THE BRITISH JOURNAL OF PSYCHIATRY

April 1986

Vol 148

MEDICAL JOURNAL OF MAY 13 1986

ISSN 0007-1250

Published by authority of
The Royal College of Psychiatrists

NOTICE TO CONTRIBUTORS

1. *The British Journal of Psychiatry* is published monthly under the auspices of the Royal College of Psychiatrists. The *Journal* publishes original work in all fields of psychiatry. Communications on general editorial matters, including manuscripts for publication, printed matter, and books for review, should be sent to *The Editor, The British Journal of Psychiatry, 17 Belgrave Square, London SW1X 8PG.*

2. Contributions are accepted for publication on the condition that their substance has not been published or submitted for publication elsewhere. The *Journal* does not hold itself responsible for statements made by contributors. Unless so stated, material in the *Journal* does not necessarily reflect the views of the Editor or the Royal College of Psychiatrists.

3. Published articles become the property of the *Journal* and can be published elsewhere, in full or in part, only with the Editor's written permission.

4. Manuscripts accepted for publication are subject to copy-editing, and to editorial changes required for conformity with *Journal* style.

5. We regret that papers unsuitable for publication will not be returned.

6. **General advice to authors** In the assessment of manuscripts submitted to the *Journal*, great importance is attached to clarity and brevity of expression. Authors should read *General Notes on the Preparation of Scientific Papers* (3rd ed. 1974, £0.45, from The Royal Society) and/or Judith Butcher's *Typescripts, Proofs and Indexes* (1980, Cambridge University Press, £2.95). Spelling should follow the *Concise Oxford Dictionary*.

The standard of statistical work in papers submitted for publication has proved to be very variable. Authors using any statistical methods at all are strongly advised to study the paper 'Statistical guidelines for contributors to medical journals' (D. G. Altman *et al.*, *British Medical Journal*, 7 May 1983, 286, 1489-1493) at the earliest possible stage in preparing their work for publication.

7. **Manuscripts** Two high-quality copies should be submitted and the author should retain a copy. Articles must be typed on one side of the paper only, **double spaced with wide margins**, and all the pages must be numbered sequentially, starting with the title page.

a. The **title** should be brief and to the point. If necessary, a sub-title may be used to amplify the main title. The names of the authors should appear on the title-page, and **their names, degrees, affiliations and full addresses at the end of the paper.**

b. A **summary** should be given at the *beginning* of the article. It should be brief and factual and not normally more than 150 words.

c. **References** should be listed **alphabetically** at the end of the paper, **the titles of journals being given in full.** Authors should follow *Journal* style for the reference list and study the examples given below. Titles of books and journals are printed in *italic* and should therefore be underlined on the typescript. Reference lists not in *Journal* style will be returned to the author for correction.

Authors should check that the text references and the reference list are in complete agreement as regards dates and spelling of names. The text reference should be in the form '(Smith, 1971)' or 'Smith (1971) showed that ...'

DURKHEIM, E. (1897) *Le Suicide*. Paris. Translated (1952) as *Suicide: A Study in Sociology*, by J. A. Spaulding & C. Simpson. London: Routledge & Kegan Paul.

KENDELL, R. E. (1974) The stability of psychiatric diagnoses. *British Journal of Psychiatry*, 124, 352-358.

RUTTER, M. TIZARD, J. & WHITMORE, K. (1970) *Education, Health and Behaviour*. London: Longman.

SCOTT, P. D. (1974) *Definition, classification, prognosis and treatment*. In *Pathology and Treatment of Sexual Deviation* (ed. I. Rosen) Oxford: Oxford University Press.

'Personal Communications' need written authorisation.

d. **Symbols and abbreviations** Follow *Units, Symbols and Abbreviations: A Guide for Biological and Medical Editors and Authors* (3rd ed. 1977), £2.00, available from the Publications Office of the Royal Society of Medicine. Terms or abbreviations which might not be understood by the average reader should be explained at first occurrence.

e. **Tables and Figures** Each table should be on a separate sheet, with an adequate heading; table and heading should be self-explanatory without reference to the text. The desired position of the table relative to the text should be indicated in the left margin.

