**Senior Editors**

Julian Wiseman, University of Nottingham, UK  
Animal papers  
Robert E. L. Naylor, University of Aberdeen, UK  
Crop & Soil papers

*The Journal of Agricultural Science* publishes papers concerned with the advance of agriculture and the use of land resources throughout the world. It publishes original scientific work related to strategic and applied studies in all aspects of agricultural science and exploited species, as well as reviews of scientific topics of current agricultural relevance.

## **Editor**

Dave Harris, Bangor University, UK

*Experimental Agriculture* publishes the results of original research from any source on the agronomy of field, plantation and herbage crops grown for human or animal food; for industrial purposes; and on systems of agricultural production, particularly in the warmer regions of the world. It is especially concerned with experimental work designed to explain agronomic results in biological and environmental terms. The journal publishes accounts of new experimental techniques, new methods of crop production and discusses problems in countries where production is developing rapidly. There are regular book reviews.

## Advancing research. Increasing access.

Informed by detailed consultation with the library and research communities, we are constantly developing our industry-leading online journals platform.

Some recent advances include:

- **Refreshed site design**, facilitating rapid access to the most relevant content.
- **New advanced search interface** and a more detailed, fielded quick search function.
- **Enriched content** in the form of multimedia companions and editorial blogs.
- **The launch of Cambridge Open Option**, our open access initiative.

Visit [journals.cambridge.org/openoption](http://journals.cambridge.org/openoption) for more information.

# CAMBRIDGE BOOKS ONLINE

EXCELLENCE IN E-PUBLISHING

Innovative access to thousands of titles from one of the world's oldest, most prestigious publishers

*Cambridge Books Online* offers eBook content within a richly functional, fully searchable online environment. Access to *Cambridge Books Online* content is via institutional purchase, allowing unlimited concurrent users, meaning anyone who wants to may access the resource 24 hours a day

## Key Features

- Dynamic content and feature set
- Flexible purchase plans and custom packages
- Powerful search & browse capabilities
- Comprehensive library support tools
- Extensive user functionality
- Enhanced discoverability tools

Free 30 day trials are available to libraries and institutions

For more information on *Cambridge Books Online*, to request a free trial or for a quote, please visit [ebooks.cambridge.org](http://ebooks.cambridge.org) or contact us:

## Outstanding Scholarship from Cambridge

### The Climate Crisis An Introductory Guide to Climate Change

David Archer  
Stefan Rahmstorf

Hardback: 978-0-521-40744-1  
Paperback: 978-0-521-73255-0: 260 pp.

### Too Smart for Our Own Good The Ecological Predicament of Humankind

Craig Dilworth

Hardback: 978-0-521-76436-0  
Paperback: 978-0-521-75769-0: 546 pp.

### Global Climate Change Impacts in the United States

Edited by Thomas R. Karl,  
Jerry M. Melillo,  
Thomas C. Peterson,  
Susan J. Hassol

Paperback: 978-0-521-14407-0: 192 pp.

### Challenged by Carbon The Oil Industry and Climate Change

Bryan Lovell

Hardback: 978-0-521-19701-4  
Paperback: 978-0-521-14559-6: 230 pp.

### Controlling Climate Change

Bert Metz

Hardback: 978-0-521-76403-2  
Paperback: 978-0-521-74784-4: 376 pp.

### Wind Power

Peter Musgrove

Hardback: 978-0-521-76238-0  
Paperback: 978-0-521-74763-9: 338 pp.

# Environmental Conservation – Instructions for Authors

*Environmental Conservation* welcomes papers relevant to scientifically based management of the Earth's environment. The Journal publishes:

- subject reviews (normally <10 000 words)
- research papers (up to 8000 words)
- reports (<4000 words including references)
- comments (<1000 words)
- book reviews (<750 words).

The main criteria for acceptance of subject reviews and research papers are originality, scientific rigour, international interdisciplinary appeal to the readership and acceptability of style. Papers must not have been published previously, nor be under consideration for publication elsewhere. *Environmental Conservation* employs an interactive processing and editing procedure. We receive many more submissions than we have space to publish and the final authority in all matter relating to publication lies with the Editor. All papers are initially assessed by the Editorial Office and are likely to be returned to the authors for revision before peer review. Papers are accepted on the understanding that the underlying work has been conducted in an environmentally and socially responsible manner. In order for the Journal to deal with any copyright matters, the corresponding author is required to assign the copyright of any paper published to the Foundation for Environmental Conservation. All authors must ensure that all necessary permissions have been obtained for reproducing any other copyright material, including the right to reproduce and publish electronically.

## Manuscript submission

Papers should be submitted online by registering with our Manuscript Central service at

<http://mc.manuscriptcentral.com/envcon> and uploading the paper. Please ensure that your document is double-spaced and written in a 12-point common font such as Times New Roman. All pages must be numbered and a word count given (including references and figure legends). Please remember that a separate abstract <200 words is required at submission. In the event that substantial English improvement is required at any stage during the processing of a manuscript a quote will be supplied for the work involved. Authors are urged to read the detailed instructions for submitting their manuscript online. These can be found at the submission website by clicking on the 'Instructions and Forms' link in the top right of the screen; and then clicking on the link for 'Environmental Conservation Online Submission Instructions for Authors' on the following page. Authors who are unable to submit online should contact the Editorial Office ([envcons@ncl.ac.uk](mailto:envcons@ncl.ac.uk)) for assistance. When a paper is accepted for publication the preferred formats for papers are Microsoft Word for text, and .tif or .eps for any Figures saved electronically.

