## **Philosophical Foundations of Quantum Field Theory**

Edited by HARVEY R. BROWN and ROM HARRE, *both of Oxford University*

The first systematic exploration of the nature and implications of quantum field theory, this collection of essays details its mathematical structure and metaphysical and methodological concerns.

1990 200 pp. paper \$19.95

## **Cartesian Method and the Problem of Reduction**

EMILY R. GROSHOLZ, *Pennsylvania State University*

The Cartesian method, construed as a way of organizing domains of knowledge according to the "order of reasons," was a powerful reductive tool. This book examines in detail the negative and positive impact of Descartes's method on his scientific and philosophical enterprises, exemplified by the *Geometry*, the *Principles*, the *Treatise of Man*, and the *Meditations*.

1991 176 pp. \$39.95

## **Economics and the Philosophy of Science**

DEBORAH A. REDMAN

"A scintillating monograph, a splendid survey of the literature, and a thought-provoking essay on the current state of economics." — Mark Blaug, *University of London*. This book provides economists, social scientists, and historians with the necessary background to discuss methodological matters with authority.

1990 272 pp. \$39.95

## **Biology, Ethics, and Animals**

ROSEMARY RODD

This book utilizes both philosophical and biological approaches to address the various attitudes in the debate over animal rights. Rodd justifies ethical concern within a framework that is firmly grounded on evolutionary theory, and provides detailed discussion of practical situations in which ethical decisions have to be made.

1990 280 pp. \$55.00

*New in paperback!*

## **Philosophy, Psychiatry and Neuroscience — Three Approaches to the Mind**

**A Synthetic Analysis of the Varieties of Human Experience**

EDWARD M. HUNDERT, *McLean Hospital and Harvard Medical School*

"Ambitious, rich, detailed, and groundbreaking," — *Review of Metaphysics*

"Hundert has done what few others have attempted — to draw on such diverse fields in order to study one question... and to show that the fields are not so diverse after all. His effort is highly successful... This is the best science book that I have ever read." — *Yale Scientific*

1991 360 pp. paper \$16.95

*Prices and publication dates are subject to change and good only in the U.S.*

## **Science and Relativism**

SOME KEY CONTROVERSIES IN  
THE PHILOSOPHY OF SCIENCE

**Larry Laudan**

Laudan's fictional dialogue among a realist, a positivist, a pragmatist, and a relativist is a trenchant critique of cognitive relativism and a thorough introduction to major issues in the philosophy of knowledge. Advancing his own pragmatist view, Laudan shows how to grapple with the complexities of conceptual change without assuming that different perspectives fashion their own "realities."

*Paper \$12.95 194 pages*

*Library cloth edition \$32.00*

Science and Its Conceptual  
Foundations series

## **Creative Understanding**

PHILOSOPHICAL REFLECTIONS  
ON PHYSICS

**Roberto Torretti**

Torretti analyzes mathematical physics as a creative attempt to understand aspects of the overall course of nature by conceiving of them as models of suitably contrived mathematical structures. "Torretti's book is the most important comprehensive study of philosophy of science in many years. Its compelling encapsulations of complex issues will instruct the scientist; its sharp insights will challenge the philosopher."—Jarrett Leplin, University of North Carolina, Greensboro

# Journal for General Philosophy of Science

Zeitschrift für allgemeine Wissenschaftstheorie

**Editors:**

**Lutz Geldsetzer**, *Philosophisches Institut der Universität Düsseldorf*; **Gert König**, *Institut für Philosophie der Ruhr-Universität Bochum, Bochum, BRD*

The *Journal for General Philosophy of Science*/Zeitschrift für allgemeine Wissenschaftstheorie is a forum for the discussion of a variety of attitudes concerning the philosophy of science. It has as its subject matter the philosophical, especially methodological, ontological, epistemological, anthropological, and ethical foundations of the individual sciences. Particular emphasis is laid on bringing both the natural, the cultural, and the technical sciences into a philosophical context, within which the historical presuppositions and conditions of the current problems of the philosophy of science are also included in the discussion. The *Journal for General Philosophy of Science*/Zeitschrift für allgemeine Wissenschaftstheorie has already been in existence for over two decades. It has been successful in its attempt to serve as a forum that bridges the gap between the different sciences, especially the natural, cultural, and social sciences. One of its purposes is to discuss and contrast the common as well as the different specific methodological and philosophical foundations of the individual sciences, taking into account all currently relevant positions of the philosophy of science.

In recent years considerable insight has been gained into the problems of current philosophy of science by considering the historical dimension of the sciences. This is why more intensive efforts will be made in the future towards the integration of historical and systematic considerations.

The journal contains:

- articles
- discussions
- reports on the state of the philosophy of science in individual countries
- reviews
- a bibliography of the major journals in the field of the history and philosophy of science.

