

Information for Contributors

1. Manuscripts must be written in English. All manuscripts will be referred to acknowledged experts in the subject. Only those receiving favorable recommendations from the referees will be accepted for publication. Manuscripts may be sent to any Board member, any Associate Editor or the Editor.
2. Manuscripts should be double spaced, on one side of good grade paper, allowing a reasonable left-hand margin. An original and two copies should be submitted with the author's full postal address, phone and/or fax numbers, position, and affiliations.
3. The title and section headings should highlight the significant points. A short abstract should precede the main text.
4. One copy of photographs, prints or transparencies of good quality and unmarked should be submitted. Where lines or lettering are to appear on the photograph, an additional print should be supplied appropriately marked. Each should have, lightly written on the back, the author's name, the figure number and an indication of which is the top of the picture.
5. One copy of each line diagram should be submitted at approximately twice final size and unlettered. Diagrams must be drawn in indian ink on plain white or transparent paper. A second copy should be supplied with lettering included. The author's name and the figure number should be written on this copy.
6. Tables should be typewritten on separate sheets. Avoid, where possible, very wide tables.
7. References and footnotes should be cited according to the Harvard (Author/date) system, also known as the "British form". In the text, author and year are cited in parentheses e.g. "... was found by McCarthy (1980, 1980a)..." or "(Emmett *et al.* 1972)". Full references are listed in alphabetic order at the end of the paper. References are not numbered. An example of a reference list is:
DEUTSCH, C. & KLARSFELD, S. 1973 *Phys. Rev. A7*, 2081.
NICHOLSON, D. R. 1983 *Plasma Theory* (John Wiley, New York).
OOMURA, H. *et al.* 1982 *Res. Rep ILE*, ILE-8207p.
OOMURA, H. *et al.* 1982a *Trans. Ans* 43, 617.
Note that the year of publication appears after the author's name. If possible, all authors names should be listed in preference to "*et al.*" If one author or team is referred to more than once in any year, the letters a, b, etc should be added after the year to distinguish the individual references.
8. Correction to proofs should be restricted to printers' errors only. Authors are entitled to 25 offprints of their article free of charge. Additional offprints may be purchased if they are ordered on the form sent with the proofs.

LASER AND PARTICLE BEAMS

Pulse Power and High Energy Densities

Volume 9, Number 3, 1991

- G. H. Miley (U. Illinois, USA):** In Commemoration of Heinrich Hora's 60th Birthday 653
- E. C. Harvey and M. J. Shaw (Rutherford Appleton Lab., Oxon, UK):** A simple kinetic model for electron-beam-pumped KrF lasers 659
- T. Häuser and W. Scheid (Inst. Theoretische Physik, Giessen, Germany):** Energy and angular distribution of ions emitted from a plasma after relativistic self-focusing of laser beams 675
- V. M. Bystritskii, Y. A. Glyshko, A. A. Sinebrjukhov, and A. V. Kharlov (Inst. Electrophys., Sverdlovsk, USSR):** Experiments on high-power ion beam generation in self-insulated diodes 691
- V. M. Bystritskii, I. V. Lisitsyn (Inst. Electrophys., Sverdlovsk, USSR), S. N. Volkov, Y. E. Krasik, and N. M. Polkovnikova (Inst. Nuc. Phys., Tomsk, USSR):** Generation and focusing of high-power ion beams in a magnetically insulated diode with applied B field 699
- J. W.-K. Mark (LLNL, Livermore, CA, USA):** Recent Livermore research on ion beam fusion targets: Utilization of direct-drive efficiency during optimization of symmetry and utilization of polarized DT fuel 713
- C. Stöckl and G. D. Tsakiris (MPI, Garching, Germany):** Experiments with laser-irradiated cylindrical targets 725
- V. J. Harper-Slaboszewicz and W. E. Fowler (SNL, Albuquerque, NM, USA):** Measurements of the divergence of a 10-MA relativistic electron beam transported in a gas cell 749
- N. W. Kaiser, J. Meyer-ter-Vehn (MPI, Garching, Germany), and R. Ramis (E.T.S.I., Madrid, Spain):** Numerical study of an X-ray-driven carbon foil 759
- F. Dahmani and T. Kerdja (Lab. de Fusion Thermonuc., Algiers, Algeria):** Measurements and laser-wavelength dependence of mass-ablation rate and ablation pressure in planar layered targets 769
