

INSTRUCTIONS TO AUTHORS

Authors wishing to have papers published in the *JOURNAL* should communicate them to any one of the editorial board, choosing one in their own country where possible.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 15 in. by 24 in. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to receive 50 offprints of a paper in the *JOURNAL* free of charge, and additional offprints can be purchased if ordered in advance.

JOURNAL OF PLASMA PHYSICS

Volume 51 Part 1 February 1994

CONTENTS

Nonlinear hydrodynamic Rayleigh–Taylor instability of viscous magnetic fluids: effect of a tangential magnetic field YUSRY O. EL-DIB	1
Induced photon decay and photon-beam-induced Langmuir turbulence D. B. MELROSE	13
Refined theory of tearing growth rates. Part 1. Plasma model without stability threshold W. BARBULLA AND E. REBHAN	29
The Kelvin–Helmholtz instability in a compressible plasma: the role of orientation of the magnetic field with respect to the flow A. G. GONZÁLEZ AND J. GRATTON	43
Coupling of electromagnetic filamentation instability and electrostatic Langmuir parametric instabilities in laser-plasma interactions A. C.-L. CHIAN AND F. B. RIZZATO	61
Electron-cyclotron maser emission from streaming distributions A. J. WILLES AND P. A. ROBINSON	75
Three-dimensional stability of solitary kinetic Alfvén waves and ion-acoustic waves G. GHOSH AND K. P. DAS	95
Non-diffusive corrections to the long-scale behaviour of ensembles of turbulent magnetic lines: applications of the functional method F. SPINEANU, M. VLAD AND J. H. MISGUICH	113
Higher harmonics and longitudinal momentum in the stochastic interaction of magnetized electrons and ordinarily polarized modes G. CORSO AND F. B. RIZZATO	139
Relativistic self-focusing of laser beams in a time-harmonic plane waves: arbitrary intensity MEENU ASTHANA, M. S. SODHA AND K. P. MAHESHWARI	155
Surface currents on models of force-free solar magnetic flux tubes D. B. MELROSE, JENNIFER NICHOLLS AND N. G. BRODERICK	163
