

INDEX OF AUTHORS

Attig, L.	221	Kelly, P.	261	Roche, H. M.	232
Barber, S.	204	Lanigan, J.	204	Sanderson, J. D.	187
Ford, H.	199	McGillicuddy, F.	232	Singhal, A.	204
Frost, G.	199	Moore, J. B.	211	Spencer, J. P. E.	244
Gabory, A.	221	Oliver, E.	232	Thompson, J.	195
Junien, C.	221	Parkes, G. C.	187	Toomey, S.	232
		Phillips, C.	232	Whelan, K.	187

Nutrition Society Silver Medal Lecture

Chair: I. Macdonald, *University of Nottingham, UK*

Beyond antioxidants: the cellular and molecular interactions of flavonoids and how these underpin their actions on the brain

J. P. E. Spencer

244–260

Symposium 4: Gut function: effects on over- and undernutrition

Chairs: D. Robertson, *University of Surrey, Guildford, UK*; **L. Morgan**, *University of Surrey, Guildford, UK*

Nutrition, intestinal defence and the microbiome

P. Kelly

261–268

Proceedings of the Nutrition Society

Directions to Contributors – Concise Version

The *Proceedings of the Nutrition Society* publishes papers presented by invitation and original communications given at the symposia and meetings of the Society. The geographical scope of the journal is international. As a contributor you should note and follow the guidelines set out below. Further information on how the technical content of your paper should be presented is given in the **Directions to Contributors** on the Nutrition Society web pages at <http://www.nutritionociety.org> or contact the Publications Office on +44 20 7605 6555 (telephone), +44 20 7602 1756 (fax) or edoffice@nutsoc.org.uk (email).

Authors are reminded that their papers will be read by a wide cross-section of the Society's members, many of whom were neither at the meeting nor are they specialists in the subject area. Authors should thus seek to provide an introduction and context to the subject and are encouraged to provide extensive references to allow the reader to further explore the subject, in addition to summarizing the more recent findings, conclusions and hypotheses of their own and other research groups. Authors should avoid unnecessary use of 'jargon' and acronyms and ensure that as far as possible acronyms and abbreviations are defined and explained in the text.

Papers should be accompanied by a signed statement to the effect that the author accepts the conditions laid down in the full Directions to Contributors. Contributors of Symposium papers will be asked to complete a copy of the 'Licence to Publish' (in lieu of copyright transfer) at the proof stage.

Page format. The *Proceedings of the Nutrition Society* is printed in double-column format (column width of 85 mm) with a text area of 235 × 177 mm.

Text. Word-processed text provided electronically is required. Text files must be compatible with Microsoft Word 2000 (either in Word format or saved as rich text (.rtf) files. The typescript should be prepared with 1.5 line spacing and margins (at least 1.5 cm) on each side and with no underlining, bold or italics (except for scientific names). Standard abbreviations (e.g. Fig. and Figs.) and SI units should be used. **This will enable papers to be handled rapidly, and with fewer typesetting errors. All relevant financial and other interests should be declared.**

Synopsis. Each paper must commence with a carefully prepared, accurate, informative synopsis, in one paragraph, that is complete in itself and intelligible without reference to text or figures. It should not exceed 250 words.

Key Words. Authors should supply two or three key words or phrases (each containing up to three words) for the subject index of the volume.

Tables. Tables should be reduced to the simplest form, and should not be used where text or illustrations give the same information. They should be submitted on separate sheets at the end of the article and must carry headings describing their content that are comprehensible without reference to the text.

Illustrations. All figures should be of sufficient size and quality to allow for reduction by half or two-thirds. Half-tone photographs are acceptable where they make a real contribution to the text. Colour illustrations can be used at the discretion of the Editor. Figure captions should be typed separately at the end of the main text and numbered corresponding to the relevant figures. For illustrations, preferred software packages are Adobe Illustrator, Adobe Photoshop, Aldus Freehand, Chemdraw or CorelDraw. Preferred formats are TIFF or JPEG, if a TIFF file is not possible save as an EPS or a Windows metafile. Microsoft PowerPoint files are also acceptable.

