

General Notes

So many interesting points are touched upon that it would be invidious in a short review to single any out of the multitude, for the volume before us, reaching only 80 pages of large print, is in itself a model alike of conciseness and unstilted writing—a rare combination upon which we should like to congratulate the author. We must therefore content ourselves by cordially recommending “Mirror-Writing,” for the contents cannot fail to be appreciated by minds of scientific bent.

P. McBRIDE.

LETTER TO EDITORS

TREATMENT OF LUPUS BY RADIUM.

TO THE EDITORS,

Journal of Laryngology and Otology.

DEAR SIRS,—With reference to the treatment of Lupus by Radium, allow me to assure Sir St Clair Thomson and others interested in this subject, that both I and the Medical Officers of the Radium Institute, London, have for many years been aware of “possible, uncertain, and sometimes remote evil effects” of radiation such as have been obtained in America and on the Continent; further, that adequate measures have been taken to guard against them, and that, in six years’ experience, I have yet to see a case where any untoward results have arisen.—Yours faithfully,

H. MORTIMER WHARRY.

LONDON, 1st November 1928.

GENERAL NOTES

ROYAL SOCIETY OF MEDICINE.

1 Wimpole Street, London, W. 1.
