June 2018 / Hardback / 9781107166172

\$64.99 / £49.99

Practical Implementation of an Antibiotic Stewardship Program provides an essential resource for healthcare providers in acute care, long-term care, and ambulatory care settings looking either to begin or to strengthen existing antibiotic stewardship programs. Each chapter is written by both physician and pharmacist leaders in the stewardship field and incorporates both practical knowledge as well as evidence-based guidance. This book will also serve as a useful resource for medical students, pharmacy students, residents, and infectious diseases fellows looking to learn more about the field of antibiotic stewardship.

- Presents a practical guide for the implementation of antibiotic stewardship programs
- Offers real-life experience from experts in developing and sustaining antibiotic stewardship programs
- Incorporates both practical experience and evidence-based guidance to implement effective antibiotic stewardship programs in the acute care, long-term care, and ambulatory care settings

CONTENTS

Original Articles

- 621** Investigation of healthcare infection risks from water-related organisms: Summary of CDC consultations, 2014–2017
Kiran M. Perkins, Sujan C. Reddy, Ryan Fagan, Matthew J. Arduino, and Joseph F. Perz
- 627** Changes in vascular accesses and in incidence rates of dialysis-related bloodstream infections in Québec, Canada, 2011–2017
Élise Fortin, Manale Ouakki, Claude Tremblay, Jasmin Villeneuve, Simon Desmeules, Natasha Parisien, Danielle Moisan and Charles Frenette for SPIN-BAC-HD
- 632** Pulmonary artery catheter epidemiology of risk in pre-heart-transplant recipients
Zachary A Yetmar, Brian Lahr, John O'Horo, Atta Behfar, Priya Sampathkumar and Elena Beam
- 639** Surgical site infection risk following cesarean deliveries covered by Medicaid or private insurance
Sarah H. Yi, Kiran M. Perkins, Sophia V. Kazakova, Kelly M. Hatfield, David G. Kleinbaum, James Baggs, Rachel B. Slayton and John A. Jernigan
- 649** Integration of genomic and clinical data augments surveillance of healthcare-acquired infections
Doyle V. Ward, Andrew G. Hoss, Raivo Kolde, Helen C. van Aggelen, Joshua Loving, Stephen A. Smith, Deborah A. Mack, Raja Kathirvel, Jeffery A. Halperin, Douglas J. Buell, Brian E. Wong, Judy L. Ashworth, Mary M. Fortunato-Habib, Liyi Xu, Bruce A. Barton, Peter Lazar, Juan J. Carmona, Jomol Mathew, Ivan S. Salgo, Brian D. Gross and Richard T. Ellison III
- 656** Estimating the Attributable Disease Burden and Effects of Interhospital Patient Sharing on *Clostridium difficile* Infections
Daniel K. Sewell, Jacob E. Simmering, Samuel Justice, Sriram V. Pemmaraju, Alberto M. Segre and Philip M. Polgreen
- 662** Oral vancomycin prophylaxis during systemic antibiotic exposure to prevent *Clostridiodes difficile* infection relapses
Daniel A. Caroff, John T. Menchaca, Zilu Zhang, Chanu Rhee, Michael S. Calderwood, David W. Kubiak, Deborah S. Yokoe and Michael Klompas
- 668** Hardwiring diagnostic stewardship using electronic ordering restrictions for gastrointestinal pathogen testing
Jasmine R. Marcelin, Charlotte Brewer, Micah Beachy, Elizabeth Lyden, Tammy Winterboer, Caitlin N. Murphy, Paul D. Fey, Lauren Hood and Trevor C. Van Schooneveld

