There is a minor error in Section 3 wherein it is stated that “`acc 0_ k` loops in_{nitely}, even if `k` succeeds on input `..`.” This statement is not correct, and should be replaced by “If `k` returns false on input `cs`, then `acc 1_ cs k` loops in_{nitely}.”

The author is grateful to Derek Dreyer for pointing out this mistake, and suggesting the above-mentioned correction.