## Journal style guide

A recent issue of the journal from Volume 30 onwards should be consulted for style. Units, symbols and related matters are based on the CBE Manual *Scientific Style and Format* (6th Edition, 1994, ISBN 0-521-47154-0). The first page must include author names (capitals) and full addresses where the work was carried out. The corresponding author should provide an email address. Current addresses, where different, should also be given, and a word count including references and legends. The second page should contain a Summary followed by the main body of text. A research paper will normally have such sections as: Introduction; Methods; Results; Discussion; Acknowledgments; References; Tables (numbered in textual sequence and including captions); Figure legends; and Figures, which should accordingly be so ordered. A subject review should have sections appropriate to the topic addressed, but any methods and sources should preferably be detailed in a separate section. The Summary should be concise and informative. It should be <5% of the total word count and is complete in itself. It should succinctly express the context, purpose, methods, findings, approach and implications of the study. There should be no references or unexplained abbreviations. Avoid phrases such as 'are described', 'will be discussed', etc. The Methods section should include essential details of study area, analyses and sources of data. Please note that footnotes are not used in the *Environmental Conservation*.

## Spelling

Spelling should conform to The Concise Oxford Dictionary, 10th edition or later. Scientific names of genera, species and subspecies, but not of higher groups, should be italicised. Foreign words should be italicized at their first mention, where they also must be defined and explained, but thereafter may be written in normal typeface.

## Units, abbreviations, etc

The International System of units (SI) is to be used. Units, symbols and related matters are based on the CBE Manual *Scientific Style and Format* (6th Edition, 1994, ISBN 0-521-47154-0). Acronyms and abbreviations are generally in upper case and should be expanded at the first mention. All

currencies should at first mention have a US\$ exchange rate (e.g. '£1 = US\$1.89, January 2005).

## References

All references to cited literature should be given in alphabetical order on a new page at the end of the paper. Where a Reference is not to a recognized periodical or substantive book, but rather to an official document, internal technical or consultancy report, greater flexibility may be exercised. The chief criterion for correct referencing is that a reader be provided with the information necessary to find the item cited. References should also be given to international treaties (UNTS number). Unnecessary references should be omitted. Please refer to the online 'Instructions for Authors' for examples.

## Tables

Tables should be on sheets separate from the main text and presented one per page complete with heading. They should be numbered and referred to by their number in the text. Tables should be suitable for production on a single journal page or less. Table captions should be brief and ensure the Table is comprehensible without reference to the text. They should incorporate any scale, key or symbols, etc. necessary to interpret the information.

## Figures

Figures should again be on sheets separate from the text. Each Figure must be on a separate page, unboxed and clearly identified. These may be line drawings or photographs and all should be referred to consecutively in the text as Fig. 1, etc. Figures should be as simple as possible, avoiding 3-dimensional graphs, with fine lines, stippling and unusual symbols, which cannot be reproduced satisfactorily when reduced to one (84mm) or two-column width (175mm). Where various shadings are used within a figure please ensure that it is easy to differentiate between them. Labels on Figures should be added to the original drawing before submission. They should be brief and explained in the legend. Preferred symbols are open and filled circles, boxes and triangles, and these should be used consistently between Figures and as near as possible to 9 point when reproduced in the final journal. Figure legends should be in a list separate from the Figures and make the Figure comprehensible without reference to the text. They should incorporate any scale, key or symbol, etc. necessary to interpret the information. Maps must bear scales and photographs should include some indication of scale. Figures reproduced from other sources should be fully acknowledged in the legend, and permission for their reproduction in both written and electronic format should be sought before use. Colour illustrations are acceptable if they significantly inform/add information to the text, and provided that they are of a very high quality. However, the cost will be charged to the author(s) and an agreement to meet the costs will be required before the manuscript can be accepted for publication. For the purposes of reviewing, high-resolution graphics for figures are not necessary; authors may submit low-resolution or pdf versions of figures, but should ensure that they are of sufficient quality for viewing on-screen or by laser printing. You may insert your figures into the document, but please put all figures and tables at the end. When your paper has been accepted for publication, if there are figures then you need to supply them as high resolution images. Please refer to the online 'Instructions for Authors' for the formats and resolutions that Cambridge Journals recommend for supplying electronic figures.

## Tracking your submission

Your paper will be acknowledged by email on receipt. A reference number will be allocated which you should use in all correspondence and for tracking an electronic submission on Manuscript Central. All submissions approved for peer review are seen by at least two reviewers. The journal makes every effort to ensure that reviewers report swiftly. As soon as the Editor has reached a decision on your paper you will be notified by e-mail. Appeals on any decisions made by the Editors must be made within a month of the decision email in order for them to be considered. Authors of papers supported by reviews can expect normally to have their paper returned to them, with comments of both reviewers and Editor. The revised manuscript should be submitted as directed with an accompanying letter detailing how substantive points raised have been addressed. After acceptance, the copy-editor and publishers deal with all matters relating to printing. Proofs and offprint order forms will be sent to corresponding authors of subject reviews, research papers and comments. If authors are to be away from their correspondence address during the ten weeks after acceptance, they must have arrangements in place for queries from the copyeditor to be addressed promptly, and the proofs to be carefully read and swiftly returned. Corresponding authors of subject reviews and research papers will receive 25 free offprints.
