Executive Secretary: M. W. Richey

The Journal of the Institute of Navigation

THE *Journal* is published quarterly by the Institute and is edited by M. W. RICHEY. It contains original papers contributing to the science of navigation, including those presented at meetings of the Institute together with the ensuing discussion. In addition the *Journal* includes a record of current navigational work, reviews of important books, and other matters of concern to those interested in navigation. The views expressed in the *Journal* are not necessarily those of the Institute, or of any organization or department to which the authors may belong.

The *Journal* is free to all members of the Institute. It is sold to the public at fifteen shillings per copy or, by subscription, at sixty-two shillings per annum (post free) and may be obtained through all booksellers and John Murray (Publishers) Ltd., 50 Albemarle Street, London W1.

Contributions, which are welcomed from both members and non-members, should be addressed to the Editor.

Enquiries for advertising space should be addressed to the Institute offices.

The postal address of the Institute is:

The Institute of Navigation,
at The Royal Geographical Society,
1 Kensington Gore, London SW7.

Telephone: Kensington 5021

Form of application for membership

Name in full (including title)
(Please use block letters)

Permanent Address

Class of membership for which you wish to be considered

Branch of navigation or related science in which you have particular interest

Profession or Occupation

Professional and/or Academic qualifications

Summary of experience

Date of Birth

“ If accepted for membership of the Institute of Navigation, I hereby agree to abide by its Constitution and By-Laws and to advance the objects of the Institute as far as shall be in my power.”

Date

Signature
(See note below)

Note.—In the case of applications for Student Membership this form should be countersigned by the Principal of the Educational Establishment at which the applicant is studying.

Copies of this form can be obtained from the Executive Secretary.

THE INSTITUTE OF NAVIGATION

THE OBJECT of the Institute is to unite in one body those who are concerned with or who are interested in the science and art of navigation. Membership is not restricted to those who hold professional qualifications, but is open to others who wish to further the aims of the Institute.

By coordinating the knowledge and achievements of marine and air navigators, scientists and those associated with the development and production of navigational equipment, the work of the Institute is directed towards raising the standard of navigation. In the field of education it is the aim of the Institute to bring practical navigators into contact with teachers and research workers to increase a common appreciation of the issues involved. It is an object of the Institute to encourage research in equipment and methods; through its publications it gives a wide circulation to original work on navigation so that new developments and suggestions can be appreciated by those most directly concerned with them.

The activities of the Institute include the holding of monthly meetings to discuss specific problems, the publication of a Journal and of other works concerned with different aspects of navigation, and such other activities as the Council may deem necessary to promote knowledge in navigation and its associated sciences.

The Journal of the Institute of Navigation is issued free each quarter to all members and contains a full account of the Institute's proceedings. It prints the papers which are presented at meetings, together with their ensuing discussion, and other original papers contributing to the science of navigation. It also contains a record of current navigational work, reviews of important books, and general papers of interest to navigators and those with similar interests.

The work of the Institute is coordinated with that of similar societies abroad, and in particular with the work of the United States and Commonwealth Institutes of Navigation, whose proceedings are available to members.

Membership. There are five classes of membership of the Institute:

(1) **HONORARY MEMBERS**, who shall be distinguished persons upon whom the Council may see fit to confer an honorary distinction.

(2) **FELLOWS**, who shall be members, of at least three years' standing who, in the opinion of the Council, have made a contribution of value to navigation.

(3) **MEMBERS**, who shall be persons over twenty-one years of age who can satisfy the Council of their interest in navigation.

(4) **STUDENT MEMBERS**, who shall be persons under twenty-five years of age studying with a view to making navigation, or an allied interest, their career.

(5) **CORPORATE MEMBERS**, who shall be companies, universities, navigation schools, government departments and other organizations, here and abroad, who are directly or indirectly interested in the science of navigation. Corporate Members are entitled to send representatives to all Institute meetings and to receive six copies of the *Journal*, and other publications. They are encouraged to take an active part in the Institute's work. Application should be by letter addressed to the Executive Secretary.

Subscriptions. Annual subscriptions to the Institute are payable in advance as follows:

Members and Fellows	Three guineas
Student Members	Half a guinea
Corporate Members	Thirty guineas

The Institute's financial year begins on 1 July. Members in any category who are elected after 1 January in any year are only due for one half of their subscription until 1 July, when the full subscription for the next year becomes due.

