## Contents Volume 76

No. 1 (February 2009)

Outbreak of subclinical mastitis in a flock of dairy goats associated with atypical <i>Staphylococcus haemolyticus</i> <b>G Leitner, S Sela, O Hammer-Muntz, D Zivotofsky, L Weisblit, M Chaffer and S Zamir</b>	1
A comparison of management practices, farmer-perceived disease incidence and winter housing on organic and non-organic dairy farms in the UK <b>FM Langford, KMD Rutherford, MC Jack, L Sherwood, AB Lawrence and MJ Haskell</b>	6
Plasma vasopressin and oxytocin concentrations increase simultaneously during suckling in goats <b>K Olsson and M Högberg</b>	15
Effects on goat milk quality of the presence of <i>Mycoplasma</i> spp. in herds without symptoms of contagious agalactia <b>C de la Fe, A Sánchez, A Gutierrez, A Contreras, JC Corrales, P Assunção, C Poveda and JB Poveda</b>	20
Association between isolation of <i>Staphylococcus aureus</i> one week after calving and milk yield, somatic cell count, clinical mastitis, and culling through the remaining lactation <b>AC Whist, O Østerås and L Sølvørød</b>	24
The role of teat skin contamination in the epidemiology of <i>Staphylococcus aureus</i> intramammary infections <b>R Piccinini, L Cesaris, V Daprà, V Borromeo, C Picozzi, C Secchi and A Zecconi</b>	36
Potential and limitation of mid-infrared attenuated total reflectance spectroscopy for real time analysis of raw milk in milking lines <b>R Linker and Y Etzion</b>	42
The effect of short-term hyperammonaemia on milk synthesis in dairy cows <b>NG Purdie, DR Trout, SRL Cieslar, TG Madsen, DP Poppi and JP Cant</b>	49
The effects of two out-wintering pad systems compared with free-stalls on dairy cow hoof and limb health <b>KKM O'Driscoll, A Hanlon, P French and LA Boyle</b>	59
Influence of space allowance and housing conditions on the welfare, immune response and production performance of dairy ewes <b>M Caroprese, G Annicchiarico, L Schena, A Muscio, R Migliore and A Sevi</b>	66
Suitability of high pressure-homogenized milk for the production of probiotic fermented milk containing <i>Lactobacillus paracasei</i> and <i>Lactobacillus acidophilus</i> <b>F Patrignani, P Burns, D Serrazanetti, G Vinderola, J Reinheimer, R Lanciotti and ME Guerzoni</b>	74
Focusing on casein gene cluster and protein profile in Garganica goat milk <b>M Albenzio, A Santillo, F d'Angelo and A Sevi</b>	83
Exopolysaccharide-producing mesophilic lactic cultures for preparation of fat-free Dahi – an Indian fermented milk <b>P Behare, R Singh and RP Singh</b>	90
Synbiotic effect of <i>Lactobacillus helveticus</i> M92 and prebiotics on the intestinal microflora and immune system of mice <b>J Frece, B Kos, IK Svetec, Z Zgaga, J Beganović, A Leboš and J Šušković</b>	98
Use of FTIR and mass spectrometry for characterization of glycated caseins <b>CM Oliver, A Kher, D McNaughton and MA Augustin</b>	105
Interaction between <i>Lactobacillus kefir</i> and <i>Saccharomyces lipolytica</i> isolated from kefir grains: evidence for lectin-like activity of bacterial surface proteins <b>MA Golowcyc, P Mobili, GL Garrote, M de los Angeles Serradell, AG Abraham and GL De Antoni</b>	111
Monitoring major mastitis pathogens at the population level based on examination of bulk tank milk samples <b>D Rysanek, M Zouharova and V Babak</b>	117

