

NOTES FOR AUTHORS

Submitting a paper

Full details on submitting a paper, including the style guide and L^AT_EX class file and macro package, can be found at <https://www.cambridge.org/core/journals/proceedings-of-the-royal-society-of-edinburgh-section-a-mathematics/information/instructions-contributors>

Proceedings of the Royal Society of Edinburgh: Section A considers for publication papers in all areas of mathematics. Please note that this journal does not consider simultaneous submissions from the same author.

- Authors will be asked to state the primary AMS 2010 Classification Number and between three and six keywords.
- Authors should nominate the most appropriate Editor for their paper.
- It is assumed that the author uploading the paper will be responsible for correspondence. A paper by more than one author should be approved in its entirety by the joint authors. An acknowledgement e-mail will be sent to all authors.
- Proceedings A has a page limit of 25pp but may consider papers up to five pages longer to allow for variation in final typeset length. Authors must prepare their papers as concisely as possible. Longer papers can be difficult to review in a reasonable time and can be judged more harshly.
- Each paper must be accompanied by an abstract, in general not exceeding 200 words, which will be printed.
- References should be listed at the end of the paper in alphabetical order, numbered sequentially. References within the text should be indicated by numbers in square brackets.

To submit your paper visit https://rse.msp.org/submit_new.php?jpath=rse_proc_a_math and follow the instructions for uploading.

Once a paper has been accepted for publication, authors will be asked to supply the appropriate file. This should be a single file, with any relevant macros included in the preamble, and named after the article reference number (e.g. 150421-authorname.tex). Figures should be submitted as eps or pdf files at the same time as the code for the paper. Detailed instructions will be given on acceptance.

Language

We recommend that non-English-speaking authors have their manuscripts checked by an English language native speaker before submission, to ensure that submissions are judged exclusively on academic merit. Third-party services specialising in language editing and/or translation can be found here: <https://www.cambridge.org/core/services/authors/language-services>. Use of any of these services is voluntary, and at the authors' own expense.

Proofs and offprints

Authors will be sent proofs of their paper by e-mail in pdf format for checking. A pdf of the final 'publisher's version' of the paper will be sent to the corresponding author shortly after print publication in lieu of hard copy offprints.

Copyright/Open Access

The RSE now operates a 'hybrid' Open Access model for its journals, for accepted papers submitted on or after 1 April 2013. On acceptance, authors will be given the option of having their paper published **either** under a regular publication agreement **or** under a fully Open Access agreement. Under the regular publication option, authors will be asked to sign the Journal's standard transfer of copyright form.

If authors choose the Open Access option, they will be asked to sign the alternative Open Access form and, upon payment of a one-off Article Processing Charge of UK£1780/US\$2835 (in 2017), the final published Version of Record shall be made freely available to all in perpetuity, and will be published under a creative commons licence, enabling its free re-use and re-distribution.

Please note that publication under a fully Open Access agreement is part of the Cambridge Open option. (For more details, please see: <https://www.cambridge.org/core/services/open-access-policies>)

Authors are also asked to ensure that any electronic versions of their paper clearly state the official place of publication.

Except as otherwise permitted under the Copyright, Designs and Patents Act, 1988, papers published in *Proceedings A* may only be reproduced, stored or transmitted with the prior permission of the copyright holder, or, in the case of reprographic reproduction, in accordance with the terms of a licence issued by the Copyright Licensing Agency. The Society permits the making of a single photocopy of an article from an issue (under Sections 29 & 38 of the Act) for an individual for the purposes of research or private study.

(Section A)

Volume 150

2020

Part 4

CONTENTS

R. SCALA AND N. VAN GOETHEM	
Analytic and geometric properties of dislocation singularities	1609–1651
B. AYANBAYEV AND N. KATZOURAKIS	
A pointwise characterisation of the PDE system of vectorial calculus of variations in L^∞	1653–1669
K. ABE AND G. SEREGIN	
Axisymmetric flows in the exterior of a cylinder	1671–1698
E. BERCHIO, D. GANGULY, G. GRILLO, AND Y. PINCHOVER	
An optimal improvement for the Hardy inequality on the hyperbolic space and related manifolds	1699–1736
D.G. DE FIGUEIREDO, J. MARCOS DO Ó, AND J. ZHANG	
Ground state solutions of Hamiltonian elliptic systems in dimension two	1737–1768
H. SUN AND B. XIE	
Spectra of a class of non-symmetric operators in Hilbert spaces with applications to singular differential operators	1769–1790
C. BANDLE AND M.A. POZIO	
Positive solutions of semilinear elliptic problems with a Hardy potential	1791–1804
P.K. BARIK, A.K. GIRI, AND P. LAURENÇOT	
Mass-conserving solutions to the Smoluchowski coagulation equation with singular kernel	1805–1825
S.P. GLASBY, F.A.M. RIBEIRO AND C. SCHNEIDER	
Duality between p -groups with three characteristic subgroups and semisimple anti-commutative algebras	1827–1852
R.I. DMYTRYSHYN	
Multidimensional regular C-fraction with independent variables corresponding to formal multiple power series	1853–1870
Z. YE	
Regularity results for the 2D critical Oldroyd-B model in the corotational case	1871–1913
P. D'AVENIA, A. POMPONIO, AND T. WATANABE	
Standing waves of modified Schrödinger equations coupled with the Chern–Simons gauge theory	1915–1936
H.-L. HUANG, Z. WAN, AND Y. YE	
EXPLICIT cocycle formulas on finite abelian groups with applications to braided linear Gr-categories and Dijkgraaf–Witten invariants	1937–1964
F.-Y. YANG, W.-T. LI, AND J.-B. WANG	
Wave propagation for a class of non-local dispersal non-cooperative systems	1965–1997
G. WU AND Y. ZHANG	
Global well-posedness and large time behaviour of the viscous liquid-gas two-phase flow model in \mathbb{R}^3	1999–2024
P. KALITA AND P. ZGLICZYŃSKI	
On non-autonomously forced Burgers equation with periodic and Dirichlet boundary conditions	2025–2054
R. GHILONI, A. PEROTTI, AND C. STOPPATO	
Division algebras of slice functions	2055–2082
M.A. NAVARRO AND J. SÁNCHEZ	
Sharp estimates of semistable radial solutions of k -Hessian equations	2083–2115
C. CASCANTE AND J.M. ORTEGA	
Bilinear forms on potential spaces in the unit circle	2117–2154
P. TILLI AND D. ZUCCO	
Spectral partitions for Sturm–Liouville problems	2155–2173
