2.1	Categories of evidence	<i>page 39</i>
5.1	Understanding impact trajectories	103
7.1	Case selection setup under Mill's methods of difference and agreement	145
7.2	How ordered processes risk being ignored by a Millian setup	152
7.3	Deductively incorporating ordered processes within a Millian setup	152
7.4	Paced processes risk being ignored by a Millian setup	154
7.5	Deductively incorporating paced processes within a Millian setup	155
7.6	Equifinal causal processes risk being ignored by a Millian setup	157
7.7	Probing generalizability by selecting a most-similar case	163
7.8	Probing scope conditions by selecting a most-different case	166
7.9	Probing equifinality by selecting a most-different case with the same outcome	168
7.10	Case selection roadmap to assess generalizability, scope conditions, equifinality	169
13.1	Example of fishbone diagram in adaptive management and participatory case study	300
