# SIEMENS

## Is your diffraction system as flexible as you are?

When the only thing you can count on in your lab is change, don't lock yourself in with a system designed to handle only some of your powder diffraction applications. If what you really need is flexibility, your options are open with the Siemens D 5000 X-ray diffractometer.

The modular D 5000 offers superior accuracy and speed with the most flexible and easy-to-learn software available worldwide. Most accessories can be installed or removed in minutes.

If flexibility is what you need,  
**Siemens delivers satisfaction.**

*Raw data, full pattern phase analysis within the EVA2 graphics program.*

*Flexible 3-D texture analysis software includes polefigure and constant phi displays.*

*Complete calculation of the full residual stress tensor using uniaxial, biaxial or triaxial stress calculations.*

*Orientation distribution function (ODF) evaluation software provides complete analysis of texture effects.*

Worldwide contact: Siemens AG, Analytical Systems AUT V 371 • P.O. Box 21 1262 • D 7500 Karlsruhe 21 • Germany • (0721) 595-4295

## Look into $\mu$ PDSM . . . It's more than accuracy. It's performance.

Performance makes  $\mu$ PDSM the one search/match software system that approaches universality. It's the result of many years of research into putting all the complexities of qualitative XRD analysis in a single system for your personal computer—and now we've added graphics with a power that matches the unparalleled performance that established  $\mu$ PDSM's reputation.

The utility of function and clarity of content in  $\mu$ PDSM's graphics go beyond merely attractive presentation, to give you a valuable addition to the analytic power  $\mu$ PDSM puts at your finger tips. With options that include fully integrated CD-ROM PDF-2 retrieval, direct instrument control, data acquisition, and diffractogram analysis,  $\mu$ PDSM

gives you a flexibility of application to match the power of its performance.

The universal applicability and continuing enhancement of  $\mu$ PDSM reflect the evolving technology of a company dedicated to software innovation. And you realize the results of Fein-Marquart's commitment to progress through a continuing update policy that keeps you at the state of the art.

Look into  $\mu$ PDSM. It takes you beyond accuracy into the next generation of search/match performance.

A1

The Third Edition of the SPEX Handbook answers questions about **Producing** homogeneous powders **Making** pressed or fused pellets **Controlling** contamination **Eliminating** particle size effects **Handling** liquid samples **Selecting** and ordering products

# We'll Help You Get A Handle On Your Sample

The SPEX Handbook includes:

Open-Vessel Microwave Digestion System

Automated 35-ton Hydraulic X-Press

Automated SPEX-Claire Fusion Fluxers

Cryogenic Laboratory Mill

Graphite Crucibles For Fusion

XRF Liquid Cells and Window Films

Boron Carbide Mortars and Pestles

Manual and Motorized Laboratory Presses

Evacuatable Pellet Dies and Spec-Caps

Graphite Crucibles for Fusions  Nylon Sieve Sets

Shatterboxes, Mixer/Mills . . . AND MORE!

**AIP Production:** Lin Miller, *Editorial Supervisor*;  
Andrea Witt, *Journal Coordinator*;  
Christine Joyce, *Senior Production Editor*

*Powder Diffraction* is a quarterly journal published for the JCPDS-International Centre for Diffraction Data by the American Institute of Physics (AIP). *Powder Diffraction* is a journal of practical technique, publishing articles relating to the widest range of application—from mineral analysis to epitaxial growth of thin films and to the latest advances in software. Although practice will be emphasized, theory will not be neglected, especially as its discussion will relate to better understanding of technique.

**Submit manuscripts** (3 copies) to the most appropriate *Powder Diffraction* Editor listed on this page. The Editors will consider all manuscripts received, but assume no responsibility regarding them. Materials will be returned only when accompanied by appropriate postage. There is no publication charge. See *Powder Diffraction Notes for Authors* for additional information.

**Proofs and all correspondence** concerning papers in the process of publication should be addressed to: Editorial Supervisor, Powder Diffraction, AIP, 500 Sunnyside Blvd., Woodbury, NY 11797-2999.

**For advertising rates** and schedules contact AIP Advertising Department. Orders, advertising copy, and offset negatives should be sent to: AIP Advertising Department, 335 East 45th Street, New York, NY 10017-3483, (212) 661-9404 x361.

**Subscription Prices (1993)**

	U.S.A & Canada	Mexico, Central & South America	Europe, Mid-East & Africa*	Asia & Oceania*
Individual	\$55	\$75	\$75	\$75
Institutional or Library	\$95	\$95	\$95	\$95

\*Subscription rates to Eastern Hemisphere include air freight service.

