

## EDITORIAL NOTE

During the printing dispute, two hundred members were accidentally sent two copies of the last number of *Oryx*, April, 1959. We are therefore desperately short of that issue and would be specially grateful for any which are returned to us.

Other back numbers will be gratefully accepted also.

This Report takes the place of the usual August *Oryx*. On account of its urgency it was specially printed, notwithstanding the printing dispute. It and the following articles in *Oryx* IV, 6, December, 1958, were prepared for the Survival Service Commission of the International Union for the Conservation of Nature and Natural Resources :

“ Four Rare Indian Animals,” by E. P. Gee.

“ Saving North America’s Endangered Species,” by Frederick C. Lincoln, D.Sc.
