Fertilization

From Gametes to Early Embryos

Brian Dale *Centre for Assisted Fertilization, Naples*

- Covers basic biological process, including the cell cycle, ionic regulation, metabolism, polarization, and intracellular signalling
- Deciphers the spatial and temporal complexity of fertilization using examples from across the animal kingdom
- Describes alternative ways of reproduction and how knowledge from gamete biology is used in reproductive technologies
- Enhanced throughout with high-quality illustrations and comprehensive reference lists

£38 | PB 9780521655750 | February 2011

In-Vitro Fertilization

3rd Edition

Kay Elder, *Bourn Hall Clinic, Cambridge*

Brian Dale, *Centre for Assisted Fertilization, Naples*

- Covers the content of established MSc courses in Clinical Embryology and the curriculum for Embryology Certification in Europe – an ideal text for theoretical study and exam preparation
- Extensive coverage of all IVF techniques with illustrations and in-depth reading lists, providing comprehensive resource for all students and ART laboratory practitioners

This edition includes:

- New practical techniques, including preservation of fertility for cancer patients, stem-cell biology/technology, vitrification and in-vitro maturation
- A 'refresher' study review of fundamental principles of cell and molecular biology

£40 | PB 9780521730723 | December 2010

CAMBRIDGE
UNIVERSITY PRESS

Instructions for Contributors

Zygote is an international journal dedicated to the rapid publication of original research in early embryology. It covers interdisciplinary studies on gametogenesis through fertilization to gastrulation in animals and humans. The scope has been expanded to include clinical papers, molecular and developmental genetics. While the editors will favour work describing fundamental processes in the cellular and molecular mechanisms of animal development, and, in particular, the identification of unifying principles in biology, new technologies, review articles, debates and letters will become a prominent feature.

Subjects covered include gametogenesis, sperm–oocyte interaction, gamete and embryo physiology, cell polarity, cell–cell interactions, nuclear transfer, haploidization, molecular and developmental genetics, in-vitro fertilization, stem cell and cryoconservation technologies.

To submit a manuscript, please email a complete copy, including figures and illustrations to:

- Brian Dale, Editor-in-Chief, *Zygote*, Centre for Reproductive Biology, Italy.
Email: brian.dale@virgilio.it or to
- Jacques Cohen, North American Editor, *Zygote*, Tycho-Galileo Research Laboratories, 3 Regent Street, Suite 301, Livingston, NJ 07039, USA
Email: jc@embryos.net or to
- Professor Norio Suzuki, Asian Pacific Editor, *Zygote*, Department of Biological Science, Hokkaido University, Japan.
Email: medaka-s@kdp.biglobe.ne.jp

Submission of a paper will be taken to imply that it is unpublished and it is not being considered for publication elsewhere. Authors of articles published in the journal assign copyright to Cambridge University Press (with certain rights reserved) and you will receive a copyright assignment form for signature on acceptance of your paper.

There is no formal restriction on length; however, original articles and reviews of less than 15000 words are likely to appear sooner than longer ones. Short communications should not exceed 1500 words and News and Views Commentaries 500 words.

Preparation of manuscripts

Manuscripts should be organised as follows: Title page (with full names and addresses of all authors, a running headline of up to 35 characters, and a contact address with telephone number and email address), an Abstract

of not more than 250 words followed by 5 Keywords, Introduction, Materials and Methods, Results, Discussion (combined Results and Discussion may be used for short papers), Acknowledgements, References, Endnotes, Tables and Figure Legends.

Manuscripts should be prepared using SI units

Figures

Figures should be numbered consecutively as they appear in the text. Any indication of features of special interest should also be included. Figures must be supplied electronically. They must be saved at final publication size and supplied in the following file formats: halftone figures (black & white, and colour) as TIF files at 300 dpi; black & white line figures as TIF or EPS files at 800 – 1200 dpi. When relevant, photographs should be submitted with proposed reduction or magnification indicated, when relevant, by a scale line on or beside, the illustration. The places for insertion into the text should be indicated in the text as 'Fig. 1' etc. Legends for all illustrations should be typed together, separately from the main text. A charge of £500 per figure will be made for colour photograph reproduction and printing.