**Back-Number Prices.** 1993 single copies: \$30. Prior to 1993 single copies: \$30.

**Subscription, renewals, and address changes** should be addressed to *AIP Member and Subscriber Services*, 500 Sunnyside Blvd., Woodbury, NY 11797-2999. Allow at least six weeks advance notice. For address changes please send both old and new addresses and, if possible, include a mailing label from the wrapper of a recent issue.

**Claims, Single Copy Replacement and Back Volumes:** Missing issue requests will be honored only if received within six months of publication date (nine months for Australia and Asia). Single copies of a journal may be ordered and back volumes are available in print or microform. Individual subscribers please contact AIP Member Services at (516) 576-2288; (800) 344-6901. Institutional or library subscribers please contact AIP Subscriber Services at (516) 576-2270; (800) 344-6902.

**Reprint Billing:** Contact: AIP, 500 Sunnyside Blvd., Woodbury, NY 11797-2999, Attn: Reprint Billing; (516) 576-2234; (800) 576-6909.

**Copyright Notice:** Authorization to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by AIP, provided that the appropriate fee per page is paid directly to the *Copyright Clearance Center (CCC)*, 27 Congress Street, Salem, MA 01970.

The item-fee code for this publication is 0885-7156/93 \$06.00.

**Permission For Other Use:** Individual teachers, students, researchers, and libraries acting for them are permitted to make copies of articles in this journal for their own use in research or teaching, including multiple copies for classroom or library reserve use, provided such copies are not sold. Copying for sale is subject to payment of copying fees. Permission is granted to quote from the journal with the customary acknowledgment of the source. To reprint a figure, table, or other excerpt requires in addition the consent of one of the original authors and notification to AIP. Reproduction for advertising or promotional purposes, or republication in any form, is permitted only under license from AIP, which will normally require that the permission of one of the authors also be obtained. Direct inquiries to: AIP Office of Rights and Permissions, 500 Sunnyside Blvd., Woodbury, NY 11797-2999.

**Document Delivery:** Copies of individual articles may be obtained at \$15 per article for Institutions and \$12 per article for Individuals (postage included). Airmail and fax service are also available. Contact: AIP Member and Subscriber Services, 500 Sunnyside Blvd., Woodbury, NY 11797-2999; phone: (516) 576-2277; (800) 344-6908; fax: (516) 394-9704; E-mail: elecpub@pinet.aip.org.

*Powder Diffraction* (ISSN: 0885-7156) is published quarterly (4X annually) by the American Institute of Physics for the JCPDS-International Centre for Diffraction Data, 500 Sunnyside Blvd., Woodbury, NY 11797-2999. JCPDS-ICDD principal office: 12 Campus Blvd., Newtown Square, PA 19073-3273. POSTMASTER: Send address changes to *Powder Diffraction*, American Institute of Physics, 500 Sunnyside Blvd., Woodbury, NY 11797-2999. Application to mail at second class rates is pending at Woodbury, NY and additional mailing offices.

# We're Dedicated to Powder X-ray Diffraction

XDS

## Powder X-ray diffraction is our specialty. In fact, it's all we do.

That's why we can deliver all those technological advances others only promise, including the largest selection of software in the industry. It's also why Scintag users enjoy the kind of after-the-sale support that helps them realize substantial returns on their investment, year after year. When it comes to powder X-ray diffraction technology, Scintag stands at the forefront with:

- **Highest resolution powder diffractometers**
- **Controlled-temperature XRD**
- **Controlled-atmosphere XRD**
- **Multi-user, multi-tasking operation**
- **Solid-state detectors**

### SCINTAG, Inc.

707 Kifer Road  
Sunnyvale, CA 94086  
Tel. (408) 737-7200  
Fax (408) 737-9841

So, for the latest innovations in powder diffraction, there's really only one choice: Scintag. But don't take our word for it. Contact us today for our full-color brochure and a complete system demonstration, and judge for yourself.

# Physics Academic Software

## MATHPLOT

James H. McCrary – New Mexico State University

MATHPLOT helps students, scientists, and engineers analyze numerical data. It can fit least-squares polynomials, calculate simple statistical parameters, and numerically integrate under a curve. In addition, it plots and calculates Fourier spectra and Bessel functions. The program also solves up to 12 simultaneous equations and inverts matrices of order up to 12. Results are displayed both numerically and graphically. The program is menu-driven, so you do not need to remember a list of commands.

For the IBM PC. A math coprocessor is highly recommended. A graphics-capable printer is useful.

**\$49<sup>95</sup>**

\$39.95 for members of AIP-member societies, \$149.95 for a Lab Pack (10 copies).

