PUBLIC POLICY IN A NEW KEY

Amitai Etzioni

This book brings together important contributions on some of the most crucial policy questions of our time. These writings range widely over the spectrum of domestic and foreign policy questions, yet are linked by a broadly conceived vision of sociological method that acts as a universal key to many social issues.

ISBN: 1-56000-075-9 (cloth) 210 pp. \$29.95

DRUGS, LAW, AND THE STATE

Harold H. Traver and Mark S. Gaylord, editors
With an introduction by Alan A. Block

This volume focuses on the conflicting cultural values and historical traditions that continue to thwart combined attempts among nations to impede the flow of drugs. It centers on the idea that drug control policy largely reflects the society in which it is found.

ISBN: 1-56000-082-1 (cloth) 188 pp. \$32.95

SCIENCE FUNDING

Politics and Porkbarrel

Joseph P. Martino

This ground-breaking volume offers a critical examination of special-interest funding and the danger it poses to the integrity of American society as a whole, as well as to its scientific component. It examines the history and pertinent issues of science funding from the early twentieth century through the present.

ISBN: 1-56000-033-3 (cloth) 336 pp. \$32.95

PUBLIC GOODS AND MARKET FAILURES

A Critical Examination

Tyler Cowen, editor

Assertions of market failure are usually based upon Paul Samuelson's theory of public goods and externalities. This book both develops that theory and challenges the conclusion of many economists and policymakers that market failures cannot be corrected by market forces.

ISBN: 1-56000-570-X (paper) 384 pp. \$22.95

THE DEVIL AND UNCLE SAM

A User's Guide to the Friendly Tyrant's Dilemma

Adam Garfinkle

A team of eminent authors present a comparative study of the Friendly Tyrants phenomenon in recent history. They distill the policy lessons of over four decades and offer practical approaches to negotiating these obstinate ambiguities of contemporary political life.

ISBN: 1-56000-012-0 (cloth) 176 pp. \$24.95

NEW FROM HARVARD

PUBLIC EDUCATION

AN AUTOPSY

Myron Lieberman

In this blistering critique of our failing public schools and our fuzzy thinking about how to fix them, Myron Lieberman explains why public education is in terminal decline and tells us what we must do to get American schooling back on track. He presents a comprehensive analysis of the alternatives, concluding that the existing system must be replaced by a three-sector industry (public, nonprofit, and for-profit schools) in which for-profit schools must play an important role.

"This book both delighted and astonished me...In recent years there have been much-celebrated books on American education. None are as good as this one...Lieberman knows the literature, knows schools, knows teachers, administrators and their unions, and understands monopolies and markets."

—Abigail M. Thernstrom,
Boston University

THE SCAR OF RACE

**Paul M. Sniderman
and Thomas Piazza**

What, precisely, is the clash over race in the 1990s, and does it support the charge of a "new racism," more subtle and covert than the bigotry of a generation ago? These are the central questions Paul Sniderman and Thomas Piazza set out to answer in this brilliant articulation of how racial issues have become entangled with politics. When race becomes enmeshed in public policy issues, political principles as well as prejudice come into play. Not just who will benefit from government programs but how, and at what price, are the concerns that preoccupy thoughtful Americans. Race is no longer a single question to be understood in moral terms of right and wrong.

Nonprofits for Hire

The Welfare State in the Age of Contracting
Steven Rathgeb Smith and Michael Lipsky

In recent years, government's primary response to the emergent problems of homelessness, hunger, child abuse, health care, and AIDS has been generated through nonprofit agencies funded by taxpayer money. As part of the widespread movement for privatization, these agencies represent revolutionary changes in the welfare state. Steven Smith and Michael Lipsky demonstrate that this massive shift in funds—literally billions of dollars—has benefits and drawbacks. Given the breadth of government funding of nonprofit agencies, this first study of the social, political, and organizational effects of this service strategy is an essential contribution to the current raging debate on the future of the welfare state.

