## WHAT'S THE BEST HANDWASH/SCRUB? HANDS UP OR HANDS DOWN IT'S

# HIBICLENS<sup>®</sup>

(CHLORHEXIDINE GLUCONATE)

It is well established that handwashing is the most important single procedure in preventing transmission of hospital-acquired infections. HIBICLENS, the only proven antiseptic/antimicrobial, is the best agent available for both personnel handwashing and surgical scrubbing. HIBICLENS

provides the most immediate and prolonged protection against infection, with the best bactericidal "kill rate." And to encourage skin cleansing among hospital personnel, HIBICLENS offers cosmetic acceptability coupled with an excellent safety profile. Gentle to the skin, HIBICLENS is virtually

nonirritating and nonsensitizing, with a low potential for toxicity.

Available as both a liquid and impregnated in a disposable Sponge/Brush, HIBICLENS remains the single most effective antiseptic/antimicrobial skin cleanser for use throughout the hospital.

### THE BEST ANTISEPTIC/ANTIMICROBIAL SKIN CLEANSER

**Publisher:** Infection Control (ISSN-0195-9417) is published monthly by SLACK Incorporated, 6900 Grove Road, Thorofare, New Jersey 08086. Telephone: Thorofare (609) 848-1000.

**Copyright 1984:** All rights reserved. No part of this publication may be reproduced without written permission from the publisher.

**Subscriptions:** Subscription requests should be addressed to the publisher (except Japan). In Japan, contact Woodbell Scope Incorporated, 11-11, Shoto 2-chrome, Shibuya-Ku, Tokyo 150, Japan. Annual subscription price is: Individual: One year—\$35.00; Two years—\$50.00; Three years—\$65.00. Institutional: One year—\$50.00; Two years—\$65.00; Three years—\$80.00. All subscriptions, without exception, will start with the first issue published after the order is received. Back copies are available, but must be purchased separately. Cost per individual copy is \$5.00. Foreign subscribers add \$15.00 to regular rate: foreign orders, \$6.00.

**Change of address:** Notice should be sent to the publisher six weeks in advance of effective date. Include old and new addresses with zip codes. The publisher cannot accept responsibility for undelivered copies. Second-class postage is paid at Thorofare, New Jersey 08086.

**Postmaster:** Form 3547 to SLACK Incorporated, 6900 Grove Road, Thorofare, NJ 08086.

As of Volume 1, Number 1, INFECTION CONTROL is listed in *Index Medicus*, *Current Contents—Clinical Practice*, *Hospital Literature Index*, and *Cumulative Index to Nursing and Allied Health Literature*.

# ***EAGLEGUARD***<sup>TM</sup>

**THE FINAL WORD  
IN SYRINGE AND SHARPS DISPOSAL.**

**Secure, efficient systems  
for handling sharps  
from point of use  
to ultimate disposal.**

AMSCO's new Eagleguard™ Syringe Safety Systems provide the integrated collection/transport and decontamination/destruction capabilities you need to cope with today's "cradle-to-grave" responsibility for infectious waste.

The Eagleguard system features puncture-proof collection containers that eliminate needle clipping and recapping and are more cost-effective than disposables. Used sharps are first decontaminated, then encapsulated in a hard-surfaced plastic capsule, rendering them inaccessible, unusable, and ready for routine sanitary landfill disposal. All for a much lower capital investment than incineration or chemical decontamination.

Cycles are also provided for processing general types of infectious wastes from the laboratory, OR, isolation, or emergency — wherever red-bagged wastes are generated.

Eagleguard Syringe Safety Systems. Ask your AMSCO representative about these ultimate sharps collection and disposal systems from AMSCO, a leader in infection control equipment since 1894.
