Epidemiology and Infection

Editor-in-Chief

Norman Noah, London School of Hygiene and Tropical Medicine, UK

Epidemiology and Infection publishes original reports and reviews on all aspects of infection in humans and animals. Particular emphasis is given to the epidemiology, prevention and control of infectious diseases. The field covered is broad and includes the zoonoses, tropical infections, food hygiene, vaccine studies, statistics and the clinical, social and public health aspects of infectious disease. Papers covering microbiology and immunology, which have an epidemiological relevance, are part of this broad field. Papers come from medical and veterinary scientists worldwide. It has become the key periodical in which to find the latest reports on recently discovered infections and new technology. For those concerned with policy and planning for the control of infections, the papers on mathematical modelling of epidemics caused by historical, current and emergent infections, will be of particular value.

Cover Artwork

Anticipation, acrylic painting on canvas by Mary Palmer

Mary Palmer believes that as an artist, she harnesses her passion and talent for art and design, creating artwork that connects with individuals and creates long lasting, memorable experiences.

Quite simply, her passion and talent is fueled from a love of fine art and architectural illustration. With many years of experience, her work is part of hundreds of corporate and private collections. More formally, her skills are built upon multiple high-quality educational experiences while at Bradley (Peoria, Illinois USA), Eastern Illinois University, Harrington College of Design (Chicago, Illinois USA), and the School of the Art Institute of Chicago. As an artist, she thoroughly enjoys each opportunity to create something that connects with individuals and creates long lasting, memorable experiences

Her work can be viewed at her web site: www.marypalmerartist.com.

Aims and Scope: The mission of *Prehospital and Disaster Medicine* (PDM) is the distribution of information relevant to the practice of out-of-hospital and in-hospital emergency medical care, disaster health, and public health and safety. PDM provides an international forum for the reporting and discussion of scientific studies, both quantitative and qualitative, that have relevance to the above practices. The major objectives are: (1) the improvement of the types and quality of the care delivered to patients with perceived medical emergencies and to victims of multi-casualty accidents or disasters, including the public health and safety aspects of such events; and (2) the prevention and/or mitigation of the occurrence of such events and of the effects of these events upon the human population and environment.

Editorial Office: Prehospital and Disaster Medicine, 3330 University Avenue, Suite 130, Madison, Wisconsin 53705, USA. Telephone: (+1) (608) 819-6604; Facsimile (+1) (608) 819-6055; E-mail: pdm@wadem.org
