take a critical approach in appraising the literature while also aiming to advance new concepts and hypotheses. The journal publishes both solicited and unsolicited articles. Solicited authors will be contacted via this system by an Editor, and invited to submit a Solicited Review Proposal form. Authors wishing to submit an unsolicited review article should, in the first instance, complete and submit an Unsolicited Review Proposal form. Authors may download the appropriate Review Proposal form from the top banner on the submission site at the following address: <http://nrr.msubmit.net/> All proposal forms should be submitted via the online submission system.

It is essential that any relevant interests and sources of funding are declared at submission stage and published as part of the manuscript.

Page format. *Nutrition Research Reviews* is printed in double-column format (column width of 77 mm) with a text area of 77 x 212 mm.

Text. Papers should be submitted with 1.5 line spacing and margins of at least 2 cm on each side. The use of automated line numbering is strongly encouraged. Standard abbreviations (e.g. Fig. and Figs.) and SI units must be used. A hierarchy of headings used to subdivide the paper should be made clear. It is possible to use four levels, although three or less will generally suffice.

The paper should be written in English, the spelling being generally that of the *Concise Oxford Dictionary* (1995), 9th ed. Oxford: Clarendon Press. If occasionally other spellings are preferred this will be indicated during technical editing.

Abstract. Each paper must commence with a carefully prepared, accurate, informative abstract, in one paragraph, that is complete in itself and intelligible without reference to text or figures. It should not exceed 250 words. A short title of up to 45 characters should be provided as a running head, and there should be a list of up to 6 key words.

Introduction. An introduction should follow the abstract setting out the background and, if necessary, the history of the chosen topic; this should be sufficient to set the scene for the general reader and be relatively brief.

Main body. Invited review papers will normally be expected to be between 6 000 and 12 000 words in length (including references and equivalent spaces for figures and tables). The main body of the review should present, discuss and interpret recent research findings in a comprehensive but concise manner. It should also consider what is known about work in progress and should close with a section attempting to assess where present investigations are likely to lead. The review will, of course, represent the views of the author, but should deal throughout with the world picture and give recognition to any work thought to be relevant.

Tables. Tables should be reduced to the simplest form, and should not be used where text or illustrations give the same information. They should be submitted on separate sheets at the end of the main text file and must carry headings describing their content that are comprehensible without reference to the text. Tables may be single or double column width; very wide tables will be printed in landscape format.

Illustrations. Text figures, line drawings, computer-generated figures and graphs should be of sufficient size and quality to allow for reduction by half or two-thirds; they may be in single or double column format. Half-tone photographs are acceptable where they are a real contribution to the text. Figure legends should be typed on a separate sheet in the main text file and numbered corresponding

to the relevant figures. For illustrations, preferred software packages are Adobe Illustrator, Adobe Photoshop, Aldus Freehand, Chemdraw or CorelDraw. Preferred formats are TIFF or JPEG, if a TIFF file is not possible save as an EPS or a Windows metafile. Microsoft PowerPoint files are also acceptable. If you are sending several files containing figures, please compress them into a single zip file for transmission.

References. References must be based on the numbered (Vancouver) system. **When an article has more than ten authors, only the names of the first three should be given followed by *et al.*; give abbreviated journal titles** and conform to the following styles:

1. Goel V, Cheema SK, Agellon LB, Oraikul B & Basu TK (1999) Dietary rhubarb (*Rheum rhaponticum*) stalk fibre stimulates cholesterol 7 α -hydroxylase gene expression and bile acid excretion in cholesterol-fed C57BL/6J mice. *Br J Nutr* **81**, 65–71.
2. Jenkins DJ, Kendall CW, Marchie A *et al.* (2003) The effect of combining plant sterols, soy protein, viscous fibres, and almonds in treating hypercholesterolemia. *Metabolism* **52**, 1478–1483.
3. Brandtzaeg P (2003) Role of local immunity and breast-feeding in mucosal homeostasis and defence against infections. In *Nutrition and Immune Function*, pp. 273–320 [PC Calder, CJ Field and HS Gill, editors]. Wallingford, Oxon: CAB International.
4. Stock M & Rothwell NJ (1982) *Obesity and Leanness: Basic Aspects*. London: John Libbey.

Citations should be numbered consecutively in the order in which they first appear in the text using superscript Arabic numerals in parentheses, e.g. ‘The conceptual difficulty of this approach has recently been highlighted^(1,2-4)’. If a reference is cited more than once the same number should be used each time.

Other rules of presentation etc. Please consult our full Directions to Authors available on the Nutrition Society website for further details: <http://www.nutrition-society.org/publications/nutrition-society-journals/nutrition-research-reviews>

Proofs. An electronic set of page proofs in Adobe Acrobat (PDF) format will be provided to authors for checking and should be returned within 3 days (by fax or Express mail) to the NRR Production Editor, Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU, UK; fax +44 1223 325802, email epearce@cambridge.org

Offprints. A copy of the issue and a PDF file of the paper will be supplied free of charge to the corresponding author of each review, and additional offprints may be ordered on the order form sent with the proofs.

Papers will be sent to referees, will be edited before publication and modifications may be required.

Typescripts. *Nutrition Research Reviews* operates an on-line submission and reviewing system (eJournalPress). As explained above, authors should submit a proposal form to the following address: <http://nrr.msubmit.net/> If any difficulties are encountered, please email the Publications Office (details below):
