

Public Health Nutrition

An international journal published on behalf of
The Nutrition Society by Cambridge University Press

Public Health Nutrition

Volume 13, 2010 ISSN: 1368-9800

Twelve issues per year

Aims and Scope

Public Health Nutrition provides an international forum for the publication and dissemination of research and scholarship in the form of peer-reviewed original papers and reviews, and for discussion in the form of editorials, commentaries, and correspondence, with a specific focus on nutrition-related public health.

The scope of *Public Health Nutrition* includes food systems and supplies, patterns of diet, foods and drinks, nutrients, body composition, physical activity, and associated factors, and their effects on disease, health and well-being, and the whole living and physical world. We welcome papers that:

- Address nutritional status **assessment, monitoring, and surveillance**
- Identify and analyse social, cultural, biological, environmental, economic and political **determinants of nutrition-related public health**
- Build intelligence about the development, implementation, and evaluation of **public health nutrition interventions**

- Describe, discuss, debate and influence **food and nutrition policy**
- Focus on improving food and nutrition-related public health, particularly in **populations that are most vulnerable and at risk**.
- Discuss and **build capacity** for effective public health nutrition action, including workforce development and educational issues
- Develop and test **innovative and emerging models, methods and approaches** to public health nutrition practice and research.

We prefer papers that are innovative (do not repeat research already undertaken elsewhere) and succinct (usually well under 5,000 words including references). Short communications are welcome. We publish research, scholarship, and discussions that take a population and preventive approach. In addition to original contributions, ideas and suggestions for topics for debate are also welcome. We publish special issues.

Public Health Nutrition is available on the Internet at: journals.cambridge.org/phn

Editor-in-Chief

Professor Agneta Yngve

Department of Biosciences and Nutrition
Karolinska Institutet, Novum
SE 141 57 Huddinge, Sweden
