

# STUDIES IN SECOND LANGUAGE ACQUISITION

## Information for Contributors

For guidelines and requirements regarding manuscript submission, please consult the *SSLA* website at <http://journals.cambridge.org/sla>. Click on the Journal Information tab which will lead you to Information for Contributors. Potential authors are advised that all manuscripts are internally reviewed for both content and formatting/style in order to determine their suitability for external evaluation.

**Research Article.** These manuscripts may be essays or empirical studies, either of which must be motivated by current theoretical issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design and issues related to the context of learning. Maximum length is 11,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 11,000 word limit).

**Research Report.** These manuscripts are shorter empirical studies motivated by current theoretical issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design. Very often, these are narrowly focused studies or they present part of the results of a larger project in progress. The background and motivation sections are generally shorter than research articles. Maximum length is 6,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 6,000 word limit).

**Replication Study.** These manuscripts are shorter empirical studies motivated by a previously published study (not necessarily one published in *SSLA*). The background and motivation sections will necessarily be shorter compared to research articles as the maximum length is 6,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 6,000 word limit).

**State-of-the-Scholarship Article.** These manuscripts are essays that review the extant research on a particular theme or theoretical issue, offering a summary of findings and making critical observations on the research to date. Manuscripts in this category typically fall within the 11,000-word limit of regular research articles; however, longer manuscripts may be considered on a case-by-case basis.

**Critical Commentary.** These manuscripts are shorter essays (i.e., non-empirical) motivated by current theory and issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design and issues related to the context of learning. Maximum length is 6,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 6,000 word limit).

**Methods Forum.** Recognizing the need to discuss and advance SLA research methods, these manuscripts seek to advance methodological understanding, training, and practices in the field. Submissions can be conceptual or empirical; we also encourage articles introducing novel techniques. All research paradigms, epistemologies, ontologies, and theoretical frameworks relevant to SLA are welcome. The target length is up to 11,000 words, although longer manuscripts will be considered with justification.

All manuscripts in all categories are peer reviewed and subject to the same high standards for publication in *SSLA*.

# Studies in Second Language Acquisition

## Volume 43 Number 1 March 2021

---

### ANNOUNCEMENT

*The 2020 Albert Valdman Award* 1–1

### RESEARCH ARTICLES

- A Call for Cautious Interpretation of Meta-Analytic Reviews*  
Frank Boers, Lara Bryfonski, Farahnaz Faez, and Todd McKay 2–24
- Comprehension of Focus-to-Accentuation Mapping in Sentences with Only  
by Advanced Cantonese Learners and Dutch Learners of English*  
Haoyan Ge, Aoju Chen, and Virginia Yip 25–49
- On the Scope of Output in SLA: Task Modality, Saliency, L2 Grammar Noticing,  
and Development*  
Janire Zalbidea 50–82
- Parsing Ambiguous Relative Clauses in L2 English: Learner Sensitivity to  
Prosodic Cues*  
Heather Goad, Natália Brambatti Guzzo, and Lydia White 83–108
- The Development of a Regional Phonological Feature During a Semester Abroad  
in Argentina*  
Rebecca Pozzi and Robert Bayley 109–132
- Predictive Processing of Implicit Causality in a Second Language: A Visual-World  
Eye-Tracking Study*  
Hyunwoo Kim and Theres Grüter 133–154
- Effects of Multitalker Input and Instructional Method on the Dimension-Based  
Statistical Learning of Syllable-Tone Combinations: An Eye-Tracking Study*  
Seth Wiener, Kiwako Ito, and Shari R. Speer 155–180

### STATE OF THE SCHOLARSHIP

*Limitations of Size and Levels Tests of Written Receptive Vocabulary Knowledge*  
Tim Stoeckel, Stuart McLean, and Paul Nation 181–203

### REPLICATION STUDY

*Conceptually Cued Perceptual Categorization in Adult L2 Learners*  
Cristina Lozano-Argüelles, Laura Fernández Arroyo, Nicole Rodríguez,  
Ezequiel M. Durand López, Juan J. Garrido Pozú, Jennifer Markovits,  
Jessica P. Varela, Núria de Rocafiguera, and Joseph V. Casillas 204–219

### RESEARCH REPORT

*Language Revitalization as L2 Shadow Boxing: The Case of Palenquero  
Plural-Marking*  
John M. Lipski 220–235

### CORRIGENDUM

*The Development of a Regional Phonological Feature During a Semester Abroad  
in Argentina – Corrigendum*  
Rebecca Pozzi and Robert Bayley 236–236
