

SUBSCRIPTION RATES

Subscription rates (post free) for volume 35 (1998) of the *Journal of Applied Probability* are as follows:

US\$216.00; \$A279.00; £133.50 for libraries and institutions;

US\$72.00; \$A93.00; £44.50 for individuals belonging to a recognised scientific society.

Members of the London Mathematical Society should apply direct to the Secretary of the Society for copies of the *Journal*.

Please send all enquiries to: Applied Probability, School of Mathematics and Statistics, The University, Sheffield S3 7RH, UK.

We can provide back issue prices on application. Cheques, money orders, etc. should be made out to APPLIED PROBABILITY. Payment is accepted in US, UK or Australian currency or by VISA or Mastercard (phone: +44 114 222 3922; fax: +44 114 272 9782).

NOTES FOR CONTRIBUTORS

Papers published in the *Journal* are of two kinds:

(1) *research papers* not exceeding 20 printed pages;

(2) *short communications* of a few printed pages in the nature of notes or brief accounts of work in progress.

Review papers, *longer research papers* and *letters to the editor* are published in *Advances in Applied Probability*, a companion journal. (Note: Letters relating specifically to papers which have appeared in the *Journal of Applied Probability* will continue to appear in the *Journal*.)

The editors may publish accepted papers in either journal, according to the space available, in order to meet the 15-month deadline in publication referred to below.

Submission of papers

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Papers will not be reprinted without the written permission of the Trust. It is the policy not to accept for publication papers which cannot appear in print within 15 months of the date of receipt of the final version. Fifty reprints of each paper will be provided free; additional reprints are available at cost.

Papers should be written in English or French; papers in other languages may be accepted by the editors, but will appear (subject to the author's agreement) in English or French translation. Please supply *three* double-spaced hard copies, at least one of which should be printed on one side of the paper only. The paper should include: (1) a short abstract of approximately 4–10 lines giving a non-mathematical description of the subject matter and results; (2) list of keywords detailing the contents for the purpose of computerised information retrieval; (3) primary and secondary classifications according to the 1991 Mathematics Subject Classification, to be found in the 1990 Annual Index of *Mathematical Reviews*.

Authors are advised to consult *The Author's Guide to the Applied Probability Journals* when preparing papers for submission. A copy of this guide may be obtained free of charge from the Applied Probability Office. An updated version of the guide, with LATEX style files, can be obtained in electronic form on <http://www.shef.ac.uk/~apt> or on PC-compatible disk from the Applied Probability Office.

For efficiency in processing, authors are requested to send all submissions to the Applied Probability Office in Sheffield, rather than to individual editors. The address for all submissions is:

**Executive Editor, Applied Probability, School of Mathematics and Statistics,
The University, Sheffield S3 7RH, UK.**

COPYRIGHT

The copyright of all published papers shall be vested in the Trust. When a paper is accepted for publication, the Trust requests the author(s) to sign a form assigning copyright to the Trust. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of \$00.70 per copy, plus .20 per page is paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA. 0021-9002/98 \$00.70+ .20.

Research Papers

- 783 SØREN ASMUSSEN AND TATYANA S. TUROVA. Stationarity properties of neural networks
- 795 A. E. KYPRIANOU. Slow variation and uniqueness of solutions to the functional equation in the branching random walk
- 802 J. ALFREDO LÓPEZ-MIMBELA AND ANTON WAKOLBINGER. Length of Galton–Watson trees and blow-up of semilinear systems
- 812 D. M. WALKER. The expected time until absorption when absorption is not certain
- 824 GEORGE R. BARNES, PATRICIA B. CERRITO AND INESSA LEVI. Random walks on finite semigroups
- 833 A. REZA SOLTANI AND K. KHORSHIDIAN. Reward processes for semi-Markov processes: asymptotic behavior
- 843 KARIM BENHENNI. Approximating integrals of stochastic processes: extensions
- 856 S.E. GRAVERSEN AND G. PESKIR. Optimal stopping and maximal inequalities for geometric Brownian motion
- 873 P. DEL MORAL. A uniform convergence theorem for the numerical solving of the nonlinear filtering problem
- 885 J. R. CRUZ AND C. C. Y. DOREA. Simple conditions for the convergence of simulated annealing type algorithms
- 893 MARK D. ROTHMANN AND RALPH P. RUSSO. Weak convergence on randomly deleted sets
- 903 STEPHEN E. CHICK AND MAX B. MENDEL. New characterizations of the no-aging property and the ℓ_1 -isotropic model
- 911 R. M. PHATARFOD AND A. J. PRYDE. On some multi-request move-to-front heuristics
- 919 J. VAN DEN BERG AND A. ERMAKOV. On a distributed clustering process of Coffman, Courtois, Gilbert and Piret
- 925 D. DOWN. On the stability of polling models with multiple servers
- 936 XIAOYUE JIANG, KAN CHENG AND VILIAM MAKIS. On the optimality of repair-cost-limit policies
- 950 D. J. DALEY AND L. D. SERVI. Idle and busy periods in stable $M/M/k$ queues
- 963 PABLO A. FERRARI AND NANCY LOPES GARCIA. One-dimensional loss networks and conditioned $M/G/\infty$ queues
- 976 JEWGENI H. DSHALALOW. Queueing processes in bulk system under the D -policy
- 990 WANSOO T. RHEE. Tight bound of random interval packing

Short Communications

- 998 NIGEL BEAN, DAVID GREEN AND PETER TAYLOR. The output process of an $MMPP/M/1$ queue
- 1003 TOM BRITTON. On critical vaccination coverage in multitype epidemics

Letter to the Editor

- 1007 F. THOMAS BRUSS AND GUY LOUCHARD. Sharp bounds for winning probabilities in the competitive rank selection problem

1012 Obituary: JOSÉ ENRIQUE MOYAL
