

# PROCEEDINGS OF THE NUTRITION SOCIETY

## DIRECTIONS TO CONTRIBUTORS

The Nutrition Society will publish in its *Proceedings* papers presented by invitation at symposia of the Society and abstracts of original communications presented at other meetings.

Invitations to read papers at symposia are issued on the understanding that the persons invited send their papers for publication in the *Proceedings of The Nutrition Society* in the way outlined in the letter of invitation, at least a fortnight before the meeting, and that the papers will not be offered in that form for prior publication in any other journal.

Original communications presented at other meetings of the Society will be recorded in the *Proceedings* by means of an abstract not exceeding 400 words or the equivalent space in print. These abstracts should be submitted as stated in notices calling such meetings. The style of references, abbreviations, symbols and illustrations should be that of the *Proceedings of The Nutrition Society*.

## CORRIGENDUM

### Biochemical aspects of comparative nutrition

By D. C. WATTS

Volume 27 (1968), No. 2, p. 149

Throughout the article:

*for* trichloroacetic acid cycle *read* tricarboxylic acid cycle

Mendel & Ferry, 1919); subsequent citations should appear thus (Osborne *et al.* 1919). When more than one paper by the same authors has appeared in one year the reference should be given as follows: Osborne & Mendel (1914*a*); Osborne & Mendel (1914*b*); or Osborne & Mendel (1914*a,b*); Osborne & Mendel, 1914*a*, 1916; Barnett & Robinson, 1942). Where the lists of authors of two papers appearing in the same year begin with the same name but differ subsequently, references after the first full reference should include sufficient names to differentiate between the two papers, e.g. Thomas, Smith *et al.* (1960) or Thomas, Wilson *et al.* (1960). At the end of the paper references should be given in alphabetical order according to the name of the first author of the publication quoted, names with prefixes being entered under the prefix, and should include the author's initials; the title of the paper should not be included. Titles of journals should be abbreviated as in the *World List of Scientific*

*and* *et al.* LONDON: J. AND A. CHURCHILL.

**Units.** Results should be presented in metric units; exceptionally it may also be necessary to include other units in parentheses after the metric units.

Time should be given according to the 24 h clock.

**Statistical Treatment of Results.** In general it is not necessary to publish all the individual results of replicated tests. A statement of the number, their mean value and some appropriate measure of their variability is usually sufficient.

The methods of analysis followed should be indicated, but statistical details, such as tables of analysis of variance, should be given only if they are relevant to the discussion. A statement that the difference between the means for two groups of values is statistically significant should include an indication of the level of significance attained.

**Illustrations.** As a rule illustrations should be about twice the size of the finished block, each on a separate