Breaking the Vicious Circle

Toward Effective Risk Regulation
Stephen Breyer

Stephen Breyer explores three common difficulties currently plaguing efforts to cope with health risks. He shows how well-meaning, experienced regulators can nonetheless bring about counterproductive results. He sets out a proposal for a new administrative entity to develop a coherent regulatory system adaptable for use in different risk-related programs—a mission-oriented, independent agency commanding significant prestige and authority.

\$22.95 cloth

The Hollow Core

Private Interests in National Policy Making
John P. Heinz, Edward O. Laumann,
Robert L. Nelson, and Robert H. Salisbury

"[*The Hollow Core*] reports on interest groups and their representatives in the grand tradition of American social and behavioral science, theoretically driven and empirically grounded—a work of major, well-executed research by a superb team of investigators." —Heinz Eulau, Stanford University

"This is an important, path-breaking study of that crucial but poorly understood group of men and women, Washington representatives, or as they are better known, lobbyists. The authors have put together an enormous amount of fresh data and explore areas of law and politics that have been sadly neglected in the past. It is a monumental effort." —Lawrence M. Friedman

THE FUTURE OF HEALTH POLICY

Victor R. Fuchs

In this book Fuchs, America's foremost health economist, provides the necessary concepts, facts, and analyses to fully comprehend the complicated issues of health policy. The future of U.S. health policy, Fuchs argues, is tightly linked to three basic questions. First, how can we disengage health insurance from employment? Second, how can we tame technologic change in health care? And finally, how can we cope with the runaway medical costs of an aging society? For anyone who wants a reliable guide through the myriad proposals on health care reform, this book is must reading. \$29.95 cloth

PRIVATE CHOICES AND PUBLIC HEALTH

The AIDS Epidemic in an Economic Perspective

Tomas J. Philipson and Richard A. Posner

Philipson and Posner employ the tools of economic analysis to reassess the standard epidemiological model of AIDS transmission. They examine regulatory measures and proposals such as mandatory testing and immigration control, the subsidization of AIDS education and medical research, the social and fiscal costs of AIDS, the political economy of the government response, and the interrelation of AIDS and fertility risk. Neither liberal nor conservative, yet on the whole skeptical about governmental involvement in the epidemic, this book is certain to be controversial, but its injection of hard-headed economic thinking into the AIDS debate is long overdue. \$29.95 cloth

FREE FOR ALL?

Lessons from the RAND Health Insurance Experiment

Joseph P. Newhouse and the Insurance Experiment Group

In the most important health insurance study ever conducted, researchers at the RAND Corporation devised an experiment to address two key questions: how much more medical care will people use if it is provided free of charge, and what are the consequences for their health? The researchers found that in plans that reimbursed a higher proportion of the bill, patients used substantially more services—indeed, those who paid nothing used 40 percent more services than those required to pay a high deductible—but the effect on the health of the average person was negligible. Drawing comprehensive, coherent implications from an immense amount of data, this volume is destined to be a classic work serving as an invaluable reference for all those concerned with health care policy. \$49.95 cloth

The Health of Nations

Public Opinion and the Making of American and British Health Policy

LAWRENCE R. JACOBS

"This book is obviously relevant to the current national debate over the scope and shape of health care policy. It is less obviously but just as importantly relevant to debates within the social sciences—over the need to compare American political processes to those of other nations, over the need to do meticulous historical research in order to understand contemporary problems, over the roles of citizens and organized groups in shaping policy choices, and over the reincarnation of 'political culture' as a critically important determinant of policy outcomes. This book is articulate, persuasive, and insightful."—Jennifer Hochschild, Princeton University. \$34.50

Polar Politics

Creating International Environmental Regimes

EDITED BY ORAN R. YOUNG AND GAIL OSHERENKO

A region of critical environmental significance, the Arctic continues to be the focus of international conflicts of interest. How well have nations succeeded in creating regimes that establish international rights and responsibilities in the circumpolar North?

