

DELTA-T WEATHER STATION

A complete system of instrumentation for automatically measuring and recording the weather at remote sites.

Standard sensors measure:

- air temperature
- rainfall
- relative humidity
- soil temperature
- solar radiation
- wind direction
- wind speed
- barometric pressure

- * User-defined recording
- * Typically 12 months battery life
- * Solar power option
- * On-site checks using LCD on control panel
- * Remote interrogation via RS232 link

Description All sensors are mounted on a 2m mast, except for the soil temperature probe and the rain gauge. An environmental data logger (the Delta-T logger) initiates readings, controls the sensors and stores data. The Logger memory is expandable from 16K to 128K readings.

Data collection Stored readings can be collected with a portable computer or printer without interrupting logging.

Programmable The user has independent control over each sensor to define: sampling interval, valid reading range, engineering units (eg mm of rainfall), and data compression. These are specified using a personal computer.

Special requirements We are able to supply part-systems and non-standard combinations of sensors, (the Logger is expandable up to 60 analogue/counter inputs). Further information, advice or a quotation will be provided on request.

Back volumes. Inquiries for Vols. 1–32 of *The Empire Journal of Experimental Agriculture* should be addressed to Wm Dawson & Sons Ltd, Cannon House, Folkestone, Kent. Previously published parts of *Experimental Agriculture* are available from Cambridge or the American Branch of Cambridge University Press.

Preparation and submission of manuscripts. Detailed instructions on the preparation of manuscripts are printed at the back of the first number of each volume of this journal.

Potential contributors are asked to give careful attention to these instructions. This will greatly assist the editors and thus speed the processing of their contributions.

Copying. This journal is registered with the Copyright Clearance Center, 27 Congress St., Salem, Mass. 01970. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per copy fee of \$5.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0014-4797/93 \$5.00+3.00.

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions.

For all other use, permission should be sought from Cambridge or the American Branch of Cambridge University Press.
