

# THE VIRUS

*Life's Enemy*

By **KENNETH SMITH**

*20 Illustrations. 8s. 6d. net*

This, the third volume in The Cambridge Library of Modern Science, deals with a subject of which little was known or imagined until very recent times, but which may yet prove to be of paramount biological, economic, and philosophical importance. It has all the interest of stories of man's courageous and imaginative research, with the added importance that a proper understanding of virus diseases and viruses is essential for the future well-being of mankind.

THE FABRICIAN TYPES OF INSECTS IN  
THE HUNTERIAN COLLECTION, VOLUME II

## COLEOPTERA

By **ROBERT A. STAIG**

*31 plates in colour*

*27s. 6d. net*

(Glasgow University Publication)

This volume continues Dr Staig's systematic description and illustration of Hunter's collection of insects, made about 160 years ago and then classified by Fabricius, which was part of Hunter's bequest to Glasgow. The first volume was published in 1931 and began the description of Coleoptera, which this volume continues.

	PAGE
FONSECA, F., CAMBOURNAC, F. J. C., PINTO, M. R., PEREIRA, J. M. and CUNHA, A. Studies on the exo-erythrocytic cycle of malaria. (With Plate III)	114
WILSON, S. G. Seasonal occurrence of Ixodidae on cattle in Northern Province, Nyasaland. (With 2 Figures in the Text)	118
SMITH, KENNETH M. Tomato black-ring: a new virus disease. (With Plates IV and V)	126
SMITH, KENNETH M. The transmission of a plant virus complex by aphides	131
ROONWAL, M. L. and NATARAJ, S. On two species of sucking lice (Anoplura, Haematopinidae) from the common North Indian five-striped squirrel ( <i>Funambulus pennanti pennanti</i> Wr.). (With 1 Figure in Text)	135
WATSON, J. M. Studies on the morphology and bionomics of a little-known holotrichous ciliate— <i>Balantiophorus minutus</i> Schew. Part III. Coprophilic habits and the effect of urine	138
ARTHUR, D. R. and EDWARDS, E. E. A note on an unusual male tick from Glamorgan. (With 6 Figures in the Text)	152
ARTHUR, D. R. The feeding mechanism of <i>Ixodes ricinus</i> L. (With 15 Figures in the Text)	154
REES, GWENDOLEN. The anatomy of <i>Phyllobothrium dohrnii</i> (Oerley) from <i>Hexanchus griseus</i> (Gmelin). (With 20 Figures in the Text)	163
LEES, A. D. Chloride regulation and the function of the coxal glands in ticks. (With 10 Figures in the Text)	172
BATHAM, E. J. Testing arecoline hydrobromide as an anthelmintic for hydatid worms in dogs. (With 4 Figures in the Text)	185
SPRENT, J. F. A. Studies on the life-history of <i>Bunostomum phlebotomum</i> (Railliet, 1900), a hookworm parasite of cattle. (With 26 Figures in the Text)	192
SPRENT, J. F. A. Some observations on the bionomics of <i>Bunostomum phlebotomum</i> , a hookworm of cattle. (With 2 Figures in the Text)	202
INDEX OF AUTHORS	211
INDEX OF SUBJECTS	212

*PARASITOLOGY* is published about four times a year. The numbers afterwards are issued in volumes each containing four numbers.

Papers for publication should be sent to Professor D. KEELIN, Molteno Institute, Downing Street, Cambridge. Other communications should be addressed to the University Press, Cambridge.

Papers forwarded to the Editors for publication are understood to be offered to *PARASITOLOGY* alone, unless the contrary is stated.

Contributors receive twenty-five copies of their papers free. Additional copies, not exceeding twenty-five (except in special cases), may be had at cost price: these should be ordered when the final proof is returned.

The subscription price is £2. 15s. per volume (post-free), payable in advance; single numbers 18s. 6d. net (double number 37s. net). Subscriptions may be sent to any Bookseller, or to The Cambridge University Press, Bentley House, 200 Euston Road, N.W. 1.

The Cambridge University Press has appointed the University of Chicago Press agent for the sale of *Parasitology* in the United States of America.