References. References must be based on the numbered (Vancouver) system. **When an article has more than ten authors, only the names of the first three should be given followed by *et al.*; give abbreviated journal titles and conform to the following styles:**

1. Goel V, Cheema SK, Agellon LB, Ooraikul B & Basu TK (1999) Dietary rhubarb (*Rheum rhaponticum*) stalk fibre stimulates cholesterol 7 α -hydroxylase gene expression and bile acid excretion in cholesterol-fed C57BL/6J mice. *Br J Nutr* **81**, 65–71.
2. Jenkins DJ, Kendall CW, Marchie A *et al.* (2003) The effect of combining plant sterols, soy protein, viscous fibres, and almonds in treating hypercholesterolemia. *Metabolism* **52**, 1478–1483.
3. Brandtzaeg P (2003) Role of local immunity and breast-feeding in mucosal homeostasis and defence against infections. In *Nutrition and Immune Function*, pp. 273–320 [PC Calder, CJ Field and HS Gill, editors]. Wallingford, Oxon: CAB International.
4. Stock M & Rothwell NJ (1982) *Obesity and Leanness: Basic Aspects*. London: John Libbey.

Citations should be numbered consecutively in the order in which they first appear in the text using superscript Arabic numerals in parentheses, e.g. 'The conceptual difficulty of this approach has recently been highlighted^(1,2-4)'. If a reference is cited more than once the same number should be used each time.

Proofs. PDF page proofs will be accessible to authors from the typesetter's website and should be returned within 48 hours (by email or Express mail) to:

Monica Nelson
2 Leicester Road, Wanstead
London
E11 2DP
UK
email nelsononline@btinternet.com

Typescripts. The electronic version of the paper should be emailed to:

email edoffice@nutsoc.org.uk

Vol. 69 No. 2 May 2010

Contents

Queen's University Belfast, UK, 17–19 June 2009

Conference on 'Dietary management of disease'

Session 2: Other diseases

Chairs: **K. Cashman**, *University College Cork, Cork, Republic of Ireland;*
M. Ward, *University of Ulster, Coleraine, UK*

Treating irritable bowel syndrome with probiotics: the evidence
G. C. Parkes, J. D. Sanderson & K. Whelan 187–194

Session 3 (Joint with the British Dietetic Association): Management of obesity

Chairs: **P. Douglas**, *Chair of British Dietetic Association and University of Ulster, Coleraine, UK;*
B. Livingstone, *University of Ulster, Coleraine, UK*

Management of obesity in Scotland: development of the latest evidence-based
recommendations
J. Thompson 195–198

Glycaemic index, appetite and body weight
H. Ford & G. Frost 199–203

Prevention of obesity in preschool children
J. Lanigan, S. Barber & A. Singhal 204–210

University of Surrey, Guildford, UK, 29 June–2 July 2009

Conference on 'Over- and undernutrition: challenges and approaches'

Symposium 1: Overnutrition: consequences and solutions

Chairs: **B. Griffin**, *University of Surrey, Guildford, UK;* **L. Morgan**, *University of Surrey, Guildford, UK*

Non-alcoholic fatty liver disease: the hepatic consequence of obesity and the
metabolic syndrome
J. B. Moore 211–220

Symposium 2: Modern approaches to nutritional research challenges

Chairs: **J. B. Moore**, *University of Surrey, Guildford, UK;* **D. J. Millward**, *University of Surrey, Guildford, UK*

Nutritional developmental epigenomics: immediate and long-lasting effects
L. Attig, A. Gabory & C. Junien 221–231

Postgraduate Symposium

Chairs: **K. Hart**, *University of Surrey, Guildford, UK;* **M. Gibbs**, *University of Surrey, Guildford, UK*

The role of inflammation and macrophage accumulation in the development
of obesity-induced type 2 diabetes mellitus and the possible therapeutic effects
of long-chain *n*-3 PUFA
E. Oliver, F. McGillicuddy, C. Phillips, S. Toomey & H. M. Roche 232–243

(Contents continued facing inside back cover)
