I certify that all information furnished on this form is true and complete. I understand that anyone who furnishes false or misleading information on this form or who omits material or information requested on the form may be subject to criminal sanctions (including fines and imprisonment) and/or civil sanctions (including civil penalties).						

INSTRUCTIONS TO AUTHORS

All submissions to *Applied Psycholinguistics* should proceed online: <http://mc.manuscriptcentral.com/appliedpsych>. For information on the new online submission and review system, please read the Tutorial for Authors or the Tutorial for Reviews at <http://mcv3help.manuscriptcentral.com/tutorials>. For questions on the submission and reviewing process, please contact Susy Bienstock (Editorial Coordinator) at [ap.america@cambridge.org](mailto:america@cambridge.org).

Submissions may be full length articles (original research or theoretical reviews), critical responses to articles previously published in *Applied Psycholinguistics*, or (usually) invited keynote articles with accompanying commentaries.

Spelling, capitalization, and punctuation should be consistent within each article and should follow the style recommended in the Fifth Edition of the *Publication Manual of the American Psychological Association*. A *title* should be given for each article. An *auxiliary short title* should be given for any article whose title exceeds 50 characters. The *author's name* should be given in the form preferred for publication: the *affiliation* should include the author's full mailing address, telephone number, e-mail address, and fax number. An *abstract* should be prepared for each article (limited to 120 words). Author's personal note(s) should appear in the *acknowledgment* section. *Notes* should be numbered consecutively throughout the text and typed together on a separate page following the acknowledgment section. *Tables and figures* should be numbered consecutively throughout the article and appear as a unit following the reference section. *Bibliographic citations in the text* must include the author's last name and the date of publication and may include page references. Complete bibliographic information for each citation must be included in the list of references. Examples of correct styling for bibliographic citations are Brown (2000), Ingram (2001, pp. 54–55), Smith and Miller (2004), (Smith & Miller, 2004), (Peterson, Danner, & Flavell, 2006), and subsequently (Peterson et al., 2006). If more than one, citations should be listed in alphabetical order. *References* should be cited in the text and should be typed in alphabetical order using the following style:

Brown, R. (2000). Schizophrenia, language and reality. *American Psychologist*, 28, 395–403.
 Ingram, D. (2001). *Phonological disability in children*. New York: Elsevier.
 Krashen, S. D. (2006). Individual variation in the use of the Monitor. In W. C. Ritchie (Ed.), *Second language acquisition research*. New York: Academic Press.

Smith, F., & Miller, G. A. (Eds.). (2004). *The genesis of language*. Cambridge, MA: MIT Press.

Titles of journals should *not* be abbreviated. Unpublished citations should be listed in the references.

Preparation of the manuscript

The entire manuscript, including notes and references, must be typed double-spaced on 8.5 by 11 inch or A4 paper with 1-inch margins. Manuscript pages should be numbered consecutively. Each element of the article should begin on a new page and should be arranged as follows: title page (title, short title, author's full name, affiliation, and mailing address), abstract, text, appendices, acknowledgments, notes, references, tables, and figures.

Each table and figure should be submitted on a separate page and should be titled. Figures should be ready for photographic reproduction; they cannot be redrawn by the publisher. Charts, graphs, or other artwork should be professionally rendered or computer generated. Photographs should be glossy black-and-white prints; 8 by 10 inch enlargements are preferred. All labels and details on figures should be clearly printed and large enough to remain legible after a 50% reduction.

Copyediting and proofreading

The publisher reserves the right to copyedit and proofread all articles accepted for publication. The lead author will review the copyedited manuscript only if changes have been substantial. Page proofs of an article will be sent to the lead author for correction of typographical errors only; authors must notify the editorial office of any changes within 48 hours or approval will be assumed.

The Fifth Edition of the *Publication Manual of the American Psychological Association* should be consulted for instructions on aspects of manuscript preparation and style not covered in these instructions. The Editor may find it necessary to return manuscripts for reworking and retyping that do not conform to requirements.

The lead author will receive a high-quality PDF of his or her article without charge; offprint copies may be purchased if ordered at proof stage.

Submission of an article implies that it has not been published elsewhere. Authors are responsible for obtaining written permission to publish material (quotations, illustrations, etc.) for which they do not own the copyright. Contributors of accepted articles will be asked to assign their copyrights, on certain conditions, to Cambridge University Press.

Applied Psycholinguistics

Volume 33 Number 3 2012

Articles

- ELENA NICOLADIS, JIANHUI SONG, and PAULA MARENTETTE Do young bilinguals acquire past tense morphology like monolinguals, only later? Evidence from French–English and Chinese–English bilinguals 457
- TANIA S. ZAMUNER, ANNEMARIE KERKHOFF, and PAULA FIKKERT Phonotactics and morphophonology in early child language: Evidence from Dutch 481
- KIMIKO TSUKADA Comparison of native versus nonnative perception of vowel length contrasts in Arabic and Japanese 501
- ZAIZHU HAN, LUPING SONG, and YANCHAO BI Cognitive mechanism of writing to dictation of logographic characters 517
- CARRIE A. ANKERSTEIN, ROSEMARY A. VARLEY, and PATRICIA E. COWELL Feature types and object categories: Is sensorimotoric knowledge different for living and nonliving things? 539
- CLAUDIA FELSER and IAN CUNNINGS Processing reflexives in a second language: The timing of structural and discourse-level constraints 571
- ELIZABETH M. KISSLING Cross-linguistic differences in the immediate serial recall of consonants versus vowels 605
- XIANGHUA WU, JUNG-YUEH TU, and YUE WANG Native and nonnative processing of Japanese pitch accent 623
- RIKKE L. BUNDEGAARD-NIELSEN, CATHERINE T. BEST, CHRISTIAN KROOS, and MICHAEL D. TYLER Second language learners' vocabulary expansion is associated with improved second language vowel intelligibility 643
