

## CONTENTS.

	PAGE
<i>What determines the resistance and the tilt of an aeroplane?</i> By Sir JOSEPH LARMOR, Lucasian Professor. (With one Text-figure) . . . . .	617
<i>The pedal (3, 2) correspondence.</i> By R. VAIDYANATHASWAMY. (Communicated by Mr H. W. TURNBULL) . . . . .	631
<i>Lines and planes in a metrical space.</i> By W. HUNTER, B.A., Trinity College. (Communicated by Mr S. POLLARD.) (With Four Text-figures) . . . . .	653
<i>Note on Ramanujan's arithmetical function <math>\tau(n)</math>.</i> By Mr G. H. HARDY, Trinity College . . . . .	675
<i>Notes on the theory of series (III): On the summability of the Fourier series of a newly continuous function.</i> By Mr G. H. HARDY and Mr J. E. LITTLEWOOD . . . . .	681
<i>The evaluation of Gibbs' phase-integral for imperfect gases.</i> By H. D. URSELL, Trinity College. (Communicated by Mr R. H. FOWLER). . . . .	685
<i>The limits of classical scattering.</i> By P. M. S. BLACKETT, M.A., Fellow of King's College . . . . .	698
<i>On Herschel's condition and the optical cosine law.</i> By Mr G. C. STEWARD, Gonville and Caius College. (With One Text-figure) . . . . .	703
<i>The effect of the orbital velocity of the electrons in heavy atoms on their stopping of <math>\alpha</math>-particles.</i> By L. H. THOMAS, B.A., Trinity College. (With One Text-figure) . . . . .	713
<i>The absolute intensities of the <math>\gamma</math>-rays of radium B and radium C.</i> By C. D. ELLIS, Ph.D., Trinity College, and W. A. WOOSTER, B.A., Peterhouse . . . . .	717
<i>An experiment on the stability of superposed streams of fluid.</i> By Mr G. I. TAYLOR, Trinity College. (With One Text-figure) . . . . .	730
<i>The stopping power of hydrogen atoms for <math>\alpha</math>-particles according to the new quantum theory.</i> By J. A. GAUNT, B.A., Trinity College. (Communicated by Mr R. H. FOWLER.) (With One Text-figure) . . . . .	732