Reviews

- 674** Optimizing vascular-access device decision-making in the era of midline catheters
Kelly A. Cawcutt, Richard J. Hankins, Teresa A. Micheels and Mark E. Rupp
- 681** The evolution of catheter-associated urinary tract infection (CAUTI): Is it time for more inclusive metrics?
Sonali D. Advani and Mohamad G. Fakih
- 686** Design, implementation, and analysis considerations for cluster-randomized trials in infection control and hospital epidemiology: A systematic review
Lyndsay M. O'Hara, Natalia Blanco, Surbhi Leekha, Kristen A. Stafford, Gerard P. Slobogean, Emilie Ludeman and Anthony D. Harris for the CDC Prevention Epicenters Program
- 693** Antibiotic stewardship in the intensive care unit: Challenges and opportunities
Kathleen Chiotos, Pranita D. Tamma and Jeffrey S. Gerber

Commentary

- 699** Ban the handshake in winter?
Leonard A. Mermel

Concise Communications

- 701** Tuberculosis among healthcare personnel, United States, 2010–2016
Thitipong Mongkolrattanothai, Lauren A. Lambert and Carla A. Winston
- 705** Increasing burden of *Escherichia coli*, *Klebsiella pneumoniae*, and *Enterococcus faecium* in hospital-acquired bloodstream infections (2000–2014): A national dynamic cohort study
Koen Blot, Naïma Hammami, Stijn Blot, Dirk Vogelaers and Marie-Laurence Lambert
- 710** Test stewardship, frequency and fidelity: Impact on reported hospital-onset *Clostridioides difficile*
Michele S. Fleming, Olivia Hess, Heather L. Albert, Emily Styslinger, Michelle Doll, Huong Jane Nguyen, Susan McAulay-Kidd, Robin R. Hemphill, Tara Srivastava, Kaila D. Cooper, Michael P. Stevens and Gonzalo Bearman
- 713** Implementation of antimicrobial stewardship and infection prevention and control practices in long-term care facilities—Pennsylvania, 2017
Nkuchia M. M'ikanatha, Sameh W. Boktor, Arlene Seid, Allen R Kunselman and Jennifer H. Han
- 717** Antibiotic-resistant bacteria on personal devices in hospital intensive care units: Molecular approaches to quantifying and describing changes in the bacterial community of personal mobile devices
Savannah J. Volkoff, Alexander W. McCumber, Deverick J. Anderson and Claudia K. Gunsch

721 The effectiveness of a novel colorant additive in the daily cleaning of patient rooms
Shardul N. Rathod, Karen Beauvais, Linda K. Sullivan, Stephanie N. Sudikoff, David R. Peaper and Richard A. Martinello

724 Effectiveness of a hydrogen peroxide foam against bleach for the disinfection of sink drains
Blake W. Buchan, Jennifer A. Arvan, Mary Beth Graham, Sergey Tarima, Matthew L. Faron, Rahul Nanchal and L. Silvia Munoz-Price

Research Briefs

727 Cardiovascular daytime varying effect in cardiac surgery on surgical site infections and 1-year mortality: A prospective cohort study with 22,305 patients
Rami Sommerstein, Jonas Marschall, Stefan P. Kuster, Nicolas Troillet, Thierry Carrel, Friedrich S. Eckstein, Andreas F. Widmer and Swissnoso

729 Perspectives on central-line-associated bloodstream infection surveillance in home infusion therapy
Sara C. Keller, Mary Alexander, Deborah Williams, Clare Rock, Jennifer Han, Marin Schweizer, Teena Chopra, Shiv Deol, David K. Hirsch, Sara E. Cosgrove and Lisa Gorski

731 Tracking the spread of carbapenem-resistant *Enterobacteriaceae* (CRE) through clinical cultures alone underestimates the spread of CRE even more than anticipated
Bruce Y. Lee, Sarah M. Bartsch, Kim F. Wong, Diane S. Kim, Chenghua Cao, Leslie E. Mueller, Gabrielle M. Gussin, James A. McKinnell, Loren G. Miller and Susan S. Huang

