

## Index of Subjects

- ABO blood groups. Their effect on the incidence of epidemic influenza and on response to virus vaccines, 21
- Activated sludge treatment; its effect on f2 coliphage, 237
- Antibiotics, the role of in prophylaxis against tetanus, 267
- Antibodies, HI, against influenza A and B in maternal and neonatal sera, 13
- Antibody titres by single radial haemolysis to recent strains of influenza A in the Highland Region of Scotland, 1
- Antibody titres in women six to eight years after the administration of RA27/3 and Cendehill rubella vaccines, 337
- Antigens, surface and somatic, of *Bacterioides fragilis* 439
- Antimicrobial feed additives; their effect on the colonization of the alimentary tract of chickens by *Salmonella typhimurium*, 217
- Antitetanus human globulin, the role of in prophylaxis against tetanus, 267
- Bacillus cereus*, prevalence of in faeces of healthy adults, 233
- Bacterial contamination in a modern operating suite. 2: Effect of a zoning system, 57; 3: Importance of floor contamination, 169; 4: Contamination of clothes, 175
- Bacterioides fragilis*, counting of by a modification of the microdroplet technique, 385
- Bacterioides fragilis*, a study of the surface and somatic antigens, 439
- Bluetongue studies with sentinel cattle in Kenya, 197
- Bovine brucellosis, comparison of the results of some serological tests for, 365; diagnostic efficiency of some serological tests for, 373
- Bowls and bacteria, 423
- Brodifacoum, field trials of against warfarin-resistance infestations of *Rattus norvegicus*, 77
- Clostridium botulinum* in aquatic environments in Great Britain and Ireland, 431
- Cockroaches, observations of the effects of formaldehyde on. 1. Survival of cockroaches during fumigation, 125; 2: Survival after drinking formaldehyde or glutaraldehyde solutions, 131; 3: elimination of the normal gut flora, 137
- Coliphage f2, the behaviour of in activated sludge treatment, 237
- Colonization of the alimentary tract of chickens by *Salmonella typhimurium*, the effect of antimicrobial feed additives on, 217
- Commercial factor VIII associated hepatitis, 1974–75, in the United Kingdom, 327
- Corynebacterium kutscheri* and its alleged avirulent variant in mice, 349; Relationships between the variant and streptococci of group N, 357
- Counts on viable *Bacterioides fragilis*: a modification of the microdroplet technique, 385
- Dermatophytes, geographical distribution of, 301
- Diarrhoeal disease, two epidemics of possibly caused by *Plesiomonas shigelloides*, 275
- Distribution of *Vibrio parahaemolyticus* in British coastal waters, 281
- Dose-response relationships in a microneutralization test for foot-and-mouth disease viruses 31
- Enzyme-labelled immunosorbent assay techniques in foot-and-mouth disease virus research, 391
- Epidemiological patterns of klebsiella colonization and infection in an intensive care ward, 295
- Escherichia coli*, the sources of 'OH' serotypes of, 83
- Fluorescence typing method used in an epidemiological study of *Klebsiella* infection in a London hospital, 43
- Foot-and-mouth disease virus subtype variants causing disease in vaccinated cattle, *in vitro* comparison of, 451
- Foot-and-mouth disease viruses, dose-response relationships in a microneutralization test for, 31

