

## Instructions to Contributors.

Articles submitted for publication in the *Geological Magazine* should be addressed to the Editors at the *Sedgwick Museum, Cambridge*, not to the Publishers.

Manuscripts should be typewritten, double-spaced, and preferably with a wide margin, and should be carefully revised; they should be as concise as possible, and in no case should an article exceed 10,000 words. MS. must be accompanied by a short abstract, 50–100 words. References should not be given in footnotes, but arranged in alphabetic order of author's names at the end of the article; the author's name should be followed by date of publication, and the title of each paper should be given in addition to volume and page numbers of the Journal, thus:—

LAPWORTH, C. 1878. The Moffat Series. *Quart. Journ. Geol. Soc.*, xxxiv, 240–343.

References should be cited in the text by author's name and date, with page reference if necessary, in brackets:—(Lapworth, 1878, p. 339).

Illustrations should be so drawn as to allow reduction to a maximum size of  $6\frac{3}{4} \times 3\frac{3}{4}$  inches (the type-area of the Magazine) and originals must not exceed  $40 \times 22$  inches. Map lettering should be such as to be clearly legible after reduction (equivalent to 5-point as a *minimum* on reduction), while lettering on text-figures should in general be left in pencil for printing.

Authors will receive 25 reprints free of cost.

# THE COALFIELDS OF GREAT BRITAIN

*Edited by*

SIR ARTHUR TRUEMAN, K.B.E., F.R.S.

This book presents a balanced account of the geology of coal, and of the structure and resources of the coalfields of Great Britain, taking into account recent progress especially in the correlation and identification of seams through the fossils they possess. Chapters on the various fields have been contributed by experts who have worked in the fields, including Professor L. R. Moore, Dr. C. J. Stubblefield, Wilfrid Edwards, Dr. F. M. Trotter, Professor F. W. Cope, Professor Alan Wood, Dr. G. H. Mitchell, Dr. W. Hopkins, and Dr. Murray Macgregor.

408 pages with 7 plates and 106 maps and sections. 63s. net.

# Rocks and Mineral Deposits

by Paul Niggli

An English translation by Robert L. Parker of *Gesteine und Minerallagerstätten*, vol. 1.

563 pp. 331 figs. 73 tables. 102/-

Pre-publication price until 20th April 82/6

“A monograph on paragenetic mineralogy which considers the formation of rocks and mineral deposits from the threefold viewpoint of composition, spatial relationships and genetics.”—*American Mineralogist*.

## Petrography

by Howel Williams, Francis J. Turner and Charles M. Gilbert

417 pp. 133 illus. by Howel Williams 56/-

An introduction to the study of rocks in thin section, with new drawings from all over the world and an up-to-date survey of the three basic classes of rocks.

## The Permian Reef Complex of the Guadalupe Mountains Region, Texas and New Mexico

by Norman D. Newell, *et al.*

308 pp. 225 half-tone illus. on 32 pls. 85 figs. 64/-

A study in palaeoecology: a summary of the problems raised by fossil reefs and an attempt to solve them, with special reference to those reefs of this area long celebrated for their extraordinary development.