NEW ANTI-COLLISION RADAR SYSTEM

Decca introduce the world's first fully co-ordinated system of simultaneous true and relative motion radar presentation

the Decca Marine Radar system type 969/ ARP

COMPRISING Decca True Motion TM 969 in combination with the new Automatic Relative Plotter Type 50.

PROVIDING High speed automatic plotting from the radar to give simultaneous true and relative motion presentation.

With this system, immediate and automatic transfer of range and bearing information from radar to plotter enables a single officer of the watch instantly and accurately :

- 1 to determine positively the existence of collision risk from any ships within radar range.
- 2 to predict the effect of any proposed change of course or speed before such alteration is made.

A brochure describing the unique Decca Marine Radar System is available on application to :

Navigation Rangefinders

Barr & Stroud manufacture many types of portable, self-contained, instruments. The operator reads distances directly from a scale calibrated in yards, metres or other units.

Type F.T. 37 (Illustrated)

Can be supplied with base lengths of 80 cm. or 1 metre. Standard instruments cover the range 250 to 10,000 yards or metres, and are supplied with belt, rail or deck mountings.

For further details please write for pamphlet 1048/J.

Type F.P. 13

An extremely compact 8 in. base instrument with a range of 10 to 1,000 yards or metres.

For further details please write for pamphlet 1324/J.

INTRODUCING

THE DECCA NAVIGATOR MARK 12
INCORPORATING
MULTIPULSE

The Mark 12 Decca Navigator Marine Receiver offers improved performance and new techniques of position fixing at the longer ranges. These advantages are derived through the introduction of "multipulse" transmissions from the Decca stations.

An additional model in the Decca range.

new in
navigational
aids here!*

... And it warrants your careful examination

If you have not already received information about AEI's NEW RADARS—this new leaflet No. 4321-81 describes them . . . And a note to the address below will bring you a copy by return. The AEI ESCORT RADAR 600 series is a really advanced, integrated range of high quality equipment, employing interchangeable basic units . . . A range of models enabling fleet-operators to meet individual vessels' needs . . . An equipment range giving important benefits to the navigator, too, for all models provide 'Chart Plan' presentation and the many other advanced AEI ESCORT radar features.

THE MASTER AND HIS SHIP

by

Charles H. Cotter, B.Sc., Ex.C., M.I.N.

Of particular value to those studying for First Mate's and Master's Certificates. The book deals thoroughly with those vital problems affecting the running and safety of a vessel, including mechanics and its application to seamanship, the ship's equipment, the principle of ship handling, anchor work, the ship in rough sea, fires in ships, collisions, dry docking and grounding, abandoning ship and survival in boats.

9½ × 6 inches. 256 pages, with 49 line illustrations. 27s. 6d.

THE INTERNATIONAL HYDROGRAPHIC BUREAU

Quai des Etats-Unis, MONACO

publishes

twice a year, in January and July,
an English and French edition of

THE INTERNATIONAL HYDROGRAPHIC REVIEW

This publication contains articles of topical interest on hydrography, hydrographic surveying and related techniques.

Each volume contains an average of 160 pages, 18 × 27 cm., and numerous illustrations.

Price per number \$5 (U.S.) excluding postage.

Orders should be sent direct to the Bureau's Headquarters in Monaco, but payments can be made to the Bureau's account at Barclays Bank Ltd., Chief Foreign Branch, 168 Fenchurch Street, London, E.C.3.

A reduction of 30% on the price quoted is allowed to booksellers. The same reduction is granted to government offices and to naval or merchant marine officers of the Bureau's States Members, provided the order is sent direct to the Bureau.

WORLD AVIATION ELECTRONICS

AND CONTROLS

The application of electronic engineering techniques to the solution of aviation problems is one of the most interesting and important branches of electronic technology. *WORLD AVIATION ELECTRONICS and CONTROLS* is a monthly journal devoted to reporting progress in this and allied fields, and to commenting on the political, economic and philosophical problems which are associated with the technical developments.

common...?

The name of **KELVIN HUGHES** is a link between the 18th century *HMS Bounty* and the minesweeper of today. Early records of **KELVIN HUGHES** refer to the sale of navigational instruments to Captain Bligh of the *Bounty* in 1780. Now, the Admiralty has adopted **KELVIN HUGHES** Unit Radar Type 14/12 for use in smaller ships of the Royal Navy. Versatility, high performance and reliability are outstanding features of the **KELVIN HUGHES** Unit Radar system, which can be adapted to the operational needs of all vessels, large or small.
