

THE HISTORY AND SOCIAL INFLUENCE OF THE POTATO

By REDCLIFFE N. SALAMAN

'Throughout its pages there is much of practical interest to farmers, especially on methods of cultivation, old and new, but above all the book makes good reading. It is written by one of the world's leading scientific workers on the potato, who began life as a doctor of medicine and has never lost the doctor's realistic view of humanity. There is also something of Faust about it all... It is a doctor's vision of Man, Potatoes and the Devil.' E. C. LARGE in *Agriculture*. 50s. net
