CDC Guideline for Handwashing and Hospital Environmental Control, 1985

Revised by Julia S. Garner, RN, MN and Martin S. Favero, PhD

Medi-Scrub

Because infection control should be everybody's job.

Choosing the right product can make all the difference in getting the staff to stop and take the time to wash their hands. Medi-Scrub® is the right medicated health care personnel handwash for three reasons:

1. Medi-Scrub's formula. Our combination of P.C.M.X. and emollients is fast acting and persistent against bacteria, but gentle to your hands. Tests prove Medi-Scrub's effectiveness against a broad range of pathogenic organisms including antibiotic-resistant Staph and Candida albicans. Participants in these tests, even after repeated handwashing, reported no sign of skin irritation.

2. Disposable dispensing system. Medi-Scrub is packed in our exclusive DisposaCare cartridge, a factory-sealed container with a built-in measuring pump. When it's empty, throw it away. Pump and all. The matching wall-mount dispenser puts Medi-Scrub exactly where you need it. And the dispenser's unique window design lets you see the Medi-Scrub label so there's no question about what's inside.

3. Educational systems. Medi-Scrub is backed by a complete program. A video tape, bilingual filmstrips, posters, buttons and more to help you get Medi-Scrub out of the dispenser and into their hands. And your Huntington representative is always ready with technical and training assistance. For more information on Medi-Scrub and the Care System of products, call us now toll-free:

Sporicidin
STERILIZING SOLUTION

Recommended by All Major Scope Manufacturers

Sporicidin is a "tamed" glutaraldehyde that does not yellow or irritate skin or mucous membranes.

Sporicidin is safe for delicate instruments and it will not cloud lenses or clog air/water channels.

Sporicidin (1:16) is tuberculocidal, bactericidal, fungicidal & virucidal (including Herpes I & II, Influenza A₂ and Polio I).

Proof Comes from 15 Years of Research and Clinical Use

"In 5000 procedures the cystoscopes were used directly from the Sporicidin soak; there were no known incidents of iatrogenic infection or post-operative irritation. Sporicidin is safe and effective in 10 minutes."

Urology, Vol. 23, No. 2, 1984

"After 3 years and 4001 procedures (laparoscopy, cystoscopy and colonoscopy), we observed
(1) no post-operative tissue irritation or infection
(2) no lens clouding or endoscope damage
(3) preferred by our staff."

*Journal Of The Operating Room
Research Institute, Vol. 3, No. 8, 1983*

"Sporicidin . . . was both more stable and more active
