Calendar of Meetings

1993

20–24 September

ICOTOM 10—Tenth International Conference on Textures of Materials, Clausthal, Germany. The conference will address all problems related to crystal orientation in polycrystalline materials of any kind, (e.g., in materials sciences, earth sciences, etc.). Topics to be covered include: Determination of pole figures and individual orientation analysis; Calculation and representation of ODF, MODF and other textural quantities; Experimental studies of texture formation: Texture and directional properties of materials; Mathematical modelling of texture formation and materials properties; Technical applications of texture studies. Although the conference will deal with classical basic metals, particular emphasis will be put on “new materials” such as intermetallics, ceramics, polymers, and composites, including natural materials such as geological and biological ones. Pre- and post-conference workshops will be held on ODF Calculation, Neutron texture analysis and Microscale textures.