Forage to concentrate ratio in Jonica breed goats: influence on lactation curve and milk composition <b>V Tufarelli, M Dario and V Laudadio</b>	124
<b>Erratum</b>	
<b>Renan M, Guyomarc'h F, Arnoult-Delest V, Pâquet D, Brulé G &amp; Famelart M-H</b> 2007 The rebodding of stirred yogurt: interactions between proteins. <i>Journal of Dairy Research</i> <b>75</b> 450–456	128
No. 2 (May 2009)	
Prevalence of intramammary infection in Dutch dairy herds <b>O Sampimon, HW Barkema, I Berends, J Sol and T Lam</b>	129
Milk production and composition in Malagueña dairy goats. Effect of genotype for synthesis of $\alpha_{s1}$ -casein on milk production and its interaction with dietary protein content <b>G de la T Adarve, ER Morales, JMS Manrique, FG Extremera and MRS Sampelayo</b>	137
Effect of bovine lactoferrin on the internalization of coagulase-negative staphylococci into bovine mammary epithelial cells under in-vitro conditions <b>P Hyvönen, S Käyhkö, S Taponen, A von Wright and S Pyörälä</b>	144
Crude goat whey fermentation by <i>Kluyveromyces marxianus</i> and <i>Lactobacillus rhamnosus</i> : contribution to proteolysis and ACE inhibitory activity <b>V Hamme, F Sannier, J-M Piot, S Didelot and S Bordenave-Juchereau</b>	152
Anti-atopic dermatitis effects and the mechanism of lactic acid bacteria isolated from Mongolian fermented milk <b>A Hayashi, M Kimura, Y Nakamura and H Yasui</b>	158
Supplemental fish oil does not alter immune competence or the pathophysiological response to an intramammary infusion of endotoxin in peri-partum multiparous Holstein cows <b>MA Ballou, RC Gomes and EJ DePeters</b>	165
Evaluation of the serum fructosamine test to monitor plasma glucose concentration in the transition dairy cow <b>ML Sorondo and A Cirio</b>	173
Prevalence of pathogens in milk samples of dairy cows with clinical mastitis and in heifers at first parturition <b>B-A Tenhagen, I Hansen, A Reinecke and W Heuwieser</b>	179
Application of a multiplex PCR assay for the detection of <i>Shigella</i> , <i>Escherichia coli</i> and Shiga toxin-producing <i>Esch. coli</i> in milk <b>S Riyaz-Ul-Hassan, S Syed, S Johri, V Verma and GN Qazi</b>	188
Relationship between somatic cell count, polymorphonuclear leucocyte count and quality parameters in bovine bulk tank milk <b>E Wickström, K Persson-Waller, H Lindmark-Månsson, K Östensson and Å Sternesjö</b>	195
Diet selection and milk production and composition in Girgentana goats with different $\alpha_{s1}$ -casein genotype <b>M Avondo, RI Pagano, AM Guastella, A Criscione, M Di Gloria, B Valenti, G Piccione and P Pennisi</b>	202
Effect of somatic cell counts on ewes' milk protein profile and cheese-making properties in different sheep breeds reared in Spain <b>I Revilla, JM Rodríguez-Nogales and AM Vivar-Quintana</b>	210
Safety Assessment of <i>Lactobacillus fermentum</i> CECT5716, a probiotic strain isolated from human milk <b>F Lara-Villoslada, S Sierra, MP Díaz-Ropero, JM Rodríguez, J Xaus and M Olivares</b>	216
Milk ejection disorders in Swiss dairy cows: a field study <b>CJ Belo, S Schlegel, J Moll, E Möstl and RM Bruckmaier</b>	222
Enumeration of starter cultures during yogurt production using Petrifilm™ AC plates associated with acidified MRS and M17 broths <b>MM Gonçalves, R Freitas, LA Nero and AF Carvalho</b>	229
Impact of policy-induced structural change on milk quality: evidence from the Flemish dairy sector <b>B Van der Straeten, J Buysse, G Van Huylenbroeck and L Lauwers</b>	234
Effect of sunflower-seed oil or linseed oil on milk fatty acid secretion and lipogenic gene expression in goats fed hay-based diets <b>L Bernard, C Leroux, Y Faulconnier, D Durand, KJ Shingfield and Y Chilliard</b>	241
A compartmental model describing changes in progesterone concentrations during the oestrous cycle <b>S Meier, JR Roche, ES Kolver and RC Boston</b>	249