NOTES TO CONTRIBUTORS

GUIDELINES

The distinctive readership of the *Journal*, cutting across academic disciplines and national boundaries, makes the following points of particular importance to contributors.

*Whatever the specific subject matter, the relevance of conclusions to a broad understanding of policymaking should be made explicit.

*Whatever the national setting, the extent to which conclusions are generalizable to many nations should be explicitly discussed.

*Each article should show an awareness of the constraints that public institutions place upon policymaking.

*Jargon should be avoided; technical terms not widely understood should be clearly defined; and the conclusions of statistical analyses should be set out in prose, as well as being supported by quantitative information in tables, footnotes and text as appropriate.

PREPARATION OF MANUSCRIPT

The entire manuscript, including footnotes and references, should be typed double-spaced on one side only of A4 size paper, with a left-hand margin of at least 1½ inches (4½ cm). Manuscript pages should be numbered consecutively.

The title of the article and the author's name and address should be typed on a separate page at the beginning of the article.

The second page should contain an abstract of not more than 150 words and the title of the article, but *not* the author's name.

Tables and Figures should be numbered consecutively in separate series. Each table or figure should be typed or drawn on a separate sheet. Every table or figure should have a title or caption and at least one reference in the text to indicate its approximate location.

STYLE

Spelling, capitalization and punctuation should be consistent within each article. Detailed advice on all matters of style is contained in Judith Butcher's book, *Copyediting*, Cambridge University Press (1975).

Headings of not more than two grades should be used and they should be typed on separate lines.

Numbered footnotes should be avoided; citation of references in the text is the norm. If there are a few points that require discussion in the article but not in the body of the text, numbered footnotes may be used. They may also be useful for technical details, e.g. statistical points that would interrupt the flow of the text. Numbered footnotes should be typed consecutively, double-spaced, at the end of the paper, starting on a new page.

References to publications should be placed in the

text. Examples of correct styling for bibliographic citation where the author's name is mentioned in the text are Alford (1975), Biller (1976, 136-7), May and Wildavsky (1978), Ostrom, Parks and Whitaker (1978) and subsequently Ostrom *et al.* (1978).

At the end of the paper, all references should be consolidated in a single alphabetical list starting on a new page. Authors are particularly requested to verify that each text reference appears in the list, and vice versa. In addition to author(s) surname and first name(s) or initial(s), and the title of the book or article, references to books should *always* include the city of publication and publisher, and for journal articles the volume and part number. For example:

Alford, R. (1975) *Health Care Politics*. Chicago: University of Chicago Press.

Biller, R. (1976) On tolerating policy and organizational termination: some design considerations, *Policy Sciences*, 7, 2, 133-49.

Campbell, D. (1971) Reforms as experiments. In F. Caro (ed.), *Readings in Evaluation Research*. New York: Russell Sage.

May, J. and A. Wildavsky (eds.) (1978) *The Policy Cycle*. Beverly Hills: Sage.

SUBMISSION

Please submit the original manuscript *plus* three copies to: Professor Richard Rose, *Journal of Public Policy*, Centre for the Study of Public Policy, University of Strathclyde, Livingstone Tower, Glasgow, G1 1XH, Scotland.

COPYEDITING AND PROOF-READING

The editor and publishers reserve the right to copyedit and proof all items accepted for publication. Authors will review their copyedited manuscripts only if substantial changes have been made. Manuscripts which do not conform to the requirements about style and format may be returned for retyping.

Page proofs of articles will be sent to authors for correction of typographical errors only. Authors must notify the editorial office of any corrections within one week of receipt or approval will be assumed.

Submission of an article or other item implies that it has not been published or accepted for publication elsewhere. Authors are responsible for obtaining written permission to publish material for which they do not own the copyright. Contributors of material accepted for publication will be asked to assign their copyrights to Cambridge University Press.

Each author will receive 50 offprints of his article without charge. Additional copies may be purchased if ordered at proof stage.

The *Journal of Public Policy* is sponsored by the Centre for the Study of Public Policy, University of Strathclyde
