

THE CAMBRIDGE ENCYCLOPEDIA OF HUMAN EVOLUTION

Edited by STEVE JONES, ROBERT MARTIN, and DAVID PILBEAM
Executive Editor : SARAH BUNNEY Foreword by RICHARD DAWKINS

Now available in paperback, this superbly illustrated encyclopedia is the most comprehensive exploration of the evolution of the human species ever produced in a single volume.

Written by an outstanding team of over 70 experts in the field, it covers a huge range, from genetics and fossil origins to human biology and ecology, brain function and behaviour.

- Foreword by Richard Dawkins, author of *The Selfish Gene*, and *The Blind Watchmaker*
- Distinguished volume editors, including Steve Jones, 1991 Reith Lecturer for BBC Radio
- Beautifully illustrated with over 500 photographs, line diagrams, maps and ready-reference tables

'... There is no better single source ... for finding brief, accurate, and current synopses of the issues, problems, and methods of analysis within the domain of human evolutionary studies.'

American Journal of Physical Anthropology

'... this is a fine book; a worthy addition to the excellent *Cambridge Encyclopedia* series. Great to have on the shelves.'

Colin Tudge, *New Scientist*