Milk concentration of the mammalian lignan enterolactone, milk production, milk fatty acid profile, and digestibility in dairy cows fed diets containing whole flaxseed or flaxseed meal <b>HV Petit, N Gagnon, PS Mir, R Cao and S Cui</b>	257
Evaluation of different primers for PCR-DGGE analysis of cheese-associated enterococci <b>PM Lorbeg, AC Majhenič and I Rogelj</b>	265
Milk flow-controlled changes of pulsation ratio and pulsation rate affect milking characteristics in dairy cows <b>S Ambord and RM Bruckmaier</b>	272
Conjugated linoleic acid (CLA) and fatty acid composition of milk, curd and Grana Padano cheese in conventional and organic farming systems <b>A Prandini, S Sigolo and G Piva</b>	278
Influence of somatic cell counts and breed on physico-chemical and sensory characteristics of hard ewes'-milk cheeses <b>I Revilla, MA Lurueña-Martínez and AM Vivar-Quintana</b>	283
Comparison of the level of residual coagulant activity in different cheese varieties <b>N Bansal, PF Fox and PLH McSweeney</b>	290
Effect of high-pressure homogenisation on rheological properties of rennet-induced skim milk and standardized milk gels <b>K Lodaite, F Chevalier, E Armaforte and AL Kelly</b>	294
Seasonal changes in the technological and compositional quality of ewe's raw milks from commercial flocks under part-time grazing <b>AI Nájera, LJR Barron, P Ribeiro, F Pélissier, E Abilleira, FJ Pérez-Elortondo, M Albisu, J Salmerón, JC Ruiz de Gordo, M Virto, L Oregi, R Ruiz and M de Renobales</b>	301
Comparison of the activity of human and bovine milk on two cell lines <b>C Pocoví, C Conesa, C Barbana, MD Pérez, M Calvo and L Sánchez</b>	308
Bifidogenic effect and stimulation of short chain fatty acid production in human faecal slurry cultures by oligosaccharides derived from lactose and lactulose <b>A Cardelle-Cobas, M Fernández, N Salazar, C Martínez-Villaluenga, M Villamiel, P Ruas-Madiedo and CG de los Reyes-Gavilán</b>	317
Prediction of total quarter milk somatic cell counts based on foremilk sampling <b>O Wellnitz, MG Doherr, M Woloszyn and RM Bruckmaier</b>	326
Long-term effects on heifer performance of an enhanced-growth feeding programme applied during the preweaning period <b>M Terré, C Tejero and A Bach</b>	331
Administration of a live culture of <i>Lactococcus lactis</i> DPC 3147 into the bovine mammary gland stimulates the local host immune response, particularly <i>IL-1<math>\beta</math></i> and <i>IL-8</i> gene expression <b>C Beecher, M Daly, DP Berry, K Klostermann, J Flynn, W Meaney, C Hill, TV McCarthy, RP Ross and L Giblin</b>	340
Influence of the emulsion droplet type on the rheological characteristics and microstructure of rennet gels from reconstituted milk <b>Z Gaygadhiev, A Hill and M Corredig</b>	349
Cell population, viability, and some key immunomodulatory molecules in different milk somatic cell samples in dairy cows <b>A Baumert, RM Bruckmaier and O Wellnitz</b>	356
Electronic Nose analysis of milk from cows grazing on two different Alpine vegetation types <b>L Falchero, G Sala, A Gorlier, G Lombardi, M Lonati and G Masoero</b>	365
Supplementing dairy steers and organically managed dairy cows with synthetic vitamin D <sub>3</sub> is unnecessary at pasture during exposure to summer sunlight <b>L Hymøller, SK Jensen, H Lindquist, B Johansson, MO Nielsen and E Nadeau</b>	372
Goat whey fermentation by <i>Kluyveromyces marxianus</i> and <i>Lactobacillus rhamnosus</i> release tryptophan and tryptophan-lactokinin from a cryptic zone of alpha-lactalbumin <b>V Hamme, F Sannier, J-M Piot and S Bordenave-Juchereau</b>	379