In a graphical display under the Fourier Series menu, the data points appear as circles and a fitted Fourier series of order ten is plotted as a dotted curve.

*A software product of AIP in cooperation with APS and AAPT*

```
Main Menu      12:34 pm
-- MATHPLOT --
Select from the following options:
1 - Data Plot
2 - Statistics
3 - Least Squares
4 - Function Plot
5 - Fourier series
6 - Numerical integration
7 - Simultaneous Equations
8 - Matrix Inversion
9 - Bessel Functions
0 - Data files
ESC - Exit
```

Nine different programs help you analyze data sets and fit corresponding mathematical functions to those sets. Options include numerical techniques such as matrix inversion and statistics.

A tutorial helps to familiarize you with program options. Shown here is a graph of a third-order polynomial fitted to sample data from an exercise in the least squares option.

“A useful utility for the undergraduate physics laboratory and elementary numerical analysis.”

Ronald Stoner, Bowling Green State University

“A worthwhile program. One of the first that a physics student should have.”

Bruce C. Huguélet, San Antonio College

# ThetaPlus<sup>®</sup>

*Rebuild! Upgrade! Modernize!*

## A New Generation in X-ray Diffraction

### Precise X-ray diffractometer automation:

- Search/Match incorporates  MacPDF<sup>™</sup> for JCPDS database CD-ROM access.
- X-Mate controller provides true background acquisition.
- Custom Microstep driver gives smooth, reproducible two-theta movement.
- Convenient user interface employs the enhanced graphics expected from the Macintosh II.

**Is your present system automated but outdated?**

**ThetaPlus augments your diffractometer in two ways:**

- **Upgrade** to our Microstep drive to increase two-theta resolution up to ten-fold without changing the existing stepping motor -OR-
- **Replace** only the outmoded computer and software by communicating directly with the existing motor controller.

## We make your instruments perform!

# The source of XRD excellence

Philips pioneered the design of the modern x-ray diffraction tube. We set the original standards, and we continue to set the pace in innovation and performance.

Today, you can choose from a comprehensive range of sources to meet virtually any application need. Top quality tubes that will help you achieve better results — even if you're not using a Philips diffractometer.

Seven anode types — Cu, W, Mo, Co, Fe, Cr and Ag — are available as standard, in four different focal versions. And you can specify other anodes or special thin-window executions, to meet your precise application needs.

Count on the assurance of a 2500-hour guarantee for all tubes — plus super-fast delivery by the worldwide Philips organisation.

# PHILIPS

# “The Grand Event of the Year...”

## *New Methods of Celestial Mechanics*

An English translation of

*Les Méthodes nouvelles*

*de la Mécanique céleste*

by *Henri Poincaré*

With a new introduction by

*Daniel Goroff,*

*Harvard University*

*Vol. 13, History of Modern*

*Physics and Astronomy*

*1993, 1600 pages (3 vols.),*

*illustrated*

*ISBN 1-56396-117-2,*

*cloth, \$195.00*

THE “GRAND EVENT” ANNOUNCED in the 1900 Annual Report of the Royal Astronomical Society of London was the publication of the third volume of *Les Méthodes nouvelles de la Mécanique céleste* by French mathematician Henri Poincaré (1854–1912). Now, nearly 100 years later, you can own your own three-volume set, featuring more than 100 pages of introduction by Daniel L. Goroff of Harvard University.

This new AIP edition represents an extensive revision of the celebrated NASA-commissioned translation of the 1960s. Mathematical formulas have been meticulously checked and the translation has been reviewed to ensure that the true spirit of Poincaré’s revolutionary ideas are conveyed with clarity.

REDISCOVER THE FOUNDATIONS OF CHAOS AND MODERN DYNAMICAL SYSTEMS THEORY

Poincaré’s work was so profoundly original—and its implications so far-reaching—that it forced a reexamination of the very foundations of celestial mechanics. In 1900 Sir George H. Darwin said of *Les Méthodes nouvelles*, “It is probable that for a half a century to come it will be the mine from which humbler investigators will excavate their materials.”

Today, on the hundredth anniversary of the publication of Volume I, Poincaré’s concepts are at the core of chaos and modern dynamical systems theory. Topological dynamics, ergodic theory, and symplectic geometry all owe a debt to Poincaré’s pioneering methods.

# Introducing TXRD 3.5

## The Tasker Applications X-Ray Diffraction Data Acquisition Platform

TXRD 3.5 brings you low cost semi-automation of manual diffractometers, but as a fully integrated analysis platform for the PC, you'll find it to be much more. All of your x-ray diffraction pattern analysis needs are a mouse click away with a simple-to-use menu-driven environment.