Figures should be individual glossy photographs, or other camera-ready prints, *not* photocopies, clearly numbered and captioned below. Avoid cluttering figures with explanatory text which is better incorporated succinctly in the caption. A figure intended to occupy a single column should be drawn (or photographed) 80-110 mm wide to allow for a 2/3 reduction; a figure requiring the whole width of the page should be 180-210 mm wide. Lettering (film-set or stencil) should be 12pt sans (initial capital for the first word only) to give 8pt on the printed page. Labels on graphs should read parallel to the axes. Units must be clearly indicated and should be in brackets (*note*—'litre' should be spelled out in full unless modified to ml, dl, etc.).

f. **Photographs** Prints must be taken directly from the original b/w negative (not, for example, from a colour slide or a printed page) and should be glossy and sharply focussed. Labels, arrows, etc. should be shown on a duplicate print or overlay. Do not write anything on photographic prints, and do not use staples or paper-clips on them. These procedures apart, all the comments on figures and tables apply equally to photographs.

8. **Proofs** A proof will be sent to the senior author of an article. Reprints, which are prepared at the same time as the *Journal*, should be ordered when the proof is returned to the Editor.

9. **Letters to the Editor** Letters should not exceed two double-spaced typed pages. They will be edited for clarity and conformity with *Journal* style and may be shortened. There should be no more than five references; tables and figures cannot be used.

THE BRITISH JOURNAL OF PSYCHIATRY

APRIL 1986

Published monthly

Volume 148

Founded in 1853 as the *Asylum Journal* and known as the *Journal of Mental Science* from 1855 to 1963.

Printed by Henry Ling Ltd, The Dorset Press, 23 High East Street, Dorchester, Dorset DT1 1HD (Tel 0305 65066).

© 1986 THE ROYAL COLLEGE OF PSYCHIATRISTS

THE UNIVERSITY OF PAPUA NEW GUINEA

Port Moresby

LECTURER/SENIOR LECTURER IN PSYCHIATRY—M811013/86

Applications are invited for the above post in the Division of Medicine, Department of Clinical Sciences. Applicants must have: appropriate postgraduate qualifications (Fellowship of British or Australian College of Psychiatrists or Membership of American College of Psychiatrists or equivalent qualifications); teaching experience at both undergraduate and postgraduate levels; clinical experience in Psychiatry; research interest and background. The appointee will be located at Port Moresby General Hospital (Medical Faculty) in the Capital City and will be responsible for teaching medical students, residents and registrars. He/she will also have clinical responsibilities and will act as a specialist consultant to the Health Department. The appointee will be expected to commence duties before or around 1st January 1987.

SALARY: Senior Lecturer K21,255, Lecturer Grade II K19,405, Lecturer Grade I K17,555, per annum, plus gratuity. The appointee would be entitled to a clinical loading of K2,000 per annum, subject to registration application being approved by PNG Medical Board.

OTHER CONDITIONS: The successful applicant will normally be offered a contract for a three year appointment ending at the end of a semester. The gratuity entitlement is based on 24% of salary earned and is payable in instalments or lump sum and is taxed at a flat rate of 2%. In addition to the salaries quoted above, the main benefits include: support for approved research; rent-free accommodation; appointment and repatriation airfares for appointee and dependents; financial assistance towards the cost of transporting personal effects to and from PNG; 6 weeks annual recreation leave with home airfares available after each 18 months of continuous service; generous education subsidies for children attending schools in PNG or overseas; a salary continuation scheme to cover extended illness or disability. Applicants who wish to arrange secondment from their home institutions will be welcomed. The Terms and Conditions are under review.