Antioxidant and cholesterol assimilation activities of selected lactobacilli and lactococci cultures <b>S Jain, H Yadav and PR Sinha</b>	385
Sheep and goats differences in CLA and fatty acids milk fat content in relation with mRNA stearoyl-CoA desaturase and lipogenic genes expression in their mammary gland <b>E Tsiplakou, E Fletmetakis, C Kalloniati, G Papadomichelakis, P Katinakis and G Zervas</b>	392
Milk yield, udder health and reproductive performance in Swedish organic and conventional dairy herds <b>N Fall and U Emanuelson</b>	402
Use of serum amyloid A and milk amyloid A in the diagnosis of subclinical mastitis in dairy cows <b>G Gerardi, D Bernardini, CA Elia, V Ferrari, L Iob and S Segato</b>	411
Isolation of lactobacilli from sow milk and evaluation of their probiotic potential <b>R Martín, S Delgado, A Maldonado, E Jiménez, M Olivares, L Fernández, OJ Sobrino and JM Rodríguez</b>	418
Lactoferrin concentrations in bovine milk prior to dry-off <b>KA Newman, PJ Rajala-Schultz, J Lakritz and FJ DeGraves</b>	426
Evidence for the presence of restriction/modification systems in <i>Lactobacillus delbrueckii</i> <b>V Suárez, M Zago, G Giraffa, J Reinheimer and A Quiberoni</b>	433
Genetic polymorphism of STAT5A protein: relationships with production traits and milk composition in Italian Brown cattle <b>M Selvaggi, C Dario, G Normanno, GV Celano and M Dario</b>	441
Mechanisms involved in the immunostimulation by probiotic fermented milk <b>CM Galdeano, A de Moreno de LeBlanc, E Carmuega, R Weill and G Perdigón</b>	446
Weekly excretion of the mammalian lignan enterolactone in milk of dairy cows fed flaxseed meal <b>N Gagnon, C Côrtes and HV Petit</b>	455
TNF $\alpha$ -mediated plasminogen activation on neutrophils is involved in the high plasmin activity in mammary secretion of drying-off cows <b>WK Chou, TC Yu, SE Chen, HC Peh, WB Liu, MT Chen, H Nagahata and CJ Chang</b>	459
Effect of fermented milk containing <i>Lactobacillus acidophilus</i> and <i>Bifidobacterium longum</i> on plasma lipids of women with normal or moderately elevated cholesterol <b>S Andrade and N Borges</b>	469
The interaction of monensin and flaxseed hulls on ruminal and milk concentration of the mammalian lignan enterolactone in late-lactating dairy cows <b>HV Petit, C Côrtes, D da Silva, R Kazama, N Gagnon, C Benchaar, GT dos Santos and LM Zeoula</b>	475
Haptoglobin and serum amyloid A in bulk tank milk in relation to raw milk quality <b>M Åkerstedt, K Persson Waller and Å Sternesjö</b>	483
Reliability of the bulk milk somatic cell count as an indication of average herd somatic cell count <b>J Lievaart, HW Barkema, H Hogeveen and W Kremer</b>	490
Utilization of nitrogen and energy from diets containing protein and fat derived from either goat milk or cow milk <b>L Sanz Ceballos, E Ramos Morales, L Pérez Martínez, F Gil Extremera and MR Sanz Sampelayo</b>	497

# Instructions to contributors

Full Directions to Contributors, of which this is a summary, can be found at the following web site  
[http://titles.cambridge.org/journals/journal\\_catalogue.asp?mnemonic=dar](http://titles.cambridge.org/journals/journal_catalogue.asp?mnemonic=dar)

## General

The *Journal of Dairy Research* publishes reports on all aspects of dairy science from any country. Material for publication should be sent to the Editor: **DG Chamberlain, Hannah Research Park, Mauchline Road, Ayr KA6 5HL, UK.** Receipt of all material will be acknowledged. Submission of a paper will be taken to imply that it reports original unpublished work, that it is not under consideration elsewhere, and that if accepted by the Journal it will not be published elsewhere in any language without the consent of the Editors. Authors of articles published in the journal assign copyright to Cambridge University Press (with certain rights reserved) and you will receive a copyright assignment form for signature on acceptance of your paper.