Through an intelligently designed user-interface, DOS is invisible to the user. And by packing sophisticated peak location and area measurement functions together with pattern conditioning routines, the basic platform may be all you'll ever need. Additional fully integrated modules provide search/match access to the JCPDS database, Rietveld analysis, cell refinement, profile refinement, and much more.

With the expert personalized service provided by Tasker Applications, TXRD 3.5 can be customized to provide for your special needs.

## Continents in Motion

*Second Edition*

Walter Sullivan, former science editor for  
*The New York Times*

An absorbing and highly readable history of the idea of continental drift—a concept that revolutionized our understanding of geology. Sullivan traces its tentative beginnings in the 19th century and its promulgation by Wegener in the 1920s to the accumulation of overwhelming evidence in the '60s. This second edition is extensively updated to reflect our current understanding of the basic geophysics underlying continental drift. Written at a slightly more technical level than an average *Times* science story, *Continents in Motion* will appeal to all general science readers.

# A Tour of the Subatomic Zoo

A Guide to Particle Physics  
Cindy Schwarz, Vassar College

“Fills a vast gap in the literature.... With hardly a mathematical formula, Ms. Schwarz clearly explains the language and much more of the substance of elementary particle physics.”  
—from the Introduction by Sheldon Glashow

If your students' (or your) understanding of fundamental particles is confined to the electron, proton, and neutron, take heart. Here is a book that guides readers through the subatomic “zoo,” populated by some of the most dramatic discoveries of modern science—notably, quarks, leptons, and the basic forces that govern their interactions. Most important, this tour is conducted in easily understood terms—even for readers who have no prior particle physics background.

Each chapter begins with an overview of concepts and terms and ends with a summary section and self-tests to help you gauge just how much your students have learned.

If you've never been exposed to high energy physics, have forgotten what you once knew, or have simply not kept current—*A Tour of the Subatomic Zoo* will bring you and your students right up to date on developments that are continually refining our picture of matter and energy.

1992, 128 pages, illustrated  
ISBN 0-88318-954-2, paper

# A Physicist's Desk Reference

The Second Edition of **Physics Vade Mecum**

HERBERT L. ANDERSON *Editor in Chief*

An updated and expanded edition of the bestselling *Physics Vade Mecum*, **A Physicist's Desk Reference** is a compact, comprehensive storehouse of the most useful information, formulas, numerical data, definitions, and references grouped by discipline. Designed for quick and easy access to data with minimal searching, it saves time and effort in solving a wide range of scientific and technical problems.

This new edition features added material, such as new information on high  $T_c$  superconductivity, and major revisions in the chapters on energy, elementary particles, and surface physics. The general section on physical restraints and recommended symbols offers more complete information on fundamental constants, the SI units and prefixes, conversion factors, magnitudes, basic mathematical and physics formulas, and formulas useful in practical applications. This section now includes a complete listing of physics data centers. The recompiled index is more than twice the size of the original and affords even more efficient use of this quick-reference tool.

356 pages ■ 8 1/4" x 11 1/4" ■ LC 89-15201

**Hardcover:** ISBN 0-88318-629-2 ■ Price \$70.00 list price/\$56.00 members

**Softcover:** ISBN 0-88318-610-1 ■ Price \$45.00 list price/\$36.00 members

## Contents

General Section, **H. L. Anderson, E.R. Cohen** ■ Acoustics, **R. B. Lindsay, R. T. Beyer** ■ Astronomy and Astrophysics, **L. W. Fredrick** ■ Atomic Collision Properties, **C. F. Barnett** ■ Atomic Spectroscopy, **W. L. Wiese, G. A. Martin** ■ Biological Physics, **H. Frauenfelder, M. C. Marden** ■ Cryogenics, **R. J. Donnelly** ■ Crystallography, **G. A. Jeffrey** ■ Elementary Particles, **T. G. Trippe** ■ Energy Demand, **A. H. Rosenfeld, A. K. Meier, R. J. Mowris** ■ Energy Supply, **H. A. Bethe, D. Bodansky** ■ Fluid Dynamics, **R. J. Donnelly** ■ High Polymer Physics, **R. K. Eby** ■ Medical Physics, **T. N. Padikal** ■ Molecular Spectroscopy and Structure, **M. D. Harmony** ■ Nuclear Physics, **J. K. Tuli** ■ Optics, **J. N. Howard** ■ Plasma Physics, **D. L. Book** ■ Rheology, **H. Markovitz** ■ Solid State Physics, **H. P. R. Frederikse** ■ Surface Physics, **H. D. Hagstrum** ■ Thermophysics, **Y. S. Touloukian**
