

The AERONAUTICAL Journal

G. Mengali Aircraft dynamics optimisation via linear matrix inequalities	313
J.J. Wang and F. Chen On the start condition of a second-throat ejector–diffuser	321
D.D. Liu, P.C. Chen, Z.X. Yao and D. Sarhaddi Recent advances in lifting surface methods	327
J. Schweiger, F. Weiss and S.K. Dobbs Aeroelastic design and flight test evaluation of the Ranger 2000 training aircraft	341
S.C.M. Yu and W.K. Chan <i>Technical Note:</i> Effects of a central straight on an S-shaped diffusing duct	351
S.P. Williams and K.P. Garry An experimental investigation into yaw control at high alpha on a chined forebody using slot blowing	355
Book Reviews	364

The AERONAUTICAL Journal

Volume 100 Number 998 October 1996

Editor

Professor J.L. Stollery, CBE, DSc(Eng),
DIC, FCGI, FEng, Hon FRAeS

Managing Editor

B.F. Baldwin, BSc, MRAeS

Deputy Editor

S.M. Penney, BEng, CEng, MRAeS

Assistant Editors

C.S.C. Male, BSc(Eng), Grad RAeS
J.A. Price, BA, Grad RAeS

EXCEPT JUNE AND AUGUST**

Aims and scope

The aims and scope of *The Aeronautical Journal* are intended to reflect the objectives of the Society as expressed in its Charter of Incorporation. Briefly these are to encourage and foster the advancement of all aspects of aeronautical and space science. Thus the topics of the *Journal* include all those which are covered by the various Sections and Groups of the Society such as fluid mechanics and aerodynamics, propulsion, structures and materials, rotorcraft, astronautics and guided flight, dynamics and control, aeromarine technology, aviation medicine, air transport, airworthiness and maintenance, test flying, flight simulation, air law, management studies, history of aviation and manpowered aircraft. Thus papers are solicited on all aspects of research, design and development, construction and operation of aircraft and space vehicles. Papers are also welcomed which review, comprehensively, the results of recent research developments in any of the above topics. For further information on the submission of papers, see Guidelines for Authors, p 340.

Editorial Advisory Board

Chairman: Dr E.W.E. Rogers

Aerodynamics

Professor P.W. Bearman, *Department of Aeronautics, Imperial College*

Aerospace medicine

Air Vice Marshal P. Howard, *formerly RAF Institute of Aviation Medicine*

Air traffic control and simulation

G.C. Howell, *former Civil Aviation Authority chief scientist*

Airworthiness

R. Ashford, *formerly Civil Aviation Authority and the European Joint Aviation Authorities*

Avionics and systems

Professor D. McLean, *Department of Aeronautics & Astronautics, University of Southampton*
P.A. Hearne, *formerly GEC-Marconi Avionics*

Computational fluid mechanics and propulsion

Professor P. Stow, *Rolls-Royce*

Flight testing, flight operations and air transport

Captain W.D. Lowe, *British Airways*

Maintenance and airworthiness

G.B. Ratcliffe, *RAeS Airworthiness and Maintenance Committee*

Noise, aeroelasticity and fluid mechanics

Professor E.G. Broadbent, *Department of Mathematics, Imperial College*

Rotorcraft and structural dynamics

Professor D.E.H. Balmford, *formerly of Westland Helicopters*

Space technology

R. Gibson, *Inmarsat*

Structures and materials

T. Sharples, *Military Aircraft Division, BAe Defence*
