**PROF. SAMUEL KRISLOV
DEPARTMENT OF POLITICAL SCIENCE
UNIVERSITY OF MINNESOTA
MINNEAPOLIS, MINNESOTA 55455**

The editors of the *Wisconsin Law Review*, in conjunction with the Center for Law and Behavioral Science at the University of Wisconsin, have announced the revival of the "Law and Society" section of that journal. Manuscripts which explore the social, political, or economic dimensions of important social problems are needed. Manuscripts which report the results of or evaluate significant empirical research are preferred.

Manuscripts should be typed and submitted in *duplicate* to

the Silverlake Experiment

testing delinquency theory and community intervention

LaMar T. Empey and Steven G. Lubeck, *University of Southern California*

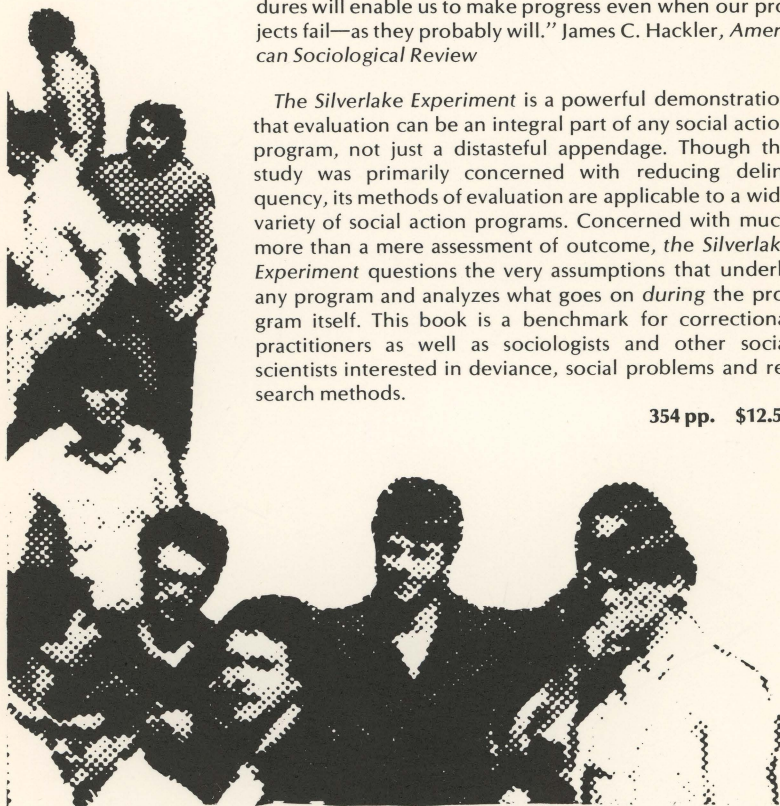

"Offers the reader brilliant conceptualization, detailed logical and statistical analysis, frustrating analytical and behavioral outcomes, and very fortunately, some apparent afterthoughts on cost-benefits in the Silverlake experiment." Stuart Adams in *Federal Probation*

"Represents the kind of breakthroughs necessary to bridge the gap between theoretical formulations and practical applications." *Choice*

"This study will stand as one of the best illustrations of quality research in delinquency prevention. These procedures will enable us to make progress even when our projects fail—as they probably will." James C. Hackler, *American Sociological Review*

The Silverlake Experiment is a powerful demonstration that evaluation can be an integral part of any social action program, not just a distasteful appendage. Though the study was primarily concerned with reducing delinquency, its methods of evaluation are applicable to a wide variety of social action programs. Concerned with much more than a mere assessment of outcome, *the Silverlake Experiment* questions the very assumptions that underly any program and analyzes what goes on *during* the program itself. This book is a benchmark for correctional practitioners as well as sociologists and other social scientists interested in deviance, social problems and research methods.
