ENTERED AT STATIONERS' HALL.

THE JOURNAL OF LARYNGOLOGY, RHINOLOGY, AND OTOLOGY.

Founded in 1887 by MORELL MACKENZIE and NORRIS WOLFENDEN.

EDITED BY

R. NORRIS WOLFENDEN, M.D. *Cantab.*,
JOHN MACINTYRE, M.B. *Glasgow*,
DUNDAS GRANT, M.A., M.D., F.R.C.S. *Eng.*,

WITH THE ASSISTANCE OF

DR. SANDFORD (*Cork*), DR. MILLIGAN (*Manchester*),

AND WITH THE CO-OPERATION OF

DRS. BARON (*Bristol*), R. BOTEY (*Barcelona*),
CARTAZ (*Paris*), BRYSON DELAVAN (*New York*),
DRAISPUL (*St. Petersburg*), GRAZZI (*Florence*), GUYE (*Amsterdam*),
HICQUET (*Brussels*), MIDDLEMASS HUNT (*Liverpool*),
VALERIUS IDELSON (*Berne*), JOAL (*Paris*), KARWOWSKI (*Warsaw*),
A. B. KELLY (*Glasgow*), LACUARRET (*Toulouse*),
LAKE (*London*), LICHTWITZ (*Bordeaux*), JOHN N. MACKENZIE (*Baltimore*),
PROF. MASSEI (*Naples*), MEYJES (*Amsterdam*), E. MEYER (*Ferlin*),
MICHAEL (*Hamburg*), HOLGER MYGIND (*Copenhagen*),
W. PORTER (*St. Louis*), ROBERTSON (*Newcastle*), SAJOUS (*Philadelphia*),
SENDZIAK (*Warsaw*), SOTA (*Seville*), ST. CLAIR THOMSON (*London*), AND
DR. ZIEM (*Dantzic*).

THE
PERFECTED WYETH BEEF JUICE.

THE PERFECTED WYETH BEEF JUICE is prepared from the choicest Beef obtainable. It contains all the albuminous principles of Beef in an active and soluble form. A two-ounce bottle contains all the nourishment of three pounds of clear lean Beef. The hæmoglobin of the meat is preserved unaltered, as is shown by the bright arterial colour of the preparation. The proportion of nutrient to stimulating principles is such that it is most acceptable to the stomach in cases of extreme debility. It is as pleasant to the taste as freshly roasted Beef.

The *Lancet* reporting on this preparation, says, "It is little short of perfection."

The *Chemist and Druggist*, after examining the product, speaks of it as "a highly nutritious and restorative food."

The eminent superiority of **the Perfected Wyeth Beef Juice**, as evidenced by the above quotations, indicates its especial value as a food in typhoid and other fevers, and in convalescence from the same; also in Pneumonia, Consumption, Nervous Prostration, and Debility. It has been found of great value in giving strength and nourishment to infants and small children in diarrhœa and dysentery. Ten to fifteen drops in tepid milk are always acceptable, and give sufficient nutriment to sustain a child through these troubles. The uses of a nourishing and stimulating food of a highly concentrated nature like **the Perfected Wyeth Beef Juice** in overcoming fatigue, exhaustion, and general debility will readily occur to the medical man, and we need not suggest its use in a multitude of cases where no organic disease exists. The benefits to be derived from its use as a corrective of the abuses of alcoholic stimulants cannot be over-estimated, as it strengthens and nourishes the stomach, and supplies tone to the debilitated nerves. **The Perfected Wyeth Beef Juice** is always to be used with cold or luke-warm water or milk, never with hot, as heat renders its valuable albuminous properties insoluble.

It is not a preparation for making soups, bouillons, or ordinary so-called beef teas, but is a pure, concentrated, nourishing, and stimulating food, requiring but small doses to produce its effect.

To distinguish **the Perfected Wyeth Beef Juice** from some other preparations on the market whose albuminous principles are obtained by adding egg albumen, add a few drops of pure nitric acid, and in one and a half minutes a clear liquid will result. The effect of nitric acid upon coagulated egg albumen is to turn it yellow in spots, and gradually reduce it to a liquid, but it will take nearly two hours to produce this liquid against less than two minutes for the reduction of *serum* albumen. The presence of unaltered hæmoglobin is evidenced by the bright arterial colour of **the Perfected Wyeth Beef Juice**, and by the fact that it loses this colour upon boiling, the hæmoglobin being precipitated with the albumen.

Supplied to the Medical Profession in bottles at 2s. 10d. each.