## Submission of Papers

Papers should be written in English using the spelling of the Concise Oxford Dictionary and should as far as possible be comprehensible to the non-specialist reader. They should be concise, but without omitting necessary material, and contain sufficient detail to allow repetition of the work.

Papers may be submitted electronically. The summary should be included as a separate Word file suitable for distribution to potential referees. Electronic submissions may be sent by post on disc or as e-mail attachments ([jdr@hannahresearch.org.uk](mailto:jdr@hannahresearch.org.uk)) and may be as a Word document or an Adobe Acrobat file. Submitted manuscripts must be limited in length to a maximum of 5000 words allowing 250 words per fig or table. This is approximately the equivalent of a Word document of 18 A4 pages of doublespaced 12pt Times New Roman font.

## Layout of Papers

Authors should consult the most recent issue of the Journal to familiarize themselves with Journal conventions and layout. Attention to these and other details will speed publication.

The paper should generally be divided as follows. (a) **Cover sheet** with the title of the article, names of authors each with one forename, together with their affiliations, a shortened version of the title suitable as a heading, and the name, postal address and e-mail address for correspondence. (b) A brief **Summary** should encapsulate the whole paper, showing clearly the new knowledge acquired. (c) The **introduction**, without heading, should not contain a full literature review, but should indicate why the subject of enquiry is interesting or important, and why the authors have chosen the approach described. (d) The Experimental or **Materials and Methods** section should contain adequate descriptions of procedures or appropriate references; sources of all materials (including address with post code) and sources or strains of animals, microorganisms and so on should be indicated. (e) **Results** should be as concise as possible, without repetition or inclusion of irrelevant material. Tables and illustrations should be used efficiently. (f) The **Discussion** should not repeat the results but discuss their significance. A combined **Results and Discussion** section is quite acceptable. Any acknowledgements are given in a separate paragraph without heading. It is the responsibility of the authors to ensure that individuals or organizations acknowledged as providing materials or otherwise are willing to be identified. (g) **References.** For some types of paper, other divisions may be preferable. **Pages** should be numbered; the addition of line numbers will aid refereeing.

## References

References should be given in the text as Brown & Jones (1987) or (Schmidt, 1985; Nakamura et al. 1989); the first author with et al. is used for papers with three or more authors. Where necessary, papers are distinguished as Lenoir (1988a), (Litov et al 1990a, b). When several references appear together in the text, cite them in chronological order, and alphabetically within years. The Reference list at the end of the paper, which should begin on a fresh page, is given in strict alphabetical order. Authors should refer to a recent issue for the format of references.

## Tables

Tables should be numbered and carry headings enabling them to be understood without reference to the text. Each Table should be typed on a separate sheet. Symbols for footnotes should be in the order : †, ‡, §, ¶, ††, etc. The use of \*, \*\*, etc, should be limited to indicating levels of significance.

## Illustrations

Printed originals of figures and photographs should be provided as best possible quality. Figures such as graphs must be supplied in an editable file format, such as Excel. The use of bar graphs and histograms should be restricted, as the information can often be better presented in a table. In the presentation of results, experimental points should be indicated by symbols, used in order: ○, ●, △, ▲, □, ■, ×, +. Scale marks should be on the inside of the axes. Each Figure should be provided with a legend such that with the Figure it is comprehensible without reference to the text. Figure legends should be typed on a separate sheet or sheets, beginning Fig. 1.

Photographs should be glossy black and white prints accompanied by a legend as above. Scale bars on the photograph should be used, not magnifications in the legend. Colour plates can be included but these will normally result in a charge to the authors. Uncompressed electronic copies (e.g. TIFF files) may also be supplied.

