
DEVELOPMENT AND PSYCHOPATHOLOGY

 Cambridge
Journals

EDITORS:

Dante Cicchetti, *University of Rochester*
Barry Nurcombe, *Child and Adolescent
Psychiatric Hospital, Vanderbilt University*

This multidisciplinary journal is devoted to the publication of original empirical, theoretical and review papers which address the interrelationship of normal and pathological development in adults and children. It is intended to serve and integrate the emerging field of developmental psychopathology which strives to understand patterns of adaptation and maladaptation *throughout* the life span. Explorations of abnormal functioning in the social, emotional, cognitive, linguistic and biological domains help to clarify normal developmental processes. Reciprocally, elucidations of principles of normal development help to broaden our understanding of psychopathological conditions. Contributions may also be on the processes underlying the adaptive outcomes in populations "at risk" for psychopathology. This journal is of vital interest to psychologists, psychiatrists, social scientists, neuroscientists, pediatricians and researchers.

Development and Psychopathology (ISSN 0954-5794) is published quarterly. Subscriptions to Volume 1 (1989) or Volume 2 (1990) are each \$75.00 for institutions; \$35.00 for individuals; single parts \$20.00.

BEHAVIORAL and BRAIN SCIENCES

EDITOR:

Stevan Harnad, *Princeton, NJ*

Behavioral and Brain Sciences publishes particularly significant and controversial "target articles." These have been successful in drawing out the leading investigators in a wide range of fields who discuss, debate and critically analyze topics of current interest to the entire biobehavioral science community. Fascinating and often surprising results come from the 20-30 open peer commentaries on each target article from psychologists, linguists, philosophers, neuroscientists, anthropologists, developmentalists and other specialists within and across these disciplines.

Selected Papers

Sex differences in human mate preferences:
Evolutionary hypothesis tested in 37 cultures,
D.M. Buss

A solution to the tag-assignment problem for neural
networks, *Gary W. Strong, Bruce A. Whitehead*

Strategies for the control of voluntary movements
with one degree of freedom, *G.L. Gottlieb et al.*

Numerical competence in animals: Definitional
issues, current evidence and a new research agenda,
H. Davis, R. Perusse

Genetic similarity, human altruism, and group
intelligence, *J. Philippe Rushton*

Behavioral and Brain Sciences (ISSN 0140-525X) is
published quarterly. Subscription to Volume 13 1990 (US
and Canada only): \$164.00 for institutions; \$69.00 for
individuals; single parts \$45.00.

Back Volumes: 1-12 (1978-1989) \$160.00 each.

PSYCHOLOGICAL SCIENCE

*Published for the
American Psychological Society*

EDITOR

William K Estes, *Harvard University*

Psychological Science is a new bimonthly publication being launched as the flagship journal of the American Psychological Society, founded 1988, to regain the scientific focus of psychological research. The journal is designed to be the forum for research, theory, and application in psychology and the closely related behavioral, cognitive, neural, and social sciences. The journal also considers psychology in government and public affairs. Unlike most research journals, *Psychological Science* encourages articles of general theoretical significance or of broad interest across specialties.

Recent Articles

The Prenatal Origins of Behavioral Organization,
William P Smotherman and Scott R Robinson

Facts, Fantasies, and the Future of Child Care in
the United States, *Sandra Scarr et al.*

Serial vs Parallel Processing, *James T Townsend*

Answering Reading Comprehension Items Without
Passages on the SAT, *Stuart Katz et al.*

Infants' Perception of Phase Structure in Music,
Carol L Krumhansl and Peter W Jusczyk

Psychological Science (ISSN 0956-7976) is published bimonthly. Volume 1 (1990) subscriptions (US and Canada only): \$100.00 institutions; \$50.00 for non-member individuals. APS members receive the journal as part of their dues.

CONTENTS

Research Articles

- PETER EKSTRÖM 389 Neural elements in the pineal complex of the frog, *Rana esculenta*,
AND HILMAR MEISSL I: Centrally projecting neurons
- P. EKSTRÖM, 399 Neural elements in the pineal complex of the frog, *Rana esculenta*,
T. ÖSTHOLM, II: GABA-immunoreactive neurons and
H. MEISSL, A. BRUUN, FMRamide-immunoreactive efferent axons
J.G. RICHARDS,
AND H. MÖHLER
- M.A. BERKLEY 413 Behavioral determination of the spatial selectivity of contrast
adaptation in cats: Some evidence for a common plan in the
mammalian visual system
- C.A. DVORAK 427 Wavelength-dependent temporal properties of retinal horizontal
AND A.M. GRANDA cells in turtles
- VICENTE M. MONTERO 437 Quantitative immunogold analysis reveals high glutamate levels in
synaptic terminals of retino-geniculate, cortico-geniculate, and
geniculo-cortical axons in the cat
- B.R. PAYNE 445 Representation of the ipsilateral visual field in the transition zone
between areas 17 and 18 of the cat's cerebral cortex
- B.R. PAYNE 475 Receptive fields of neurons at the confluence of cerebral cortical
AND D.F. SIWEK areas 17, 18, 20a, and 20b in the cat
- SHU-ICHI WATANABE 481 Cyclic GMP-activated channels of rod photoreceptors show neither
AND GARY MATTHEWS fast nor slow desensitization
- K.N. LEIBOVIC 489 Recovery from bleaching in photoreceptors promoted by biotin,
AND J. BANDARCHI pyruvate, and glucose

Short Communication

- A.L. HOLDEN 493 Centrifugal pathways to the retina: Which way does the
"searchlight" point?

Commentary