The journal is of interest to philosophers, especially philosophers, of science, as well as to scholars from the fields of the natural, cultural, social and technical sciences who are interested in becoming aware of the philosophical implications of their disciplines and in being stimulated by the transfer of methods, leading ideas, concepts and theories from other fields.

## WOMEN IN SCIENCE

### Antiquity through the Nineteenth Century

A Biographical Dictionary with Annotated Bibliography

Marilyn Bailey Ogilvie

*"What comes across is the great love of doing science that many women have shared with men. What is also apparent are the formidable barriers that have been thrown up against them."* — Chet Raymo, Boston Globe

From the ancient Greek physician Agamede to physicist and chemist Marie Curie, in descriptions ranging from a single paragraph to several pages, *Women in Science* profiles 186 women who made significant contributions to science before 1910.

254 pp. \$12.50

## IDEOLOGY AND RATIONALITY IN THE HISTORY OF THE LIFE SCIENCES

Georges Canguilhem

translated by Arthur Goldhammer

*"The essays in this collection give a sensitive account of the history and ideology of the life sciences. . . . It should prove most welcome to philosophers and historians of science."* — Times Higher Education Supplement

This collection of George Canguilhem's later essays discusses the role played by ideological factors in determining the direction, if not the results, of scientific work. Balancing internal and external approaches and theory and example, he reveals as few other philosophers of science can the way in which scientists actually work.

# PHILOSOPHY OF SCIENCE

*Typescript.* Typescript, double-spaced, should be submitted (in triplicate) to Professor Merrilee Salmon, Department of History and Philosophy of Science, University of Pittsburgh, Pittsburgh, Pennsylvania 15260 U.S.A. Typescripts will not be returned unless return postage is prepaid by check, money order, International Postal Reply Coupons or U.S. stamps. A bibliographical list of cited references beginning with the author's last name, initials, followed by the year of publication in parentheses, should be headed 'References' and placed on a separate sheet in alphabetical order. Simple citations should then be made by employing in the text, *rather than by footnote*, the reference list by citing author and year of publication, for example, Jones (1958) or (Smith 1974, 46). A detailed guide to the new reference style appears in the March issue of each year. Discursive footnotes should be numbered consecutively throughout the typescript. *An abstract (also in triplicate) of approximately 100 words must accompany typescript. Typescript must not exceed 9,500 words, including abstract, footnotes and references. A word count must be submitted with each essay. Longer essays will be returned (at the author's expense) to be cut to the acceptable maximum.* All figures must be professionally drawn and lettered. All formulas and equations should be put in such a form as to help minimize the number of printed lines in the journal. In the following examples the form on the right is preferable to that on the left:

$$(1) \quad p = -\frac{dx}{dy} = -\frac{dz}{dt} \qquad p = -dx/dy = -dz/dt$$

$$(2) \quad \frac{1}{x} \prod_{n=1}^{\infty} \frac{\left(1 + \frac{1}{a_n}\right)}{\left(1 - \frac{1}{b_n}\right)} \qquad (1/x) \prod_{n=1}^{\infty} [(1 + 1/a_n)/(1 - 1/b_n)]$$

*Processing fee.* There is a fifteen dollar per submission processing fee for individuals who are not members of the Philosophy of Science Association.

*Copyright.* Manuscripts should be submitted to *Philosophy of Science* with the understanding that upon publication copyright will be transferred to the Philosophy of Science Association.

*Reprints.* Contributors of articles to this journal will receive, gratis, 25 reprints. Authors desiring additional reprints may order them by sending in, with their corrected galleys, the order forms that they will find enclosed with their galleys.

*Reviews.* Publications intended for review should be sent to Professor Merrilee Salmon, at the address given above.

*Philosophy of Science* is published quarterly; issues are dated *March, June, September* and *December* of each year. Correspondence concerning business matters should be addressed to Peter D. Asquith, Executive Secretary, Department of Philosophy, 18 Morrill Hall, Michigan State University, East Lansing, Michigan 48824, U.S.A.

*Membership and Subscriptions.* Membership in the Philosophy of Science Association may be applied for by writing to the Executive Secretary of the Association. Membership dues are graduated based on income: income below \$40,000—\$40.00; \$40,000—\$49,999—\$50.00; \$50,000 or above—\$60.00 U.S.A. a year and include subscription to the journal. Subscription price for non-members is \$50.00 U.S.A. (\$55.00 non-U.S.A.) per volume. New subscriptions and renewals are entered to begin with the first issue of the current volume. Should any issue of the current volume be out of print at the time the subscription order is received, the pro-rata value will be refunded to the subscriber. Duplicate copies may be obtained (if available) from the Executive Secretary at the regular price of single issues (\$15.00). Subscriptions at a reduced rate of \$20.00 a year are available to qualified students; inquire of the Executive Secretary.
