

ADVANCES IN APPLIED PROBABILITY

Advances in Applied Probability (AAP) is the companion publication to the *Journal of Applied Probability* (JAP); the main function of AAP is to define areas of recent progress and potential development in applied probability. AAP is a medium of publication for:

- longer research papers, which may include expository materials;
- expository papers on branches of mathematics of interest to probabilists;
- papers outlining areas in which probability models can be usefully developed;
- papers presented at conferences which do not publish their proceedings;
- letters to the Editor on any appropriate topic.

AAP also includes a section devoted to stochastic geometry and statistical applications (SGSA). The SGSA section of Volume 35, Number 1 (March 2003) is dedicated to Professor Joseph Mecke of the Friedrich Schiller University, Jena, on the occasion of his 65th birthday.

Subscription rates (per volume) for AAP are the same as for JAP (see the inside back cover). If both journals are ordered at the same time directly from the Applied Probability office, then 10% is discounted. All orders, enquiries, submissions and correspondence should be sent to:

Applied Probability, School of Mathematics and Statistics
University of Sheffield, Sheffield S3 7RH, UK

www.appliedprobability.org

The Mathematical Scientist

Edited by J. Gani

Providing an unusually non-specialist forum for papers with a mathematical emphasis, *The Mathematical Scientist* has an appreciative readership amongst mathematicians, computer scientists, statisticians and scientists in all areas where mathematical techniques are used.

After a quarter century of publishing, *The Mathematical Scientist* is an invaluable source of information on mathematical theory, methods and modelling applied to phenomena in the engineering, earth, physical, biomedical and socioeconomic sciences.

Recent and forthcoming papers include:

- Perceived highway speed *Randall Swift, Jennifer Switkes and Stephen Wirkus*
- A four-letter code for prime numbers *Mels Sluysen*
- Modeling the 1984–1993 American League Baseball results as dependent categorical data *H. Bayo Lawal*
- On the history of Bayes' theorem *O. Sheynin*
- Mathematical modelling of homeless populations *J. G. Byatt-Smith et al.*

The Mathematical Scientist ISSN 0312-3685 Published in June and December
Subscription rates (post free) for individuals and institutions for Volume 28 (2003):
£11.00, \$US17.00, \$A31.50. To subscribe, email s.c.boyles@sheffield.ac.uk, telephone +44 (0)114 222 3922, fax +44 (0)114 272 9782, or send an order payable to *The Mathematical Scientist* to:

Applied Probability, School of Mathematics and Statistics
University of Sheffield, Sheffield S3 7RH, UK

Visit our website for more information: www.appliedprobability.org

Applied Probability journals online

Journal of Applied Probability and *Advances in Applied Probability* are now available online, in partnership with Project Euclid, at no extra cost to subscribers.

The online editions include

- an electronic version of each new issue (in PDF format) some weeks before the printed version becomes available;
- an archive of all issues since 1998;
- full bibliographic details of each article, along with its abstract;
- a search facility, allowing users to search by author name, article title, subject or keyword, or through the full text of the abstract or the article itself.

Access

The search facility and the abstract of each article are available free to all users; full access to the archive, including the full text of articles, is currently available at no extra charge to subscribers to the print editions.

Individual subscribers should register with Project Euclid by creating a user profile, entering their JAP and/or AAP subscription number where a 'subscriber code' is requested. Institutional subscribers should contact the Applied Probability office with details of their institution's IP range.

Non-subscribers can gain access to individual articles on a pay per view basis.

For further information, please contact Sue Boyles (tel: +44 114 222 3922; fax: +44 114 272 9782; email: s.c.boyles@sheffield.ac.uk), or write to

Applied Probability

SUBSCRIPTION RATES

Subscription rates (post free) for volume 40 (2003) of the *Journal of Applied Probability* are as follows:

US\$223.00; \$A413.00; £145.50 for libraries and institutions;

US\$74.25; \$A137.75; £48.50 for individuals belonging to a recognised scientific society.

Members of the London Mathematical Society should apply direct to the Secretary of the Society for copies of the *Journal*.

Please send all enquiries to: Applied Probability, School of Mathematics and Statistics, University of Sheffield, Sheffield S3 7RH, UK.

We can provide back issue prices on application. Cheques, money orders, etc. should be made out to APPLIED PROBABILITY. Payment is accepted in US, UK or Australian currency or by VISA or Mastercard (phone: +44 114 222 3922; fax: +44 114 272 9782).

