## But for people like them it might still be bedlam

From madhouse asylums to modern, community-based care, the past century and a half has seen dramatic changes in our approach to mental health. All of which is largely to the credit of pioneering psychiatrists, people like Maudsley and Stengel, who let wisdom be their guide.

Lundbeck is pleased to congratulate The Royal College of Psychiatrists on these 150 years of progress. We look forward to the years to come.
