1. Publication Title Ergodic Theory and Dynamical Systems	2. Publication Number	3. Filing Date
	605 – 170	10/01/2021

4. Issue Frequency Bimonthly Feb, Apr, Jun, Aug, Oct, Dec	5. Number of Issues Published Annually 6	6. Annual Subscription Price \$3174.00
--	---	---

7. Complete Mailing Address of Known Office of Publication (Not printer) (Street, city, county, state, and ZIP+4®) Cambridge University Press 1 Liberty Plaza New York, NY 10006	Contact Person Nina Iammatteo
	Telephone (Include area code) 2123375004

8. Complete Mailing Address of Headquarters or General Business Office of Publisher (Not printer)
Cambridge University Press
Edinburgh Building, Cambridge CB2 2RU, England

9. Full Names and Complete Mailing Addresses of Publisher, Editor, and Managing Editor (Do not leave blank)

Publisher (Name and complete mailing address)
Cambridge University Press
1 Liberty Plaza
New York, NY 10006

Editor (Name and complete mailing address)
Ian Melbourne, University of Warwick, UK, Richard Sharp, University of Warwick, UK

Managing Editor (Name and complete mailing address)
Cambridge University Press, 1 Liberty Plaza, New York, NY 10006

10. Owner (Do not leave blank. If the publication is owned by a corporation, give the name and address of the corporation immediately followed by the names and addresses of all stockholders owning or holding 1 percent or more of the total amount of stock. If not owned by a corporation, give the names and addresses of the individual owners. If owned by a partnership or other unincorporated firm, give its name and address as well as those of each individual owner. If the publication is published by a nonprofit organization, give its name and address.)

Full Name	Complete Mailing Address
Cambridge University Press	Edinburgh Building Shaftesbury Rd Cambridge CB2 2RU, England

11. Known Bondholders, Mortgagees, and Other Security Holders Owning or Holding 1 Percent or More of Total Amount of Bonds, Mortgages, or Other Securities. If none, check box None

Full Name	Complete Mailing Address

12. Tax Status (For completion by nonprofit organizations authorized to mail at nonprofit rates) (Check one)
The purpose, function, and nonprofit status of this organization and the exempt status for federal income tax purposes:

 Has Changed During Preceding 12 Months (Publisher must submit explanation of change with this statement)

13. Publication Title		14. Issue Date for Circulation Data Below	
Ergodic Theory and Dynamical Systems		08.2021	
15. Extent and Nature of Circulation		Average No. Copies Each Issue During Preceding 12 Months	No. Copies of Single Issue Published Nearest to Filing Date
a. Total Number of Copies (<i>Net press run</i>)		210	130
b. Paid Circulation (<i>By Mail and Outside the Mail</i>)	(1) Mailed Outside-County Paid Subscriptions Stated on PS Form 3541 (Include paid distribution above nominal rate, advertiser's proof copies, and exchange copies)	105	10
	(2) Mailed In-County Paid Subscriptions Stated on PS Form 3541 (<i>Include paid distribution above nominal rate, advertiser's proof copies, and exchange copies</i>)	13	0
	(3) Paid Distribution Outside the Mails Including Sales Through Dealers and Carriers, Street Vendors, Counter Sales, and Other Paid Distribution Outside USPS®	0	72
	(4) Paid Distribution by Other Classes of Mail Through the USPS (e.g., First-Class Mail®)	0	0
c. Total Paid Distribution [<i>Sum of 15b (1), (2), (3), and (4)</i>] ▶		118	82
d. Free or Nominal Rate Distribution (<i>By Mail and Outside the Mail</i>)	(1) Free or Nominal Rate Outside-County Copies included on PS Form 3541	29	6
	(2) Free or Nominal Rate In-County Copies Included on PS Form 3541	13	0
	(3) Free or Nominal Rate Copies Mailed at Other Classes Through the USPS (e.g., First-Class Mail)	0	0
	(4) Free or Nominal Rate Distribution Outside the Mail (<i>Carriers or other means</i>)	0	13
e. Total Free or Nominal Rate Distribution (<i>Sum of 15d (1), (2), (3) and (4)</i>)		42	19
f. Total Distribution (<i>Sum of 15c and 15e</i>) ▶		160	101
g. Copies not Distributed (<i>See Instructions to Publishers #4 (page #3)</i>) ▶		50	29
h. Total (<i>Sum of 15f and g</i>)		210	130
i. Percent Paid (<i>15c divided by 15f times 100</i>) ▶		74	81

I understand that anyone who furnishes false or misleading information on this form or who omits material or information requested on the form may be subject to criminal sanctions (including fines and imprisonment) and/or civil sanctions (including civil penalties).

Mathematics

Books and Journals from Cambridge University Press

Cambridge is a world leading publisher in pure and applied mathematics, with an extensive programme of high quality books and journals that reaches into every corner of the subject.

Our catalogue reflects not only the breadth of mathematics but also its depth, with titles for undergraduate students, for graduate students, for researchers and for users of mathematics.

We are proud to include world class researchers and influential educators amongst our authors, and also to publish in partnership with leading mathematical societies.

INSTRUCTIONS FOR CONTRIBUTORS

Editorial Policy

The journal welcomes high quality contributions on topics closely related to dynamical systems and ergodic theory. Submissions in the field of differential geometry, number theory, operator algebra, differential, topological, symbolic, measurable dynamics and celestial and statistical mechanics are especially welcome. Expository survey papers and reviews of relevant books will be published from time to time.

Submission of manuscripts

Manuscripts should be submitted via the website: <http://mc.manuscriptcentral.com/etds>.