Applications will be treated as strictly confidential and should include three copies of a full curriculum vitae, a recent small photograph and the names and addresses of three referees and date of availability. In order to expedite the appointment procedure, applicants are advised to ask their referees to send confidential reports directly to the University without waiting to be contacted. Applications should be forwarded to the Deputy Registrar (Staffing), University of Papua New Guinea, P.O. Box 320, UNIVERSITY POST OFFICE, NCD, Papua New Guinea, by 30 April 1986. Candidates in the UK should also send a copy of their applications to the Secretary General, Association of Commonwealth Universities (Apts), 36 Gordon Square, London WC1H 0PF.

INSTITUTE OF PSYCHIATRY
(University of London)

Diploma in Addiction Behaviour A New International Teaching Course

The Institute of Psychiatry, University of London, offers a full-time one year course leading to Diploma in Addiction Behaviour starting 6 October 1986. The course will have a strong international and multidisciplinary focus. It will cover alcohol and drug problems and will offer clinical and community placements. It will integrate teaching on basic sciences, clinical aspects, design and running of treatment services, prevention and development of national policy.

Though primarily intended for medical staff, other professions with clinical experience will be considered. Clinical teaching will take place at the Bethlem Royal and Maudsley Hospitals, Charter Clinics and St George's Hospital Department of Addiction Behaviour.

Course Director: Professor Griffith Edwards.

Application forms and further information about the course including fees are available from the Course Secretary, Addiction Research Unit, Institute of Psychiatry, 101 Denmark Hill, London SE5 8AF.

Course teachers will include Dr J Cutting, Dr H Ghodse, Dr Ilana Glass (Course Organiser), Prof J A Gray, Prof M H Lader, Prof P L Lantos, Prof W A Lishman, Dr R M Murray, Ms Edna Oppenheimer, Dr O E Pratt and Dr I Stolerman.

Charter Medical is offering a number of bursaries which will cover part fees for early applicants.

The Retreat, York

for Psychiatric Illnesses

Founded in 1792 by the Quaker, William Tuke, who established the tradition of concern for patients as individuals The Retreat is a 200-bedded private registered nursing home surrounded by extensive grounds on the outskirts of the historic City of York. It is easily reached by rail and motorways.

Care and treatment is offered for all types of psychiatric illness on the short or long term in a sympathetic and friendly atmosphere. Patients suffering from neuroses, psychoses, alcoholism and dementia are treated by the full-time consultant psychiatrists in surroundings suitable for their individual needs. Outpatient facilities are available by appointment with the consultant medical staff.

The Nursing Home is a registered charity and is able to offer inclusive care in shared accommodation from £32.00 per day or in single rooms at slightly increased charge. The Nursing Home is recognised by the main private patient schemes.

For further details apply to The Medical Director, The Retreat, York YO1 5BN (Telephone 0904 412551).

Research into neuropsychiatric effects of industrial solvents

The Health and Safety Executive is seeking proposals for research into the chronic effects of solvent exposure on the central nervous system.

There are reports of deleterious effects of occupational exposure to solvents on psychological functioning, mental health and general well-being but the reliability of these findings remains in doubt. HSE wishes to fund studies designed to investigate the chronic neuropsychological/neuropsychiatric effects of solvents on occupationally-exposed groups of workers in the UK.

The Executive is prepared to commission one or more studies lasting up to 3 years to be carried out in United Kingdom universities or equivalent institutions.

Further details and application forms are available from

**Dr E M Gibby, Medical Division,
Health and Safety Executive, Baynards House,
1, Chepstow Place, London W2 4TF
(Telephone: 01 - 229 3456)**

Applications should be submitted by May 16th 1986

Side Hospital, Maghull, Liverpool. L31 1BD

Northampton General Lunatic Asylum.

**SOME PEOPLE'S IDEAS ABOUT
ST ANDREW'S ARE AS DATED AS
THIS ENGRAVING**

Established almost 150 years ago St Andrew's has always been in the forefront of psychiatric developments.

In the 1800's it was the first hospital to totally abolish physical restraint. As early as 1927 it opened a separate unit for short stay patients. In the 1980's it has pioneered the application of behavioural methods to the management of a range of disorders including severe brain damage.
