JOURNAL of PALEONTOLOGY

VOL 98 | NO 6 | NOVEMBER 2024

REGULAR ARTICLES

- 929 **Bruce Runnegar, Robert J. Horodyski, James G. Gehling, Sören Jensen, Stefan Bengtson, Kevin J. Peterson, Matthew R. Saltzman and Michael J. Vendrasco**
Tulaneia amabilia n. gen. n. sp.: a new erniettomorph from the Wood Canyon Formation, Nevada and the age of the Ediacaran–Cambrian transition in the Great Basin
- 952 **Samuel Zamora, Thomas E. Guensburg and James Sprinkle**
Redescription of the Cambrian edrioasteroid *Sprinkleoglobus spencensis* n. comb. (Wen et al., 2019) from the Spence Shale (Utah, USA)
- 959 **Marcus M. Key, Jr., Eckart Håkansson and Benjamin R. Edwards**
Functional controls on monticule height and spacing in Permian stenolaemate bryozoans
- 973 **Débora Iturra, Juan López-Gappa and Leandro Martín Pérez**
The family Dysnoetoporidae (Bryozoa: Cheilostomatida) did not become extinct in the Late Cretaceous: a new genus from the Miocene of Patagonia (Argentina)
- 981 **Wenjie Li, Xiang Fang, Jiaqi Song and Yuandong Zhang**
Pterotheca (Gastropoda) from the Telychian (Silurian) Xiushan Formation of South China: taxonomy, paleoecology, and paleogeography
- 996 **Stefano Dominici, Maurizio Forli, Mauro M. Brunetti and Marco Taviani**
Fossil abalones of Europe and their relationships with modern *Haliotis* (Haliotidae, Gastropoda): a multivariate analysis
- 1028 **Julia Criscione-Vastano and David Grimaldi**
New hemipteran insects (Hylcellidae, Heteroptera) from the Triassic Cow Branch Formation of Virginia and North Carolina, USA
- 1041 **Diyang Huang, Xinneng Lian and André Nel**
A new damselfly family from the Paleocene of the Sanshui Basin, South China (Odonata, Zygoptera)
- 1048 **S. Bruce Archibald, James E. Evans, Rolf W. Mathewes and Robert A. Cannings**
The early Eocene *Swauka ypresiana* n. gen. n. sp., the oldest gossamerwing damselfly (Odonata, Epallagidae, Epallaginae) and first fossil insect described from the Swauk Formation of central Washington, U.S.A.
- 1053 **James G. Saulsbury, Tomasz K. Baumiller and James T. Sprinkle**
New comatulid crinoids from the Early Cretaceous Glen Rose Formation (Texas, USA): paleobiology and evolutionary relationships of an endemic, ephemeral giant
- 1066 **Théo Delemer and Samuel Zamora**
Systematics, diversity and paleoecology of cyrtocrinids (Crinoidea, Echinodermata) from the Oxfordian sponge meadows of northeast Spain (Tosos, Zaragoza)
- 1087 **John-Paul M. Hodnett, H. Chase Egli, Rickard Toomey, Rickard Olson, Kelli Tolleson, Richard Boldon, Justin S. Tweet and Vincent L. Santucci**
Obruchevodid petalodonts (Chondrichthyes, Petalodontiformes, Obruchevodidae) from the Middle Mississippian (Viséan) Joppa Member of the Ste. Genevieve Formation at Mammoth Cave National Park, Kentucky U.S.A.
- 1098 **Olivia Devereaux, Matthew C. Herne, Nicolás E. Campione and Phil R. Bell**
Paleoneurology of the iguanodontian *Fostoria dhimbangunmal* from the mid-Cretaceous of Australia

Taxonomic Note

- 1107 **Marc Furió, Shubham Pal, Pedro Piñero and Jordi Agustí**
Sivatupaia ramnagarensis and the origin of the subfamily Crocidurinae (Soricidae, Mammalia)

Cover illustration: *Shundeagrion cheni* n. gen. n. sp., holotype SDM2024004001, general habitus.
