

ACKNOWLEDGEMENTS

Symposium No. 108 was sponsored by six commissions of the IAU: 28 (Galaxies), 29 (Stellar Spectra), 34 (Interstellar Matter), 37 (Star Clusters and Associations), 44 (Astronomy from Space), and 45 (Stellar Classification). The Scientific Organising Committee consisted of S. van den Bergh (Chairman), I.J. Danziger, J. Einasto, M.W. Feast, J. Graham, P.W. Hodge, K. Kodaira, J. Lequeux, D.S. Mathewson, M. Peimbert, T. Schmidt-Kaler, and B.E. Westerlund.

The meeting was held in the physics complex "Auf der Morgenstelle" of the Universität Tübingen. The Local Organising Committee consisted of K.S. de Boer (Chairman), M. Grewing and G. Krämer. We thank all those who helped in the running of this conference, in particular R.H. Vos for the organisation of the conference secretariat and her help in preparing the index for the proceedings. The Deutsche Forschungsgemeinschaft and the IAU provided substantial financial support for this meeting, which was vital since it enabled us to invite speakers from both Southern and Northern hemispheres to present reviews.