NOTES FOR CONTRIBUTORS

Papers published in the *Journal* are of two kinds:

- (1) *research papers* not exceeding 20 printed pages;
- (2) *short communications* of a few printed pages in the nature of notes or brief accounts of work in progress.

Review papers, longer research papers and letters to the editor are published in *Advances in Applied Probability*, a companion journal. (Note: Letters relating specifically to papers which have appeared in the *Journal of Applied Probability* will continue to appear in the *Journal*.)

The editors may publish accepted papers in either journal, according to the space available, in order to meet the 15-month deadline in publication referred to below.

Submission of papers

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Papers will not be reprinted without the written permission of the Trust. It is the policy not to accept for publication papers which cannot appear in print within 15 months of the date of receipt of the final version. Fifty reprints of each paper will be provided free; additional reprints are available at cost.

Papers should be written in English or French; papers in other languages may be accepted by the editors, but will appear (subject to the author's agreement) in English or French translation. Please supply *three* double-spaced hard copies, at least one of which should be printed on one side of the paper only. The paper should include: (1) a short abstract of approximately 4–10 lines giving a non-mathematical description of the subject matter and results; (2) list of keywords detailing the contents for the purpose of computerised information retrieval; (3) primary and secondary classifications according to the 2000 Mathematics Subject Classification.

Authors are advised to consult *The Author's Guide to the Applied Probability Journals* when preparing papers for submission. A copy of this guide may be obtained free of charge from the Applied Probability Office. An updated version of the guide, with LATEX style files, can be obtained in electronic form on <http://www.appliedprobability.org> or on PC-compatible disk from the Applied Probability Office. For instructions on how papers may be submitted electronically, please consult the notes for contributors at the above URL.

For efficiency in processing, authors are requested to send all submissions to the Applied Probability Office in Sheffield, rather than to individual editors. The address for all submissions is:

**Executive Editor, Applied Probability, School of Mathematics and Statistics,
University of Sheffield, Sheffield S3 7RH, UK.**

COPYRIGHT

The copyright of all published papers is vested in the Trust. When a paper is accepted for publication, the Trust asks the author(s) to assign copyright to the Trust by signing a form in which the terms of copyright are listed. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of \$00.70 per copy, plus .20 per page is paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA (<http://www.copyright.com>). 0021-9002/03 \$00.70+ .20.

Research Papers

- 1 SOPHIE MERCIER AND MICHEL ROUSSIGNOL. Asymptotic failure rate of a Markov deteriorating system with preventive maintenance
- 20 BERNHARD KLAR AND ALFRED MÜLLER. Characterizations of classes of lifetime distributions generalizing the NBUE class
- 33 INGEMAR KAJ AND STEPHEN M. KRONE. The coalescent process in a population with stochastically varying size
- 49 F. THOMAS BRUSS AND GUY LOUCHARD. Optimal stopping on patterns in strings generated by independent random variables
- 73 QING HAN AND KATUOMI HIRANO. Sooner and later waiting time problems for patterns in Markov dependent trials
- 87 BERO ROOS AND DIETMAR PFEIFER. On the distance between the distributions of random sums
- 107 EILON SOLAN AND NICOLAS VIEILLE. Perturbed Markov chains
- 123 G. FORT, E. MOULINES, G. O. ROBERTS AND J. S. ROSENTHAL. On the geometric ergodicity of hybrid samplers
- 147 VYTAUTAS KAZAKEVIČIUS AND REMIGIJUS LEIPUS. A new theorem on the existence of invariant distributions with applications to ARCH processes
- 163 ANYUE CHEN AND KAI LIU. Birth–death processes with an instantaneous reflection barrier
- 180 FABRICE GUILLEMIN, RAVI MAZUMDAR, ALAIN DUPUIS AND JACQUELINE BOYER. Analysis of the fluid weighted fair queueing system
- 200 A. A. BOROVKOV, O. J. BOXMA AND Z. PALMOWSKI. On the integral of the workload process of the single server queue
- 226 SUNDER SETHURAMAN. A clustering law for some discrete order statistics

Short Communications

- 242 EROL A. PEKÖZ, RHONDA RIGHTER AND CATHY H. XIA. Characterizing losses during busy periods in finite buffer systems
- 250 EROL A. PEKÖZ. Some memoryless bandit policies
- 257 CHERN-CHING CHAO, YI-LIANG CHEN AND WEI-HOU CHENG. The asymptotic joint normality of the numbers of upper records, lower records and inversions in a random sequence
- 264 JI HWAN CHA. A further extension of the generalized burn-in model

Letter to the Editor

- 271 JOHN HAIGH. An intuitive insight into a result of Cowan