Tables

Tables with concise headings should be placed at the end of the paper. Each table must have a text reference, in the form 'Table 1' etc.

References

References should be cited in the text as Conklin (1905) showed or as shown (Conklin, 1905). For papers with three or more authors use et al. A full list of references in alphabetical order should be given at the end of the text: surname of author and initials; year of publication (in parentheses); title of paper; journal or book name (the former being abbreviated in accordance with the World List of Scientific Periodicals); volume number; first and last page of the reference. For books and conference proceedings, place of publication and publisher (and editor(s) if appropriate) should be included.

Proofs

Proofs will be sent to the author for checking. Typographical or factual errors only may be changed at proof stage. The publisher reserves the right to charge authors for correction of non-typographical errors.

Offprints

A PDF offprint of each article will be supplied free to each first named author. Paper offprints may be purchased from the publisher if ordered at proof stage.

Zygote

The Biology of Gametes and Early Embryos

Volume 18 Issue 3 August 2010

Contents

- Impact of *in vitro* fertilization of bovine oocytes with sex-sorted frozen–thawed spermatozoa on developmental kinetics, quality and sex ratio of developing embryos
J. Peippo, M. Rätty, K. Korhonen, M. Eronen, K. Kananen, T. Hurme, M. Halmekytö and A. Mäki-Tanila 185
- Decrease in CD9 content and reorganization of microvilli may contribute to the oolemma block to sperm penetration during fertilization of mouse oocyte
Eliza Żyłkiewicz, Julita Nowakowska and Marek Maleszewski 195
- Occurrence of chromosomal aneuploidy in rabbit oocytes and embryos at different developmental stages
Jozef Curlej, Jozef Bulla and Peter Chrenek 203
- Developmental competence and expression of the *MATER* and *ZAR1* genes in immature bovine oocytes selected by brilliant cresyl blue
Gustavo Bruno Mota, Ribrio Ivan Tavares Pereira Batista, Raquel Varella Serapião, Mariana Cortes Boité, João Henrique Moreira Viana, Ciro Alexandre Alves Torres and Luiz Sergio de Almeida Camargo 209
- Possible participation of calmodulin in the decondensation of nuclei isolated from guinea pig spermatozoa
Armando Zepeda-Bastida, Natalia Chiquete-Felix, Juan Ocampo-López, Salvador Uribe-Carvajal and Adela Mújica 217
- Effect of FSH and LH hormones on oocyte maturation of buffalo and gene expression analysis of their receptors and Cx43 in maturing oocytes
Alok Pandey, S.C. Gupta and Neelam Gupta 231
- Nitric oxide synthase isoforms and the effect of their inhibition on meiotic maturation of porcine oocytes
Eva Chmelíková, Michal Jeřeta, Markéta Sedmíková, Jaroslav Petr, Lenka Tůmová, Tomáš Kott, Petra Lipovová and František Jílek 235
- Preservation of sperm within the mouse cauda epididymidis in salt or sugars at room temperature
Tetsuo Ono, Eiji Mizutani, Chong Li and Teruhiko Wakayama 245
- Expression of melatonin (MT1, MT2) and melatonin-related receptors in the adult rat testes and during development
Gaia Izzo, Aniello Francesco, Diana Ferrara, Maria Rosaria Campitiello, Ismene Serino, Sergio Minucci and Michela d'Istria 257
- Malonaldehyde formation and DNA fragmentation: two independent sperm decays linked to reactive oxygen species
Debbie Montjean, Yves Ménéz, Moncef Benkhalifa, Marc Cohen, Stephanie Belloc, Paul Cohen-Bacrie and Jacques de Mouzon 265
- Changes in the expression of pluripotency-associated genes during preimplantation and peri-implantation stages in bovine cloned and *in vitro* produced embryos
Lleretny Rodríguez-Alvarez, José Cox, Heribelt Tovar, Ralf Einspanier and Fidel Ovidio Castro 269