Letters to the Editor

735 Clean care for all—it's in your hands: The May 5, 2019, World Health Organization's "SAVE LIVES: Clean Your Hands" campaign
Alexandra Peters, Tcheun Borzykowski, Ermira Tartari, Claire Kilpatrick, Safiah Hwai Chuen Mai, Benedetta Allegranzi and Didier Pittet

736 Real-world challenges in infection prevention: Differential implementation between stable and unstable patients may influence clinical effectiveness of interventions
Westyn Branch-Elliman and Marin Schweizer

737 Rapid and economical detection of eight carbapenem-resistance genes in *Enterobacteriaceae*, *Pseudomonas* spp, and *Acinetobacter* spp directly from positive blood cultures using an internally controlled multiplex-PCR assay
Surojit Das, Subhanita Roy, Samadrita Roy, Gaurav Goel, Kamini Walia, Sudipta Mukherjee, Sanjay Bhattacharya and Mammen Chandy

739 Impact of biofilm production on polymyxin B susceptibility among *Pseudomonas aeruginosa* clinical isolates
Tiele da Silva Carvalho Pharm and Leandro Reus Rodrigues Perez

MICROBIAL SURVEILLANCE TESTING MADE EASY

Healthmark offers the One-Two Punch to Identify and Document the Efficacy of Your Endoscope Reprocessing

SCREEN WITH THE **NOW! TEST**

*Rapid Indicator of
Gram-Negative bacteria*

Immediate, practical screening test. Simply flush the lumen of a flexible endoscope, such as a duodenoscope, and follow the procedure for gram-negative bacteria detection in less than 12 hours.

< 10 CFU

 **healthmark**

AUDIT WITH THE **FLEXIBLE ENDOSCOPE SAMPLING KIT**

Surveillance tool for the random testing of duodenoscopes in compliance with CDC guidelines - In association with [Nelson Laboratories](#)

A simple and complete kit. After flushing and brushing the lumen and elevator mechanism of a duodenoscope, simply follow the procedure to have the sample solution & brush heads quickly sent to Nelson Laboratories - the leader in independent testing of flexible endoscopes. All tools are included for testing and shipment.

Subscriptions

The individual subscription rate for 2019 is \$273. Individuals have the option to order directly from Cambridge University Press. Institutional print + electronic and e-only subscriptions are available from Cambridge University Press and include unlimited online access; rates are tiered according to an institution's type and research output and may be reviewed at the journal's CJO homepage: cambridge.org/ICHE.

Please direct subscription inquiries and requests for back issues to Customer Services at Cambridge University Press, e-mail: subscriptions_newyork@cambridge.org (USA, Canada, and Mexico) or journals@cambridge.org (outside of USA, Canada, and Mexico).

Postmaster: Send address changes to *Infection Control & Hospital Epidemiology*, Cambridge University Press, One Liberty Plaza, New York, NY 10006 USA.

About the cover:

Since 2015, the cover format of each volume of *Infection Control and Hospital Epidemiology* has been changed to honor one of the many professionals through out history who recognized not only how disease might be spread but also how those principles could be applied to reduce health care associated infections.

Rabbi Moshe ben Maimon or Moses Maimonides (son of Maimon) was born in Cordoba, Spain, a center of intellectual and religious freedom, on March 30, circa 1135. Maimon ben Joseph, his father, was a prominent scholar, writer, and judge for Jewish religious courts. Maimonides studied with Averroes, a prominent physician-philosopher. In 1148, his family left Cordoba after a repressive dynasty, the Almohades Caliphate that ruled in Spain and North Africa during the 12th and 13th centuries, required that they either convert to Islam, emigrate, or be put to death. They wandered first to Fez, Morocco, and to Acco, Palestine, before finally settling in Old Cairo (Fostat), Egypt, circa 1165. His father and brother established a business selling precious stones, but soon after, his father died and his brother David perished in a shipwreck. Maimonides turned to medicine as a means to support both families. While only in

his thirties, Maimonides was appointed as physician to the Court of the Sultan, and he served as head of the Jewish community in Cairo. During the Crusades, Maimonides' reputation as a healer was so great that King Richard the Lion hearted offered him a position as his personal physician.