- Foot-and-mouth disease virus research, enzyme-labelled immunosorbent assay techniques in, 391
- Formaldehyde *see* Cockroaches
- Genetic factors in leprosy, a study of children in Uganda, 205
- Genetics of warfarin-resistance in house mice of three separate localities, 69
- Gentamicin-resistant *Klebsiella aerogenes* causing a hospital epidemic, 115
- Geographical distribution of the dermatophytes, 301
- Haemagglutination-inhibition antibodies against influenza A and influenza B in maternal and neonatal sera, 13
- Hepatitis associated with commercial factor VIII, 1974–75, in the United Kingdom, 327
- Hospital epidemic caused by a gentamicin-resistant *Klebsiella aerogenes*, 115
- Hygienic quality of vegetables grown in or imported into the Netherlands, 143
- Influenza A, a survey by single radial haemolysis of antibody titres in the Highland Region of Scotland, 1
- Influenza A and B, HI antibodies against in maternal and neonatal sera, 13
- Influenza, epidemic, the effect of ABO blood groups on the incidence of, 21
- Influenza A (H3N2), immunity to challenge in volunteers vaccinated with an inactivated current or earlier strain of, 243
- Influenza, excess mortality from in a large urban population, Rome, Italy, 1956–76, 249
- Influenza A virus (H3N2), serological evidence of continuing infection of swine in Great Britain with, 415
- Klebsiella* colonization and infection in an intensive care ward, 295
- Klebsiella* infection in a London hospital studied by a fluorescence typing method, 43
- Klebsiella aerogenes*; a gentamicin-resistant strain causing a hospital epidemic, 115
- Lymphocyte response to tetanus toxoid and its relation to age of lymphocyte donor, 259
- Leprosy, genetic factors in Uganda, 205
- Mice of three separate localities, genetics of warfarin-resistance in, 69
- Mice, trials of the rodenticide pyriminil against, 315
- Murids, African, studies on Rift Valley fever in, 183
- Mycobacteria, opportunist, sensitization of children by in Lagos, 321
- Myxomatosis: the occurrence of *Spilopsyllus cuniculi* (Dale) larvae on dead rabbit kittens, 427
- Operating suite, modern, bacterial infection in, 2, 57; 3, 169; 4, 175
- Oral infection by salmonellas contained in raw sewage sludge, susceptibility of cattle to, 409
- Plesiomonas shigelloides* as a possible cause of two epidemics of diarrhoeal disease, 275
- Poliomyelitis surveillance in England and Wales, 1969–1975, 155
- Pyriminil, trials of as a rodenticide against wild house mice, 315
- Pyriminyl used as a rodenticide against the lesser bandicoot rat, 401
- Rift Valley fever, studies on in some African murids, 183
- Rodenticide *see* Brodifacoum, and *see* Pyriminil
- Salmonella typhimurium* colonization of the alimentary tract of chickens, the effect of anti-microbial feed additives on, 217
- Salmonellas contained in raw sewage sludge, the susceptibility of cattle to oral infection by, 409
- Sensitization of children by opportunist mycobacteria in Lagos, 321
- Serological evidence of continuing infection of swine in Great Britain with an influenza A virus (H3N2), 415
- Serological tests for bovine brucellosis, comparison of the results, 365
- Serological tests for bovine brucellosis, the diagnostic efficiency of, 373
- Serotypes 'OH' of *Escherichia coli*, the sources of, 83

- Single radial haemolysis: a survey of antibody titres in the Highland Region of Scotland to recent strains of influenza A, 1
- Spilopsyllus cuniculi* (Dale) larvae on dead rabbit kittens, 427
- Swine in Great Britain showing serological evidence of continuing infection with an influenza A virus (H3N2), 415
- Tetanus prophylaxis in non-immune patients with wounds: the role of antibiotics and of human antitetanus globulin, 267
- Tetanus toxoid; the relationship between lymphocyte response to and age of lymphocyte donor, 259
- Vegetables grown in or imported into the Netherlands, the hygienic quality of 143
- Vibrio parahaemolyticus*, its distribution in British coastal waters 1975–6, 281
- Viruses; bluetongue, 197; foot-and-mouth, 31, 391, 451; influenza, 1, 13, 21, 243, 249, 415; poliomyelitis, 155; Rift Valley fever, 183; vaccinia, 125
- Warfarin-resistance in house mice of three separate localities, genetics of, 69
- WBA 8119 (PP 581, brodifacoum), field trials of against warfarin-resistant infestations of *Rattus norvegicus*, 77
