

## INDEX OF PAPERS PUBLISHED IN THIS VOLUME ARRANGED ACCORDING TO NAMES OF AUTHORS

[*The numbers refer to pages.*]

- Aitken, A. C. . . . . On induced permutation matrices and the symmetric group, 1.  
A further note on multivariate selection, 37.
- Bell, E. T. . . . . Lagrange and Wilson theorems for the generalised Stirling numbers, 171.
- Brahmachari, I. . . . . Invariants of two quaternary quadrics, 41.
- Brown, L. M. . . . . The intersection of certain quadrics, 125.  
A family of quadrics, 207.
- Copson, E. T. and  
Ferrari, W. L. . . . . A series of "cut" Bessel functions, 159.
- Davies, E. T. . . . . On the deformation of the tangent  $m$ -plane of a  $V_n^m$ , 202.
- Haantjes, J. . . . . On the projective geometry of paths, 103.
- Head, J. W. . . . . The Veronesean of quadrics and associated loci, 14.
- Hurt, J. T. and Ford, L. R. Polynomial expansions in the Borel region, 82.
- Hyslop, J. M. . . . . On the absolute summability of series by Rieszian means, 46.  
On the approach of a series to its Cesàro limit, 182.
- M'Creagh, W. H. . . . . The geometrical foundations of certain relativity theories, 211.
- Phillips, E. G. . . . . On a function which is self-reciprocal in the Hankel transform, 35.  
Note on the above paper, 116.
- Richmond, H. W. . . . . On extensions of Pascal's theorem, 55.  
On extensions of Pascal's theorem (Second Paper) Paul Serret's theorem, 155.
- Robertson, H. P. . . . . Test corpuscles in general relativity, 63.
- Synge, J. L. . . . . On the concept of gravitational force and Gauss's theorem in general relativity, 93.
- Todd, J. A. . . . . Birational transformations with isolated fundamental points, 117.
- Todd, J. A. and Coxeter,  
H. S. M. . . . . A practical method for enumerating cosets of a finite abstract group, 26.
- Walsh, C. E. . . . . On a recurrence relation, 151.
- Watson, G. N. . . . . Two infinite integrals, 174.
- Wedderburn, J. H. M. . . . . A special linear associative algebra, 169.
- Wintner, Aurel . . . . . On bounded skew-symmetric forms, 90.
- Zia-ud-din, M. . . . . Invariant matrices and S-functions, 43.