## Statistical Treatment

Individual results should not normally be given. The methods of statistical analysis should be clearly described; a suitable reference is adequate. Authors should make it clear whether they are quoting (e.g.) SD or SE. Any statement that two groups of values are different should be supported by the level of significance involved, as a single or range of *P* value: (*P* = 0.008) or (*P* < 0.01). Differences should not be claimed or implied if *P* > 0.05.

## Ethics of Experiments

Authors are expected to adhere to the relevant codes covering human subjects and the use of animals.

## Proofs

Authors will be advised when to expect proofs, which should be returned without delay to the appropriate editor. Proofs are sent for the correction of any printer's or editorial errors, not for addition of new material or revision of the text. Excessive alteration may have to be disallowed or made at the authors' expense, and may delay publication. Order forms for offprints are sent with proofs and should be returned directly to The Cambridge University Press.

# journal of dairy research

Volume 76 Number 4 November 2009

## Original Articles

- Antioxidant and cholesterol assimilation activities of selected lactobacilli and lactococci cultures  
**S Jain, H Yadav and PR Sinha** 385
- Sheep and goats differences in CLA and fatty acids milk fat content in relation with mRNA stearoyl-CoA desaturase and lipogenic genes expression in their mammary gland  
**E Tsiplakou, E Flietakis, C Kalloniati, G Papadomichelakis, P Katinakis and G Zervas** 392
- Milk yield, udder health and reproductive performance in Swedish organic and conventional dairy herds  
**N Fall and U Emanuelson** 402
- Use of serum amyloid A and milk amyloid A in the diagnosis of subclinical mastitis in dairy cows  
**G Gerardi, D Bernardini, CA Elia, V Ferrari, L Iob and S Segato** 411
- Isolation of lactobacilli from sow milk and evaluation of their probiotic potential  
**R Martín, S Delgado, A Maldonado, E Jiménez, M Olivares, L Fernández, OJ Sobrino and JM Rodríguez** 418
- Lactoferrin concentrations in bovine milk prior to dry-off  
**KA Newman, PJ Rajala-Schultz, J Lakritz and FJ DeGraves** 426
- Evidence for the presence of restriction/modification systems in *Lactobacillus delbrueckii*  
**V Suárez, M Zago, G Giraffa, J Reinheimer and A Quiberoni** 433
- Genetic polymorphism of STAT5A protein: relationships with production traits and milk composition in Italian Brown cattle  
**M Selvaggi, C Dario, G Normanno, GV Celano and M Dario** 441
- Mechanisms involved in the immunostimulation by probiotic fermented milk  
**CM Galdeano, A de Moreno de LeBlanc, E Carmuega, R Weill and G Perdigón** 446
- Weekly excretion of the mammalian lignan enterolactone in milk of dairy cows fed flaxseed meal  
**N Gagnon, C Côrtes and HV Petit** 455
- TNF $\alpha$ -mediated plasminogen activation on neutrophils is involved in the high plasmin activity in mammary secretion of drying-off cows  
**WK Chou, TC Yu, SE Chen, HC Peh, WB Liu, MT Chen, H Nagahata and CJ Chang** 459
- Effect of fermented milk containing *Lactobacillus acidophilus* and *Bifidobacterium longum* on plasma lipids of women with normal or moderately elevated cholesterol  
**S Andrade and N Borges** 469
- The interaction of monensin and flaxseed hulls on ruminal and milk concentration of the mammalian lignan enterolactone in late-lactating dairy cows  
**HV Petit, C Côrtes, D da Silva, R Kazama, N Gagnon, C Benchaar, GT dos Santos and LM Zeoula** 475
- Haptoglobin and serum amyloid A in bulk tank milk in relation to raw milk quality  
**M Åkerstedt, K Persson Waller and Å Sternesjö** 483
- Reliability of the bulk milk somatic cell count as an indication of average herd somatic cell count  
**J Lievaart, HW Barkema, H Hogeveen and W Kremer** 490
- Utilization of nitrogen and energy from diets containing protein and fat derived from either goat milk or cow milk  
**L Sanz Ceballos, E Ramos Morales, L Pérez Martínez, F Gil Extremera and MR Sanz Sampelayo** 497