Submission of a paper is taken to imply that it has not been previously published and that it is not being considered for publication elsewhere. Authors of articles published in the journal assign copyright to Cambridge University Press (with certain rights reserved) and you will receive a copyright assignment form for signature on acceptance of your paper.

The journal strongly recommends submission of accepted papers in L^AT_EX using the ETDS L^AT_EX class file. Papers that use this class file will be processed more efficiently. A L^AT_EX2e file `etds.cls` is available via anonymous ftp from the Cambridge University Press site at <ftp.cup.cam.ac.uk> in the directory `/pub/texarchive/journals/latex/etds-cls/`. In case of difficulties with these files, please contact etds@sunrise-setting.co.uk or the Journal editorial office at etds@maths.warwick.ac.uk. Alternatively, authors may use 'article' style.

On acceptance of a paper, authors should upload the L^AT_EX source code including the figures (line figures only) and all author-defined macro and style files, together with a pdf produced using the same file, via the submission site <http://mc.manuscriptcentral.com/etds>.

The publisher reserves the right to typeset any article by conventional means if the author's T_EX code presents problems in production.

Manuscript

Papers should be typed with generous margins. The pages must be numbered.

The first page should give the title, the author's name and institution, and a short abstract intelligible to mathematicians.

The title, while brief, must be informative (e.g. 'A new proof of the ergodic theorem', whereas 'Some applications of a theorem of Birkhoff' would be useless).

Notation

Avoid abbreviations such as Thm, Prop., Eq., iff. In the text do not use symbols \forall , \exists , \Rightarrow and \Leftrightarrow . Fractions are generally best expressed by a solidus. Complicated exponents like $\exp\{z^2 \sin \theta / (1 + y^2)\}$ should be shown in this and no other way.

It helps if displayed equations or statements which will be quoted later are numbered in order on the right of their line. They can then be referred to by, for example, 'from (7)'.

If an author wishes to mark the end of the proof of a theorem, the sign \square may be used.

Footnotes should be avoided.

Figures

Graphics should be prepared to professional standards, preferably using Postscript or L^AT_EX drawing facilities. Each text figure must be numbered as Figure 1, Figure 2, . . . and its intended position clearly indicated in the manuscript. Figures should be used sparingly and only when they greatly clarify the exposition. The preferred resolutions for submission of electronic artwork are: halftone images 300 dpi; line tone 600 dpi; bitmap 1200 dpi.

Tables

Tables should be numbered (above the table) as Table 1, Table 2, . . . Indicate the position of each in the text as for figures.

References

References should be collected at the end of the paper numbered in alphabetical order of the author's names or by order of citation. Include in the list of references only those works that are cited. For the style of references please consult recent issues of the journal. A reference to a book should give the title, in italics, and then in roman type the publisher's name and the place and year of publication:

[4] N. Dunford and J. T. Schwartz. *Linear Operators*. Part I. Wiley, New York, 1958.

A reference to a paper should give in italics the title of the periodical, the number of the volume and year, and the beginning and end pages of the paper. Journal titles should be abbreviated as in *Mathematical Reviews*:

[6] J. E. Littlewood. The 'pits effect' for functions in the unit circle. *J. Analyse Math.* **23** (1970), 236–268.

Proofs

Authors receive one pdf proof for correction. Typographical and minor corrections only are permitted at this stage. For papers with more than one author the proofs are sent to the first named author unless the editor receives other instructions. It is important that proofs are corrected and returned promptly.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information.

Ergodic theory and dynamical systems

VOLUME 42 PART 2 FEBRUARY 2022

CONTENTS

<i>Hasselblatt, B.</i> Anatole Katok	321
<i>Abrams, A., Katok, S. and Ugarcovici, I.</i> Flexibility of measure-theoretic entropy of boundary maps associated to Fuchsian groups	389
<i>Albers, P., Geiges, H. and Zehmisch, K.</i> Pseudorotations of the 2-disc and Reeb flows on the 3-sphere	402
<i>Avila, A., Viana, M. and Wilkinson, A.</i> Absolute continuity, Lyapunov exponents, and rigidity II: systems with compact center leaves	437
<i>Avila, A. and Fayad, B.</i> Non-differentiable irrational curves for C^1 twist map	491
<i>Baladi, V.</i> There are no deviations for the ergodic averages of Giulietti–Liverani horocycle flows on the two-torus	500
<i>Benoist, Y. and Oh, H.</i> Geodesic planes in geometrically finite acylindrical 3-manifolds	514
<i>Bochi, J., Katok, A. and Rodriguez Hertz, F.</i> Flexibility of Lyapunov exponents	554
<i>Chen, J., Hu, H., Pesin, Y. and Zhang, K.</i> The essential coexistence phenomenon in Hamiltonian dynamics	592
<i>Connell, C., Nguyen, T. and Spatzier, R.</i> Carnot metrics, dynamics and local rigidity	614
<i>Dong, C., Kanigowski, A. and Wei, D.</i> Rigidity of joinings for some measure-preserving systems	665
<i>Einsiedler, M. and Lindenstrauss, E.</i> Rigidity properties for commuting automorphisms on tori and solenoids	691
<i>Erchenko, A.</i> Flexibility of Lyapunov exponents with respect to two classes of measures on the torus	737
<i>Fayad, B. and Saprykina, M.</i> Topological weak mixing and diffusion at all times for a class of Hamiltonian systems	777
<i>Fish, J. W. and Hofer, H. H. W.</i> Almost existence from the feral perspective and some questions	792
