The editor for the Journal of the Australian Mathematical Society has retracted the article ‘The Kronecker–Weyl equidistribution theorem and geodesics in 3-manifolds’ after a request to do so from the authors [1], who brought to the attention of the editor and publisher that this paper depends on a result of another paper [2] in which a fatal error has since been found.

The article PDF has been watermarked and the Abstract and HTML version have been amended to state that the article has been retracted.
