Wooley**, *University of Bristol, UK*.

Aims and Scope. The aim of *Compositio Mathematica* is to publish first-class mathematical research papers. By tradition the journal focuses on papers in the mainstream of pure mathematics. This includes the fields of algebra, number theory, topology, algebraic and analytic geometry and (geometric) analysis. Papers on other topics are welcome if they are of interest not only to specialists. All contributions are required to meet high standards of quality and originality and are carefully screened by experts in the field.

Compositio Mathematica (ISSN 0010-437X) is published bi-monthly in January, March, May, July, September and November as one annual volume of six parts by the London Mathematical Society and distributed by Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU, UK / Cambridge University Press, 32 Avenue of the Americas, New York, NY 10013-2473, USA. Periodicals postage paid at New York, NY and additional mailing offices. POSTMASTER: send address changes in the USA and Canada to *Compositio Mathematica*, Cambridge University Press, 100 Brook Hill Drive, West Nyack, NY 10994-2133.

Subscriptions. The annual subscription rate for 2010 is €1224/£847 (USA, Canada and Mexico US\$1561). These prices include delivery by air and access to an online version. Single issues cost €204/£142 (USA, Canada and Mexico US\$261) plus postage.

Orders, which must be accompanied by payment, may be sent to any bookseller or subscription agent, or direct to Cambridge University Press at the UK address above, or in the USA, Canada or Mexico to Journals Fulfillment Department, 100 Brook Hill Drive, West Nyack, NY 10994-2133, USA. EU subscribers (outside the UK) who are not registered for VAT should add VAT at their country's rate. VAT-registered subscribers should provide their VAT registration number. Japanese prices for institutions are available from Kinokuniya Company Ltd, PO Box 55, Chitose, Tokyo 156, Japan.

All rights reserved; no part of this publication may be reproduced, stored in a retrieval system, or transmitted in any form or by any means, electronic, mechanical, photocopying, recording or otherwise, without the prior written permission of the Publishers or a licence permitting restricted copying in the UK by the Copyright Licensing Agency Ltd, 90 Tottenham Court Road, London W1P 9HE, or in the USA by the Copyright Clearance Center Inc., 222 Rosewood Drive, Danvers, MA 01923. Organisations in the USA that are also registered with the C.C.C. may copy material (beyond the limits permitted by sections 107 and 108 of U.S. copyright law) subject to payment to C.C.C. of the per-copy fee of \$16.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0010-437X/08 \$16.00.

Individual readers of this publication, and non-profit libraries acting for them, are permitted to make fair use of the material, such as to make a single copy of one article for use in teaching or research. Permission is also granted to quote brief passages from this publication in reviews, provided that the customary acknowledgement of the source is given.

COMPOSITIO MATHEMATICA

VOLUME 146 NUMBER 2 FEBRUARY 2010

D. R. Heath-Brown Zeros of systems of p -adic quadratic forms	271–287
Mark Green, Phillip Griffiths and Matt Kerr Néron models and limits of Abel–Jacobi mappings	288–366
Pascal Boyer Conjecture de monodromie-poids pour quelques variétés de Shimura unitaires	367–403
V. Gritsenko, K. Hulek and G. K. Sankaran Moduli spaces of irreducible symplectic manifolds	404–434
Roya Beheshti and David Eisenbud Fibers of generic projections	435–456
Philippe Gille and Nikita Semenov Zero-cycles on projective varieties and the norm principle	457–464
Daniel C. Cohen Cohomology rings of almost-direct products of free groups	465–479
Roman Bezrukavnikov and Leonid Positselski On semi-infinite cohomology of finite-dimensional graded algebras	480–496
Jun-Muk Hwang and Eckart Viehweg Characteristic foliation on a hypersurface of general type in a projective symplectic manifold	497–506
Uwe Semmelmann and Gregor Weingart The Weitzenböck machine	507–540