Maimonides wrote many scholarly works on a variety of subjects ranging from biblical and Talmudic law to logic, science, and medicine. He embraced the use of careful scientific reasoning and eschewed mysticism. In his 10 books on medicine, Maimonides was an early advocate for the importance of hygiene, bathing, and the need for fresh air, clean water, a healthy diet, as well as proper disposal of refuse and placement of toilets far away from living quarters. Maimonides was an early "steward" who recommended non pharmacological interventions first. He also noted where evidence was lacking and further investigation was needed before recommendations could be made. Many of the concerns and observations that Maimonides made more than 800 years ago remain highly relevant to the field of infection prevention and control today.

Maimonides died in Cairo on December 13, 1204 at the age of 69. Several legends are a scribed to Maimonides. It is unlikely that he wrote the Oath of Maimonides. He is buried in Tiberias, Palestine, on the western shore of the Sea of Galilee in present-day Israel. However, this site was not chosen at random by a donkey that roamed free while bearing his body; Maimonides was interred at Tiberias at his request. Even today, Maimonides remains a highly regarded physician, philosopher, and scholar among Jewish, Arabic, and Christian circles.

Solutions to reduce HAIs

TEEZyme® Enzymatic Sponges

TEEZyme super absorbent sponges are designed to hold enzymatic detergent in, so that the detergent is guaranteed to disperse over the probe surface and is distributed more evenly. This provides longer contact time with biofilm and contaminants allowing the detergent to break them down.

- TEEZyme enzymatic sponges aid in the solubilization of polysaccharides and removal of biofilm allowing for high-level disinfectants to kill microbes
- TEEZyme enzymatic sponges have a proprietary blend of enzymes designed to break down all bio burden — blood, carbohydrates, protein, polysaccharides, fats, oils, uric acid and other nitrogenous compounds
- TEEZyme enzymatic sponges are lint-free, latex-free and dust-free

QwikDry® TEE Probe Drying Cloths

QwikDry TEE probe drying cloths have been developed to give healthcare professionals the added confidence of properly dried ultrasound TEE probes prior to re-use or storage. The super absorbent pad effectively removes moisture from TEE ultrasound probes without damaging the probe or sticking to the ultrasound probe during the drying process.

- Single-use
- Non-abrasive surface for easy glide on TEE probe
- Individually packaged, irradiated cloth
- Engineered textile with internal highly absorbent membrane

TPORter® Transportation System

TPORter TEE Ultrasound Probe Transportation and Procedure Case is designed to effectively and securely move high-level disinfected TEE ultrasound probes to the procedure area and then return the biologically soiled TEE ultrasound probe for reprocessing. TPORter features a variety of molded compartments to accommodate the TEE ultrasound probe, bite block(s), a PullUp™ Bio-Barrier Sleeve and a TEEZyme enzymatic sponge.

- Constructed of polycarbonate for excellent visibility and strength
- Individual compartments for electrical connector, cables and insertion tube
- Individual compartment for transportation of pre- and post-care items
- Designed to transport all major TEE probe brands

Medicine

Books and Journals from
Cambridge University Press

The Cambridge Medicine programme focuses its book publishing in a defined set of core clinical areas with our great strength in the clinical brain sciences. Other specialties of significant focus include reproductive medicine/obstetrics and gynaecology, anaesthesia and critical care, emergency medicine and pathology.

Our journals programme covers a broad spectrum of medical disciplines including emergency and disaster medicine, epidemiology and infectious diseases, biomedical science, genetics, nutrition, mental health and psychiatry, and neuroscience.

We partner with many learned societies including The Society for Healthcare Epidemiology of America, and the Neuroscience Education Institute, and the Royal College of Obstetricians and Gynaecologists.
