SCOPE OF THE JOURNAL

CLAYS AND CLAY MINERALS is the official publication of **THE CLAY MINERALS SOCIETY**. From 1952 through 1967 the publication took the form of an annual Proceedings Volume composed mainly of the papers presented at the annual Clay Minerals Conferences. In 1968 the publication was expanded to a bi-monthly JOURNAL that is now published by the SOCIETY. The JOURNAL undertakes to publish all articles of interest to the international community of clay scientists, and manuscripts are welcome from all countries.

CLAYS AND CLAY MINERALS aims to present the latest advances in research and technology concerning clays and other fine-grained minerals. Like its parent Society, the JOURNAL strives to promote the advancement of knowledge in many areas of clay science and technology, and it is therefore of value in mineralogy, crystallography, geology, geochemistry, sedimentology, soil science, agronomy, physical chemistry, colloid chemistry, ceramics, petroleum engineering, foundry engineering, soil mechanics, and other disciplines concerned with fine-grained mineral materials. Despite their different backgrounds and special interests, clay scientists and technologists have much in common, as their problems involve the structure, properties, origin, occurrence, and applications of the same minerals. **CLAYS AND CLAY MINERALS** exists to disseminate to its worldwide readership the most recent developments in all of these aspects of clay materials.

Manuscripts that are prepared in English in accordance with the "Instructions for Contributors" on the inside back cover of the JOURNAL should be submitted to the EDITORIAL OFFICE of the Society and will be reviewed by competent referees.

Communications concerning membership in **THE CLAY MINERALS SOCIETY** should be addressed to the **SOCIETY OFFICE**.

Communications regarding new subscriptions, change of address, nonreceipt of issues, back issues, and reprints should be directed to the **SUBSCRIPTION OFFICE**. Please quote your subscription code number in all correspondence.

SUBSCRIPTION RATE

For libraries, university departments, government laboratories, industrial firms, and other multiple-reader institutions—US \$96.00 (North America), \$110.00 (other). Subscriptions are available on a two-year basis at a reduced rate of US \$185.00 (North America), \$212.00 (other). Bona-fide subscribing members of **THE CLAY MINERALS SOCIETY** receive the JOURNAL as part of their membership. **CLAYS AND CLAY MINERALS** is published bi-monthly by **THE CLAY MINERALS SOCIETY**, and subscriptions are available on a calendar-year basis only. Subscription rates include surface mail delivery in North America and air freight or airmail delivery to all other parts of the world. Prices are subject to change without notice.
